VALUE PROPOSITION

Problem and solution
overview

CLIENT:

PROJECT:

Muncher

FUSS LESS, DINE MORE

“Muncher’s mission is to help you decide where to eat in groups. With the help of human-based artificial intelligence, Muncher understands your preferences and makes the hard decisions for you.”

CLIENT:

PROJECT:

2

TASKS

Actionable things for
our users

CLIENT:

PROJECT:

THREE REPRESENTATIVE TASKS

Decide a
place to
eat

[Moderate]

Deal with
user
discontent

[Complex]

Coordinate
the actual
plans

[Simple]

CLIENT:

PROJECT:

3

REVISED INTERFACE DESIGNS

Taking it from Low-Fi to
Medium-Fi

CLIENT:

PROJECT:

Major Design Changes

CLIENT:

PROJECT:

UI CHANGE #1:

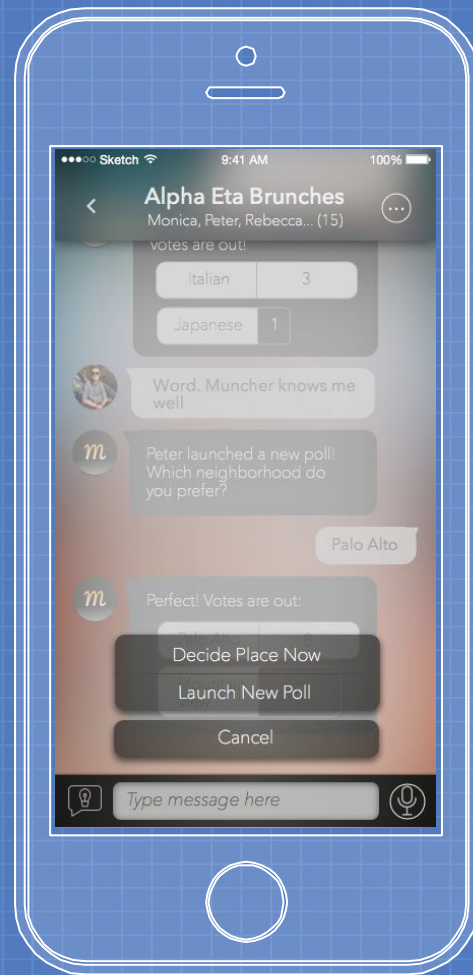

Launching a poll

Integrated
launching a poll as
an overlay

Keeps the user
engaged in the chat

Launched from new
lightbulb button
instead of "+"

Separates create
new outing function
from polling

CLIENT:

PROJECT:

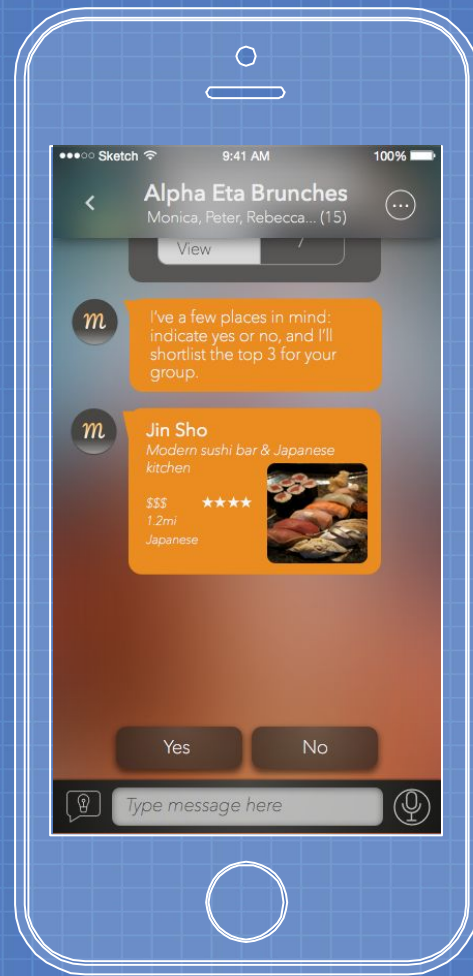

UI CHANGE #2:

