

SpeakEasy

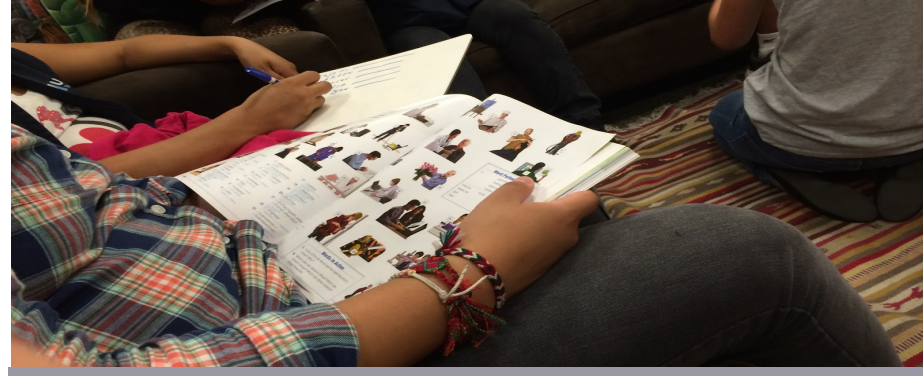

Enabling language learning on the go with contextual suggestions and real-time feedback

Problem

Current language learning solutions are outside of regular activity and unhelpful when actually communicating in a contextually relevant environment

