SpringBoard

An app that encourages users to meet their daily goals by magnifying personal success into positive social impact.

First World Problems: In our comfortable lives, people need motivational strategies to develop healthy habits. Mundane things prevent us from changing our behavior: boredom leads to eating, impulse leads to overspending, etc. The rewards for commitment are too small. Meanwhile, our busy schedules isolate us from the bigger problems outside of our bubble, and highly-productive, socially-conscious individuals don’t have time to find important causes or effective charities to support.

We want to capture the best of both world. Charities are desperate to connect with donors. Potential donors want to help but feel disconnected from problems aren’t part of their daily lives. SpringBoard connects these groups, giving positive feedback to goal setters and motivating the world.

The SpringBoard Team

1) Our user, Jacob, steps on the scale
2) Jacob gets the idea that he should lose weight
3) He sets a goal on SpringBoard to stop drinking soda
4) Scene Changes: Jacob goes into the lunch room
5) He approaches the soda foundation and considers getting soda (and breaking his goal!)
6) Instead, he fills his cup with water
7) Jacob sits down at the table with his phone
8) He gets a SpringBoard notification on his phone and swipes right
9) [Slide transition]: Charity in action - child receives food
10) Scene Change: Mckinsey is running down the sidewalk
11) She gets a SpringBoard notification, asking her if she has gone running
12) She indicates that she achieved her goal on SpringBoard
13) [Slide transition]: Charity in action - child receives ball to play with
14) -17) Snapshots of good
15) 18) Snapshots of good compressed to “social impact” feed in UI
16) & 20) User see the progress they’ve made on their goal along side the donations given
17) 21) -24) People hold up their goals to show things they want to accomplish. Mini-profile shots
UI Sketching

Idea 1

Goal Setting
- Users have more curated options for goals and charities

More social
- Can see how many others have joined a goal or donated to a cause

Notifications are simple
UI Sketching

Idea 2

Customizable
- Choose your goal and your charity

Notifications take more control of your screen
- More invasive
**UI Scenario Storyboards**

**Scenario 1:** Lee sets up a SpringBoard profile, sets a goal, and selects a charity to sponsor

1) Lee thinks of a goal
2) Lee downloads the SpringBoard app
3) Blank profile
4) Lee's full profile
5) Blank dashboard
6) Lee sets a goal
7) Lee configures goal/ reminders

**Scenario 2:** Jim has a goal that is linked to the World Health Organization and wants to see how his success has supported the wellbeing of others

1) Jim goes to the SpringBoard “Track Progress” page
2) SpringBoard shows his success alongside his impact trends
3) Jim can see how the donations have made a difference
**Scenario 3:** Margo is super busy, but still wants to set and track progress on her goals.

1) Margo can swipe to indicate if she achieved her goal or not
2) If yes, the app congratulates the user concisely and shows quick progress stats
3) Otherwise, SpringBoard still encourages users to give more
4) Margo is reminded of her scheduled run
5) &6) Margo can quickly swipe to see her progress and does not need to log extensively

<tbody>
<tr>
<td>Set up profile</td>
<td>User enters their name, age, profile picture, financial info, and Facebook info to set up an account. They also choose the causes that interest them so that SpringBoard can make better recommendations for charities to support.</td>
<td></td>
</tr>
<tr>
<td>Dashboard</td>
<td>The dashboard lists all the user’s goals, a few quick stats on their current progress, and an impact feed that shows the effect of their charity. Checkboxes for the daily tasks are available front and center so that the user can quickly tap them off during the day.</td>
<td></td>

<td></td>
</tr>
<tr>
<td>Set/edit a goal</td>
<td>Users can configure the title of the goal and the reminders that you get throughout the day. They set the text of the goal, select the charity they want to sponsor, and choose the length of the goal's duration.</td>
<td></td>
</tr>
<tr>
<td>Choose a charity to support with “smart” recommendation system</td>
<td>At the top of the screen, a search bar allows the user to look up charities they have in mind. The user can browse through recommended charities by sliding a thumbnail banner and adjust the amount that they want to donate by moving up or down the gradient slider. The text representing what their donation would give changes dynamically.</td>
<td></td>
</tr>
<tr>
<td>View progress on tasks</td>
<td>Users can see the progress on their goals alongside the amount of money they have given to charity.</td>
<td></td>
</tr>
<tr>
<td>Transfer money from your bank or venmo account to the charity when goals are accomplished</td>
<td>User enters financial information and can configure whether donations happen by default or only when they mark their goals as accomplished.</td>
<td></td>
</tr>
