## Hall of Fame or Shame?

### Sony Google TV Remote

## Hall of Shame!

Very complex

So large that it requires two hands

So many controls that you can't use in the dark (watching movie?)

Two navigation pads. When do you use which?

But, does have typing input...

## Review of Usability Testing

- User testing is important, but takes time/effort
- Use ????? tasks & ????? participants
  - real tasks & representative participants
- Be ethical & treat your participants well
- Want to know what people are doing & why? collect
  - process data
- Bottom line data requires ???? to get statistically reliable results
  - more participants
- Difference between between & within groups?
  - between groups: everyone participates in one condition
  - within groups: everyone participates in multiple conditions

**2** **Album Notes**  
Weezer: Rivers Cuomo (vocals, guitar); Brian Bell (guitar); Matt Sharp (bass); Patrick Wilson (drums). Recorded at Cello Studios, Los Angeles, California in December 2000. In 1994 Weezer burst onto the music scene, reaching platinum status with their debut, and in the process proving that there was still room in an airbrushed MTV world for unrepentant power pop played by decidedly non-airbrushed guys. Following a brief sojourn into semi-deconstructionism, 1997's PINKERTON, the four men who make up Weezer serve up a third offering, WEEZER 2001, returning to the sound and producer of their successful debut. Nowhere does producer Ric Ocasek define his trademark refined power pop style more than with Weezer. Unlike the immediate, obvious pop hooks of the string of singles on the first album, though, the songs on WEEZER 2001 may take a few listens to settle in. However, once the subtle-yet-undeniable refrains of such tracks as "Crab," "Don't Let Go," and first single "Hash Pipe" make their way into your skull, they're there to stay, as furious, fuzzy, layered guitars compliment Rivers Cuomo's raw, vulnerable vocals. While this disc clocks in at less than a half-hour long, it packs more hooky wallop than many double live albums.

## Design Patterns

- Design patterns communicate common design problems and solutions
  - First used in architecture [Alexander]
    - Ex. How to create a beer hall where people socialize?

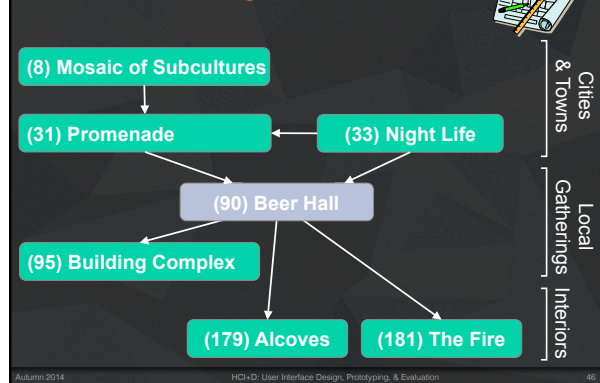

Somewhere in the community at least one big place where a few hundred people can gather, with beer and wine, music, and perhaps a half-dozen activities, so that people are continuously criss-crossing from one to another.

## Using Design Patterns

- Not too general and not too specific
  - use a solution “a million times over, without ever doing it the same way twice”
- Design patterns are a *shared* language
  - for “building and planning towns, neighborhoods, houses, gardens, & rooms.”
  - Ex. Beer hall is part of a center for public life...
  - Ex. Beer hall needs spaces for groups to be alone... ALCOVES

## A Web of Design Patterns

## Web Design Patterns

- Now used in UI design
- Communicate design problems & solutions
  - how to create navigation bars for finding relevant content...
  - how to create a shopping cart that supports check out...
  - how to make e-commerce sites where people return & buy...

## NAVIGATION BAR (K2)

Problem: Customers need a structured, organized way of finding the most important parts of your Web site

## Patterns Support Creativity

- Patterns come from successful examples
  - sites that are so successful that lots of users are familiar with their paradigms (e.g., Google, Amazon, Yahoo, Facebook...)
  - interaction techniques/metaphors that work well across many sites (e.g., shopping carts)
- Not too general & not too specific
  - you need to specialize to your needs
- Patterns let you focus on the hard, unique problems to your design situation
  - every real design will have many of these

Autumn 2014

61

## Patterns Offer the Best of Principles, Guidelines & Templates

- Patterns help you get the details right, without over-constraining your solution
  - unlike principles, patterns not too general, so can see how to apply to your situation
  - unlike guidelines, patterns discuss tradeoffs, show good examples & tie to other patterns
  - unlike style guides, patterns not too specific, so can still be specialized
  - unlike page templates, patterns illustrate flows among different pages
- Patterns can serve as documentation for team-oriented environments