Classrooms

Textbooks & Dictionaries

Translation services

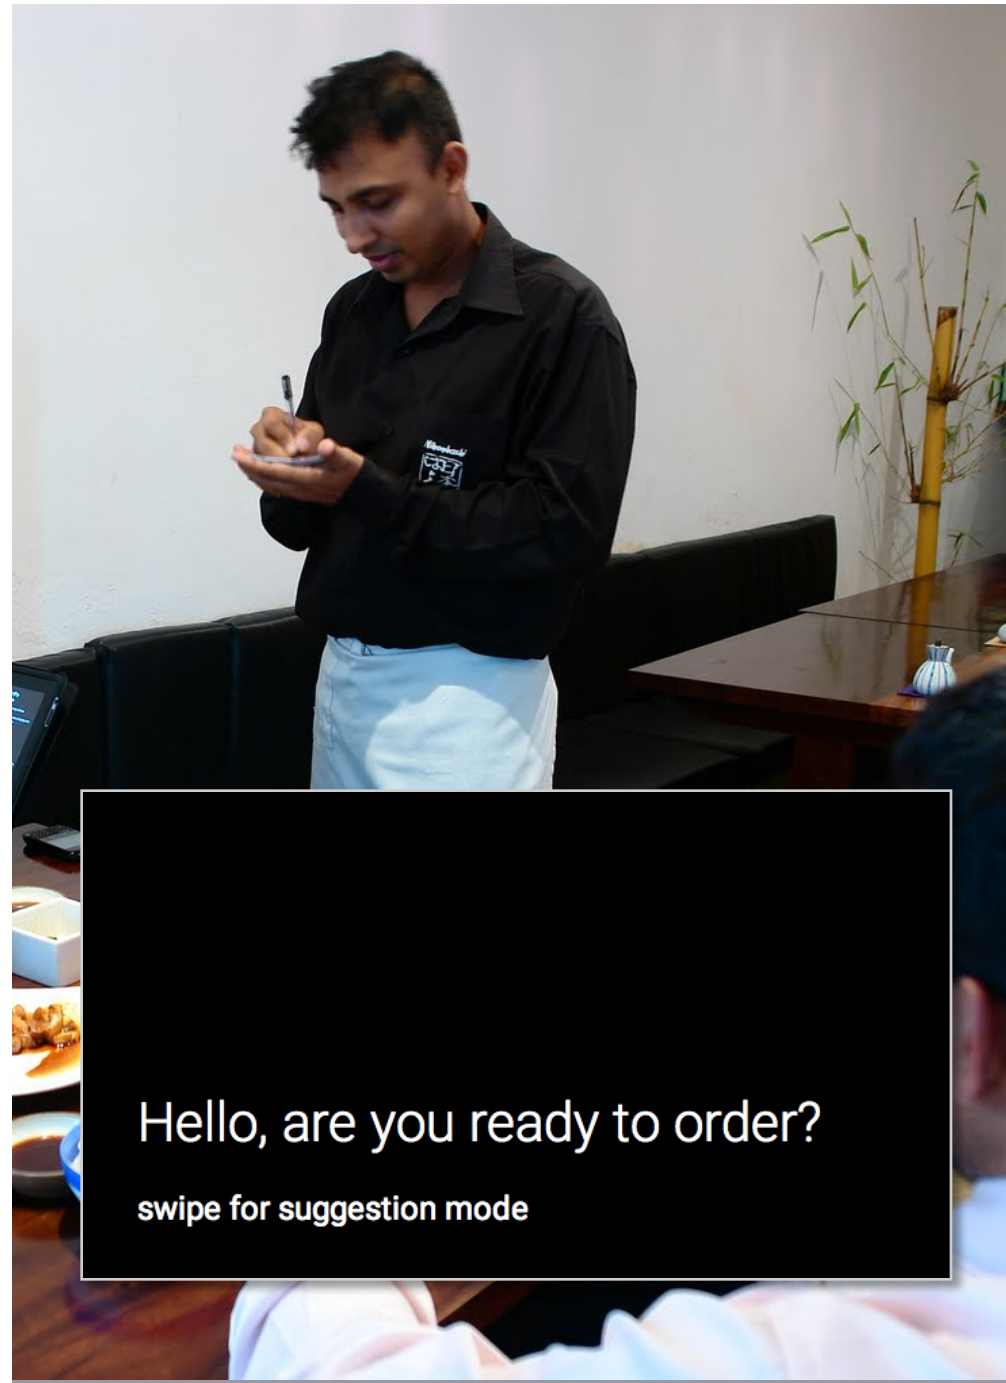

Websites

Our Solution

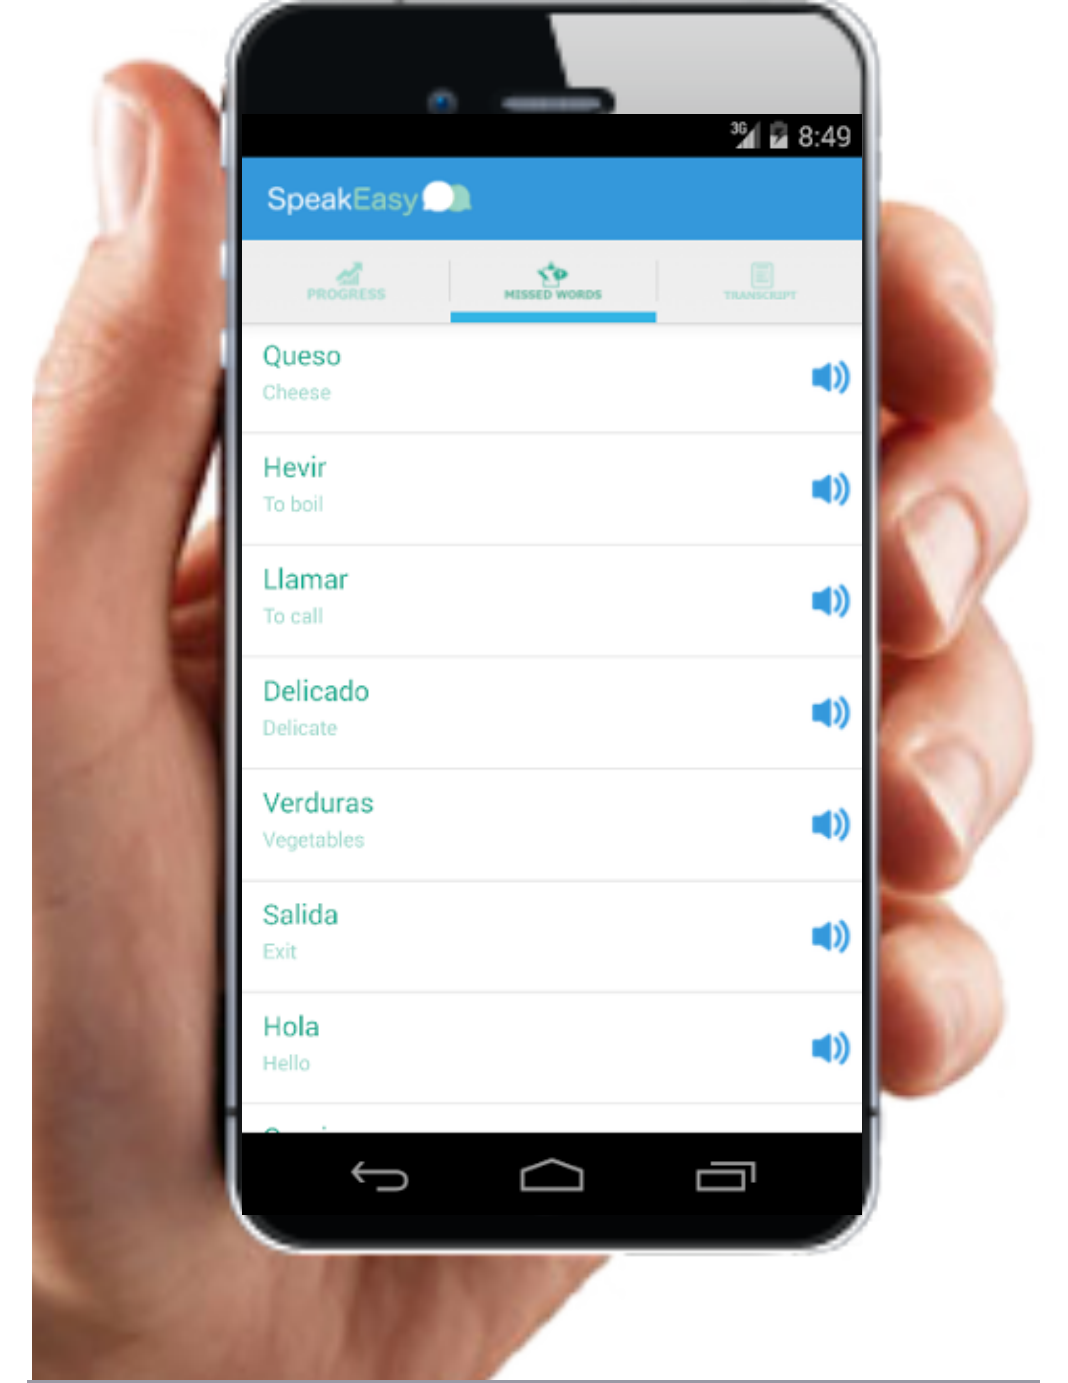

- A Google Glass app to provide contextual support for speaking and listening
- A mobile application to enable users to track and improve speaking skills