Genie Suggestions

At decision time,
multiple
suggestions are
presented

Provides the user
with more variety

Gives the human AI
immediate feedback
on multiple
restaurants

CLIENT:

PROJECT:

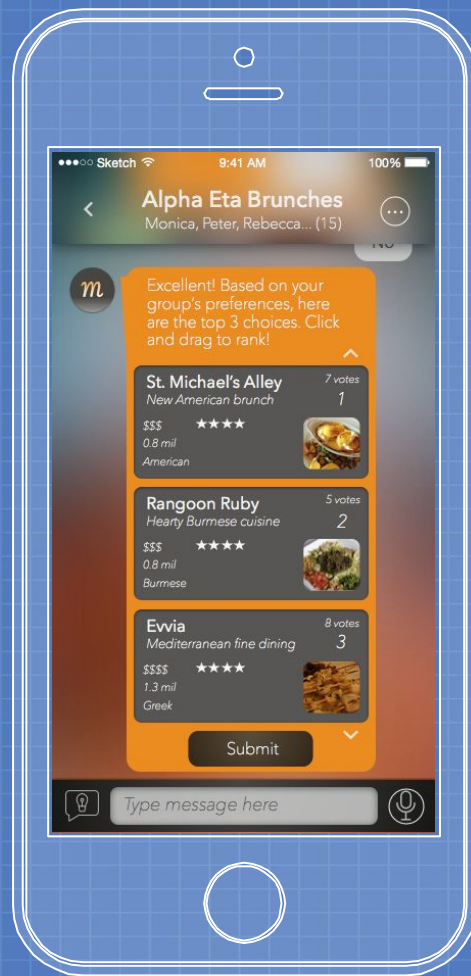

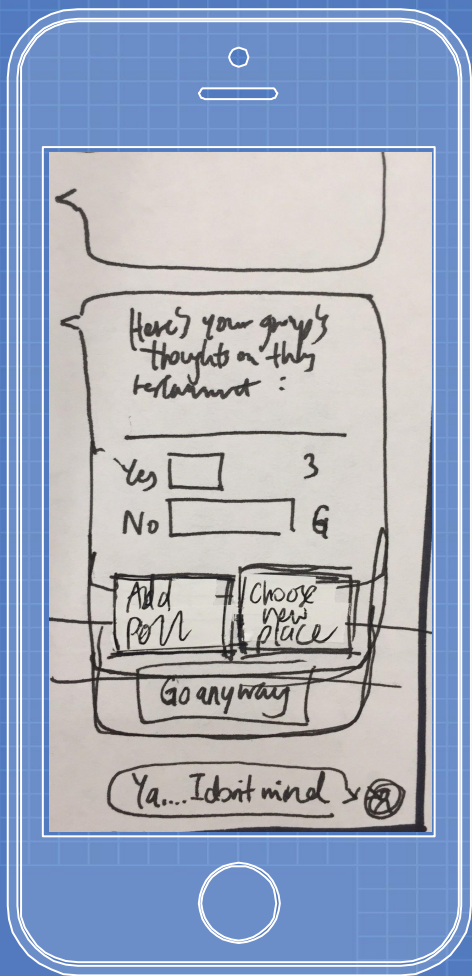

UI CHANGE #3:

Finalizing a location

Switched to a drag
and drop feature
instead of buttons

Prevents users from
quitting based on
boredom

Eliminates endless
cycles

CLIENT:

PROJECT:

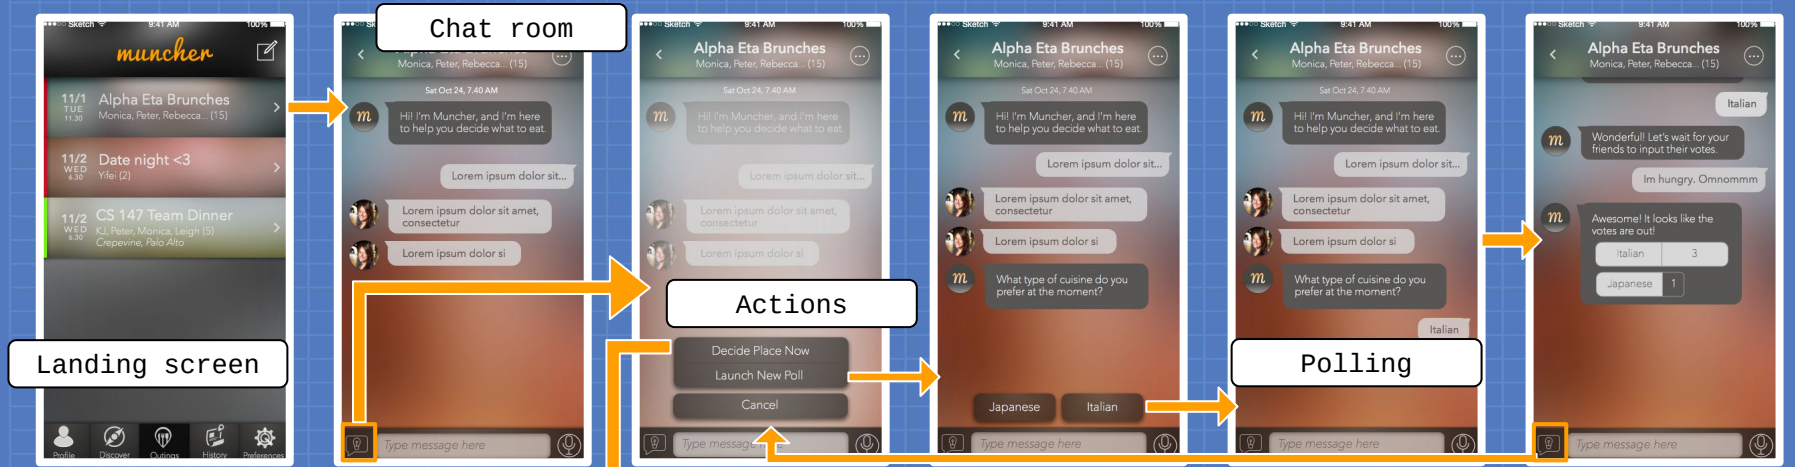

Task Flows

CLIENT:

PROJECT:

