# Connect the dots to unleash your creative potential
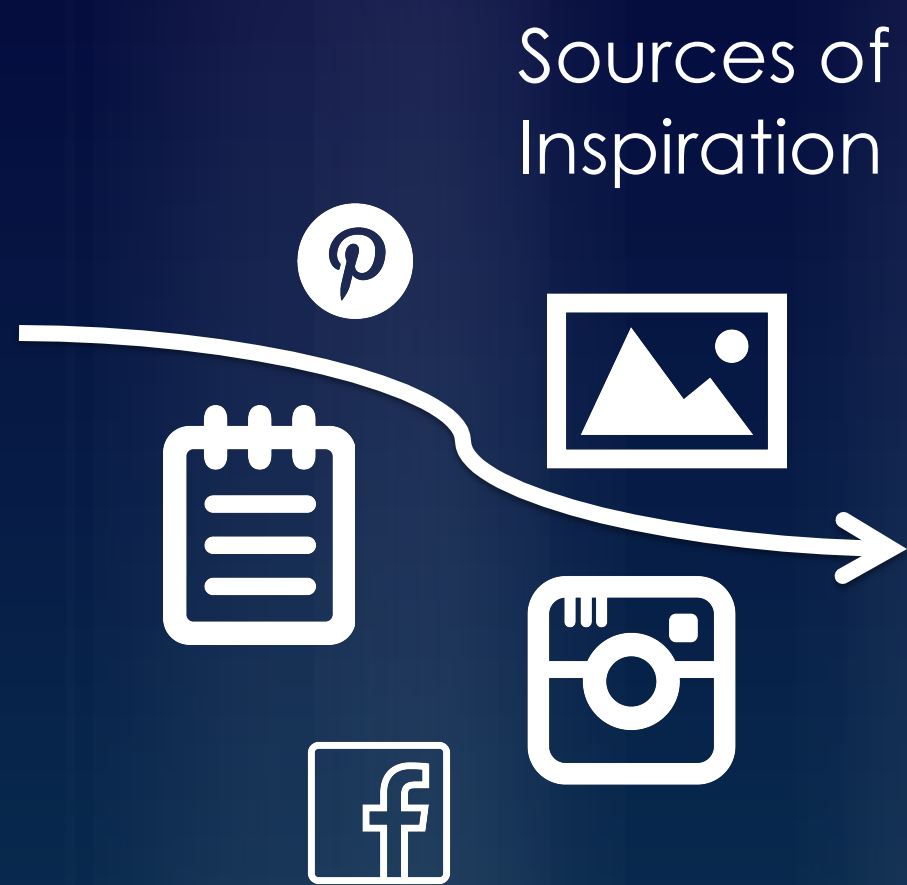

An idea for ideas

How can we help people be more **creative**?
How can people gain creative **confidence**?
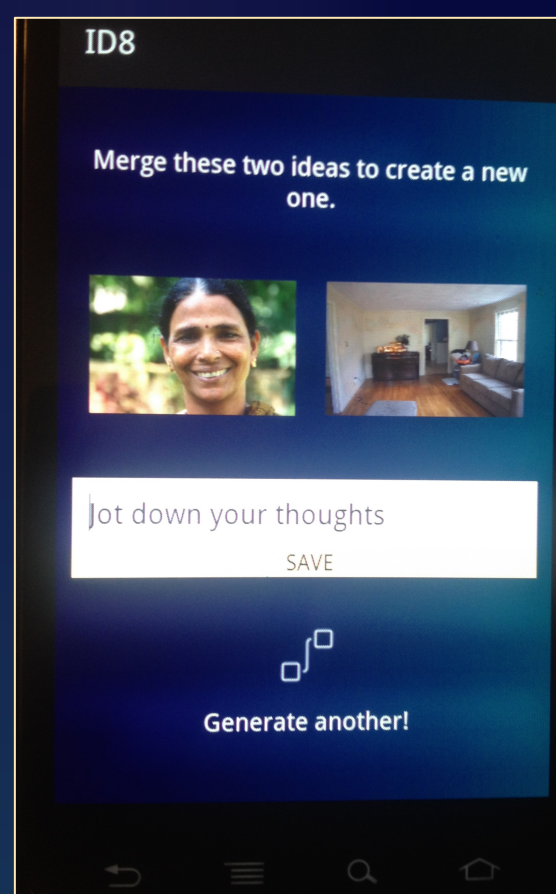

**Creativity can be developed through the association of different elements to generate new ideas**

We created a **private space** for spontaneous idea generation, where we promote creativity through **association** of ideas and thoughts

Sources of Inspiration

User's private space:
A no - judgment zone

A way to practice random association until it's natural

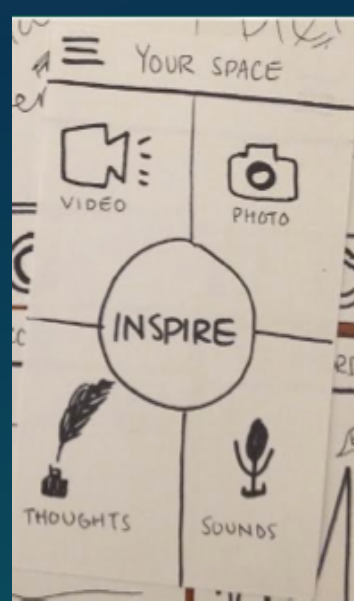

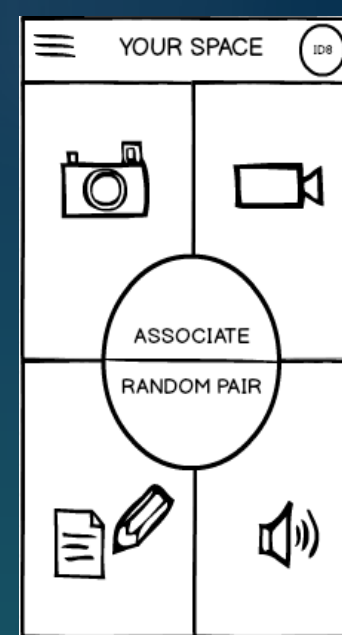

Group ideas for easy access, integrated on-the-go ideation
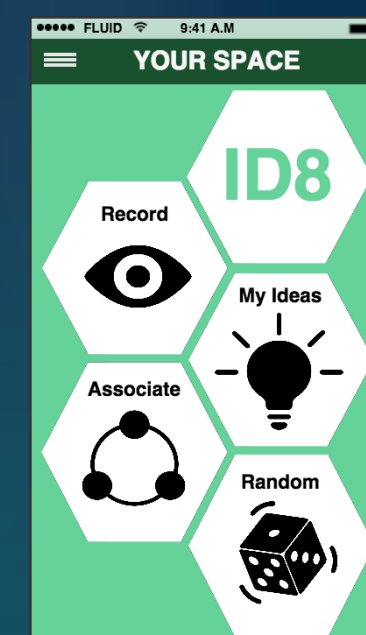

Our own creative, iterative process with Id8:

Initial Sketches

**low-fi prototype**

wireframe

medium-fi prototype

high-fi prototype