Get phrase suggestions based on your context

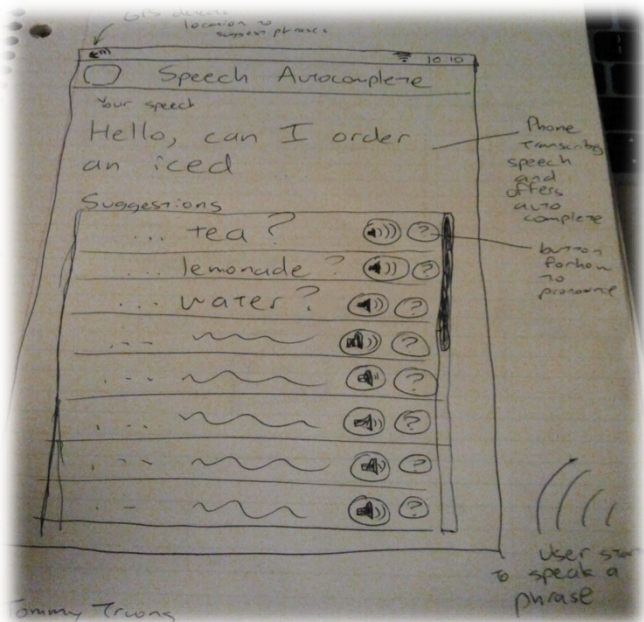

Get translation of another person's speech

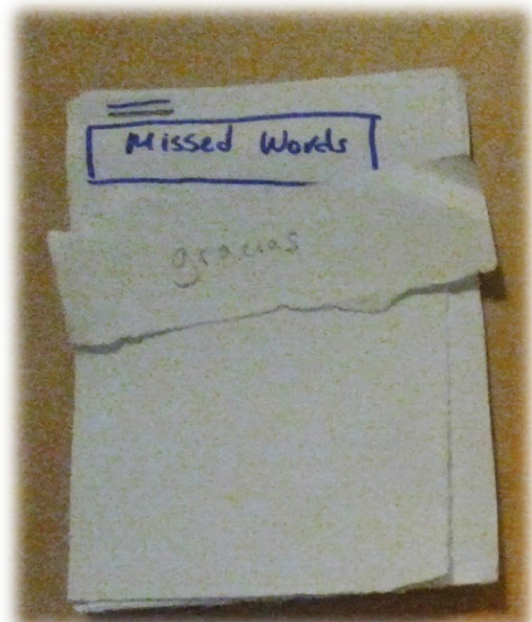

Get feedback on learning progress

Design Iteration

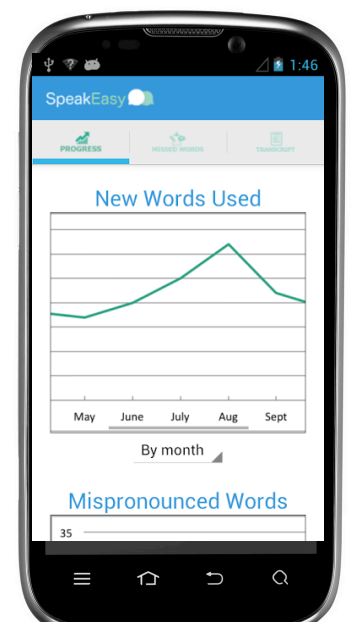

30+ Sketches