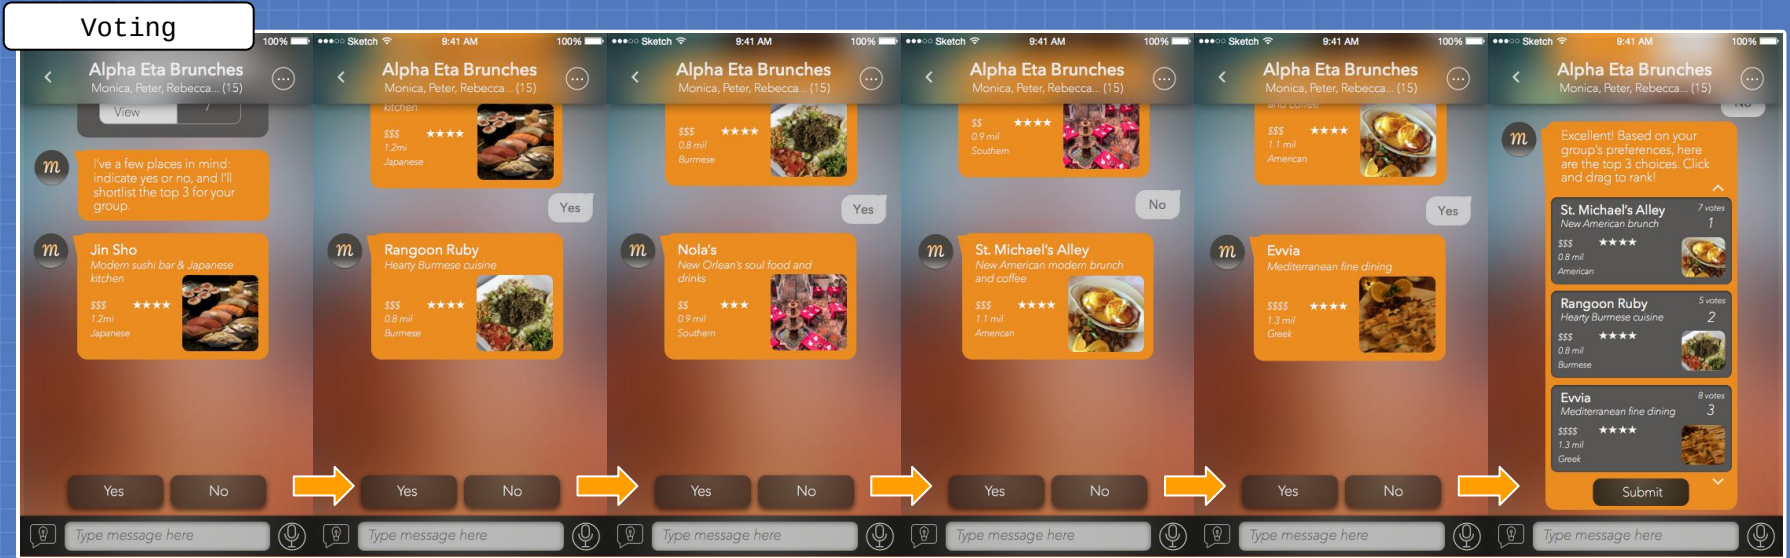

Task #1: Decide a place to eat

CLIENT:

PROJECT:

