Hi there! This document is meant to be a quick guide to our CS147 project for the Mid-Fi prototype. The prototype is pretty self-explanatory, but there are a few section which we'd like to discuss in a bit more detail.

If you visit our project page at http://stanford.edu/class/cs147/projects/learning/speakup/ you can finds links to our report, prototypes, and this document.

For a list of the Wizard of Oz techniques and limitations of our product, see the following section:
=======================
===== STUDENT UI ======
=======================

LIMITATIONS
Sign up for a class (student task 1):
  * Settings button doesn't do anything
  * Instead of letting you type to search, we automatically fill in CS147
Answer a question (student task 2):
  * Clicking "Go back to answer" should redirect you to the previous page with the selected answer highlighted
Submit feedback on a lecture (student task 3):
  * No major limitations
Ask a question to the instructor (no task number assigned):
  * The question submitted by the student will not be listed in the list of questions
  * Input is not cleared when you return to the ask screen

WIZARD OF OZ TECHNIQUES
GENERAL:
  * Settings button doesn't do anything
Sign up for a class (student task 1):
  * Can't click either of the other two classes (Linguistics 1 and ME 80)
Answer a question (student task 2):
  * The specific question being asked has been hardcoded into the UI
Submit feedback on a lecture (student task 3):
  * No major WoZ
Ask a question to the instructor (no task number assigned):
  * No major WoZ

=======================
===== LECTURER UI =====
=======================
LIMITATIONS
View Feedback on lecture (lecturer task 1):
  * Page is fully static, not driven by any data
  * Axes labels on the graph appear too small
Answer questions from students (lecturer task 2):
  * The resolve button only works for the first question, though the resolve all button works
Pose questions to the students (lecturer task 3):
  * Cannot select any existing questions
  * Add and delete choice buttons do not work
  * Labels used when inputting question text are ignored
  * Can only ask one question to students

```
### WIZARD OF OZ TECHNIQUES ###
GENERAL:
  * Settings button doesn't do anything
  * Can only select CS147, no other classes work
  * Cannot add a lecture
  * Can only select lecture 3
View Feedback on lecture (lecturer task 1):
  * All data is hardcoded into the UI
Answer questions from students (lecturer task 2):
  * All data is hardcoded into the UI
Pose questions to the students (lecturer task 3):
  * All data is hardcoded into the UI
```