  - average: 3.96
  - median: 4.00
  - std. dev.: 1.12
  - but 30 had 3 or lower on this quiz (19 <= 2)
- Answers
  - Using lots of whitespace in a visual design
    - Emphasizes the elements surrounded by the whitespace
  - Using color for ordering elements
    - Works poorly because humans are bad at using hue to order objects
  - Heuristic Evaluation was
    - Developed to be less expensive in time and cost than Usability Testing
  - The Human Visual System
    - Uses cones to perceive color, Uses rods to perceive movement, Most of the cones are centered at the fovea (center of the Retina), The irregular distribution of cones leads to color deficiency
  - The Model Human Processor
    - Has processor cycle times of approximately 100ms

## Patterns in Exploration Phase

- Use Exploration-level patterns to design overall structure
  - different choices will give radically different designs
- For example, how to organize information
  - HIERARCHICAL ORGANIZATION (B3)
  - TASK-BASED ORGANIZATION (B4)
  - ALPHABETICAL ORGANIZATION (B5)
  - ...

## Patterns in Exploration Phase

TASK-BASED ORGANIZATION (B4): Link the completion of one group of tasks to the beginning of the next related task(s)

## Design Exploration Example

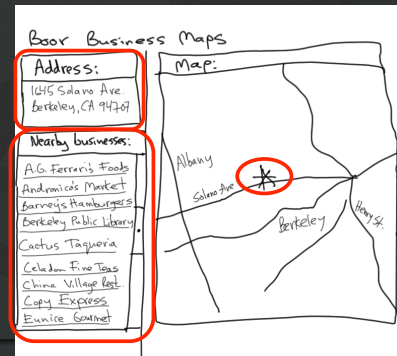

- John given the task of designing a new subsite for showing maps to businesses
  - listings found by typing in address
  - key feature: show nearby businesses
- John comes up with two design sketches
  - Design #1 uses ALPHABETICAL ORGANIZATION (B5) for list of all nearby businesses
  - Design #2 uses TASK-BASED ORGANIZATION (B4) for list of related nearby businesses

## Evaluating Which Design to Choose

- Low-fidelity Usability Test
  - sketches the rest of the key screens on paper
  - brings in 5 participants to his office
  - asks each to carry out 3 tasks while John's colleague Sam "plays computer"
  - John observes how they perform
- Tasks
  - 1) look up 1645 Solano Ave., Berkeley CA
  - 2) look up 1700 California Ave, San Francisco CA & find Tadich Grill
  - 3) look up 2106 N 55th St, Seattle WA & find a Sushi restaurant nearby

## Evaluating Which Design to Choose

- Results with Design #1 (Alphabetical)
  - Task 1: look up 1645 Solano Ave
    - no difficulties encountered – warm-up task!
  - Task 2: look up 1700 California & find Tadich Grill
    - several users didn't notice that the list of nearby businesses was scrollable (due to paper affordances?)
    - those that scrolled took awhile to find in list of over 500
  - Task 3: look up 2106 55th St & find nearby Sushi restaurant
    - 3 users only picked restaurants that had "restaurant" in the name & thus couldn't find "Kisaku"

## Evaluating Which Design to Choose

- Results with Design #2 (Task-based)
  - Task 1: look up 1645 Solano Ave
    - no difficulties encountered – warm-up task!
  - Task 2: look up 1700 California & find Tadich Grill
    - 1 user took awhile to figure out that Tadich Grill was a restaurant & to click on the "Restaurants" link
    - all others found it in 2 clicks (Restaurants->Tadich Grill)
  - Task 3: look up 2106 55th St & find nearby Sushi restaurant
    - 3 found "Kisaku" in 2 clicks
    - 2 others asked for a listing of Japanese restaurants

## Evaluating Which Design to Choose

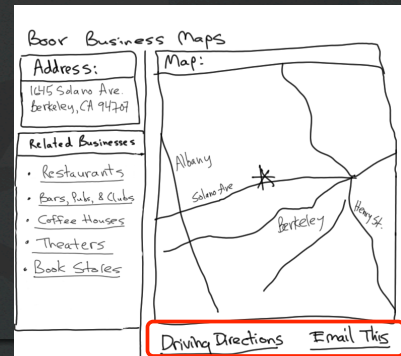

- General comments
    - 2 users said they often want to email/SMS maps to friends who they will be meeting (task-based)
    - 3 users wanted driving directions (task-based)
- TASK-BASED ORGANIZATION (B4) worked better, but still had some minor problems

## Summary

- Lots of issues involved in designing compelling, usable web sites
- Design patterns are one way of capturing good design knowledge
  - generative (help you create new designs)
  - consider trade-offs
  - concrete examples of successful uses
  - a networked language that works together