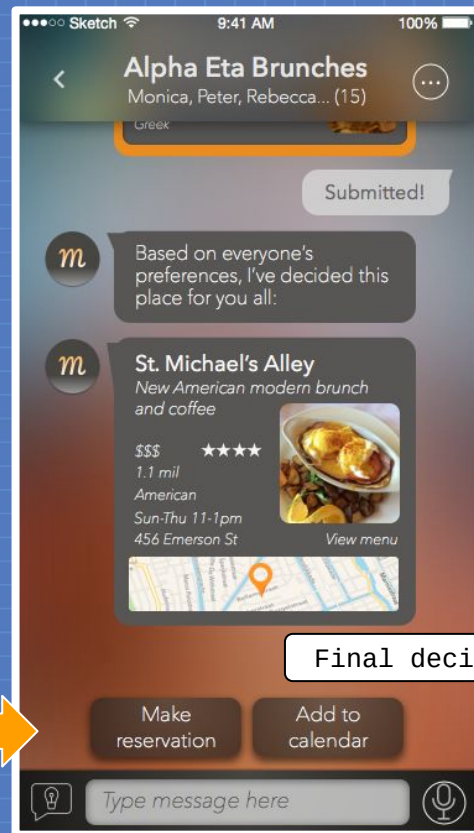

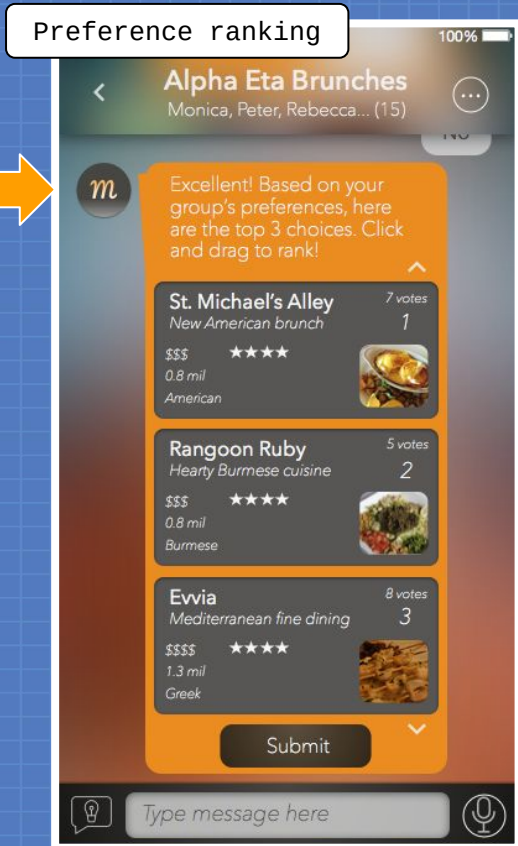

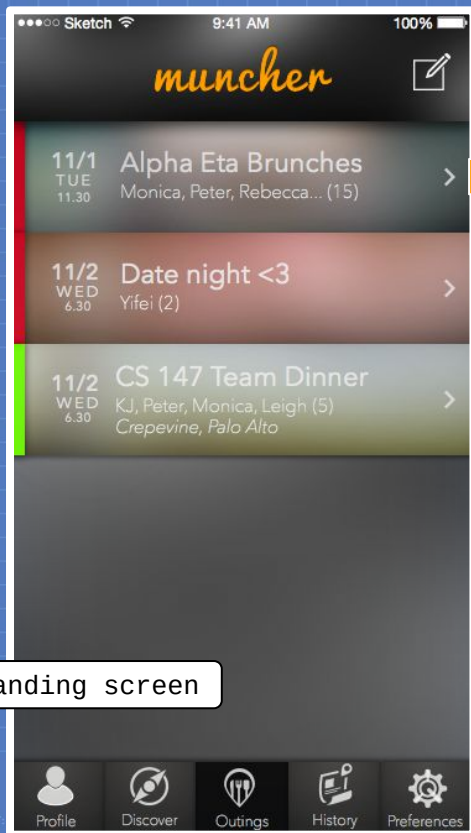

Task #1: Decide a place to eat

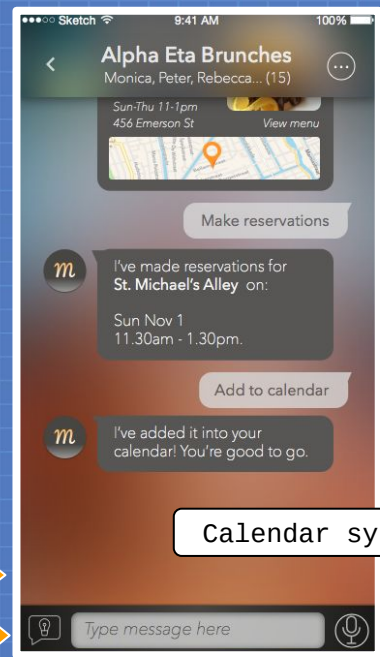

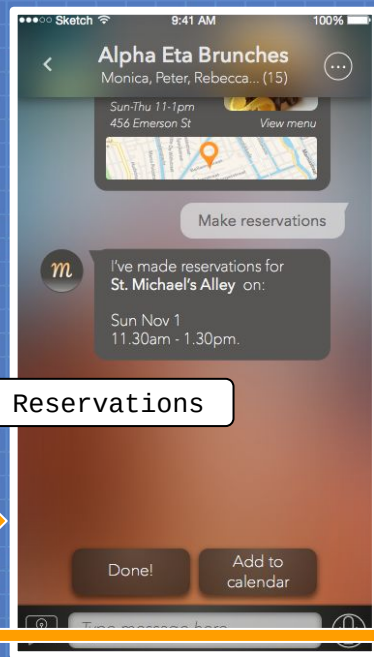

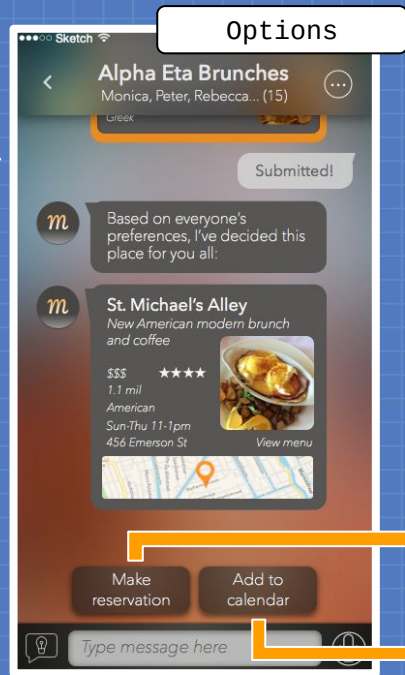

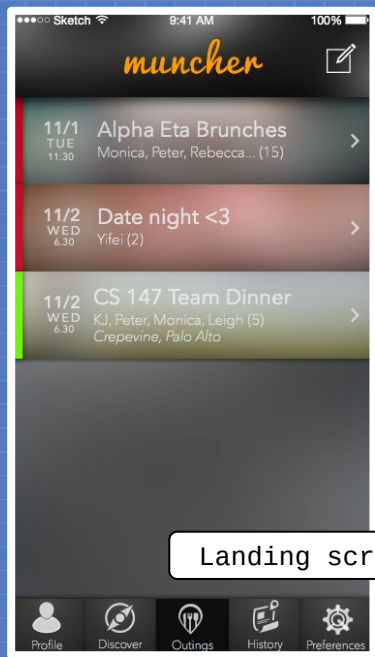

CLIENT:

PROJECT:

Task #2: Deal with user discontent

Task #3: Coordinate the actual plans

CLIENT:

PROTOTYPE OVERVIEW

The “making-of” story
behind the app

CLIENT:

PROJECT:

We used:

CLIENT:

PROJECT:

- Allows for clean, aesthetically pleasing iPhone app designs
- Look & feel of designs are closer to the final product

CLIENT:

PROJECT:

- Extremely slow
- Learning curve for the software

We used:

CLIENT:

PROJECT:

- Helps link screens together to create a flow
- Allows users to simulate the experience of using a real iPhone app

CLIENT:

PROJECT:

- Delayed responses from the interface
- Weak transitions between features
- Data that users see is static

POSITIVES

Cleaner + consistent UI

Every feature is kept within a group chat

Shorter decision making flow

CLIENT:

PROJECT:

NEGATIVES

Static data

Unclear if our color scheme is appealing

Our app could be more visuals and less words

CLIENT:

PROJECT:

TRADEOFFS

We did not implement a “swipe between cards” feature to keep everything consistent in a group chat

Decided against having an admin for each group for simplicity

CLIENT:

PROJECT:

5

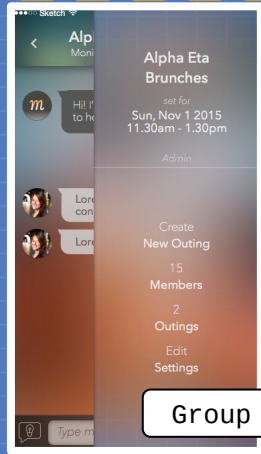

ADDITIONAL SCREENS

Extra features

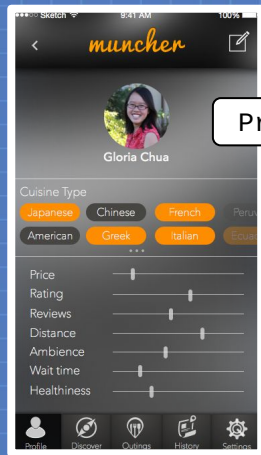

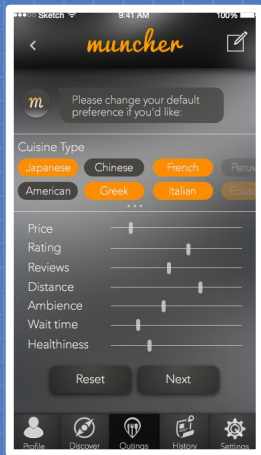

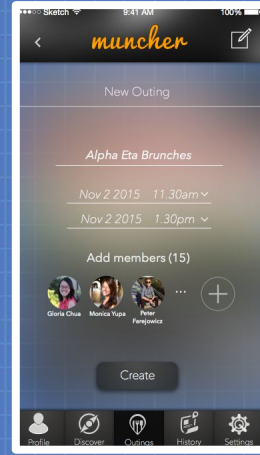

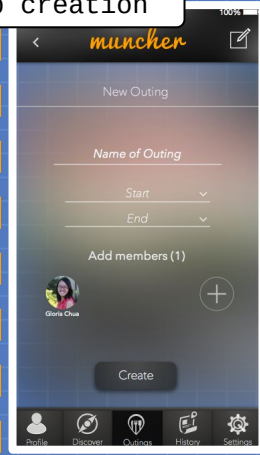

CLIENT:

PROJECT:

Group manager

Group creation

Profile preferences

CLIENT:

PROJECT:

6
