Saving the Day

Heuristic Evaluation Results

1. Trends 2. Landing Page 3. New Post 4. Timing

4 main issues

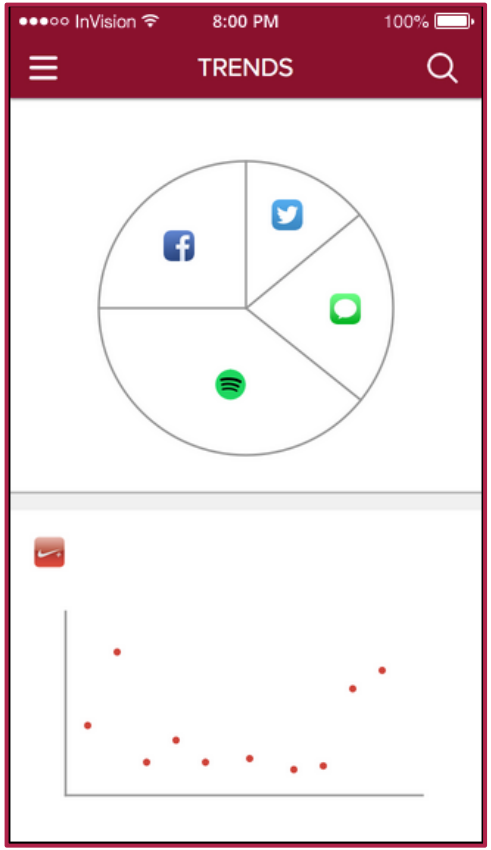
Trends page is not labeled

Graphs have no labels

Not many of them

Add pin button to each trend

Search function necessary?



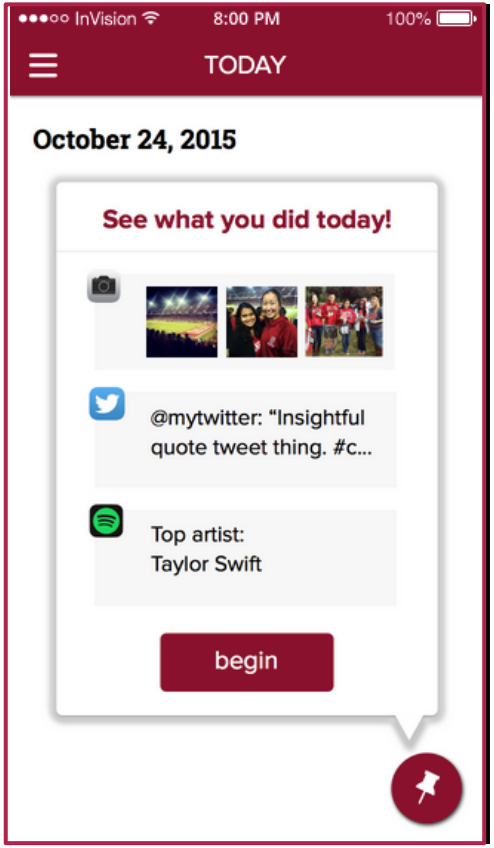
"Begin" is a bad call to action

Stuff is misspelled

Activities displays are inconsistent

Pin button

Activities display is un-editable



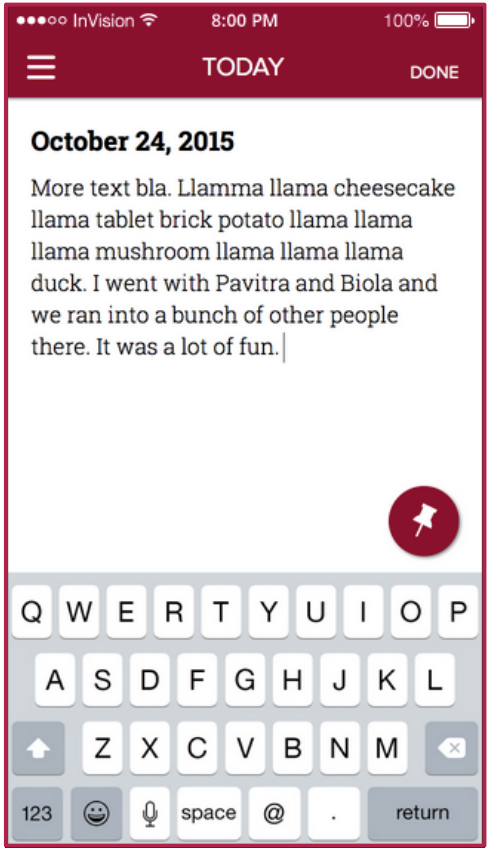
Done button?

Re-edit a new post

Is the content saved?

Pin button while typing

Consistency between dates

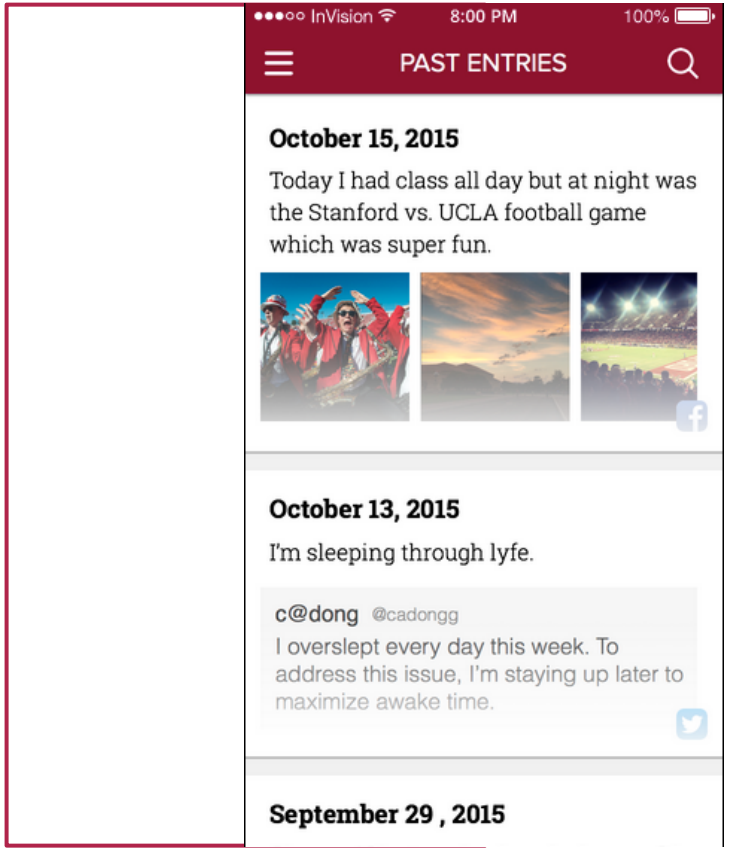


Auto-posting

When does a new “day” start?

Editing old posts

How does Trends respond



Overview of Revised Design

Important changes

Call to action

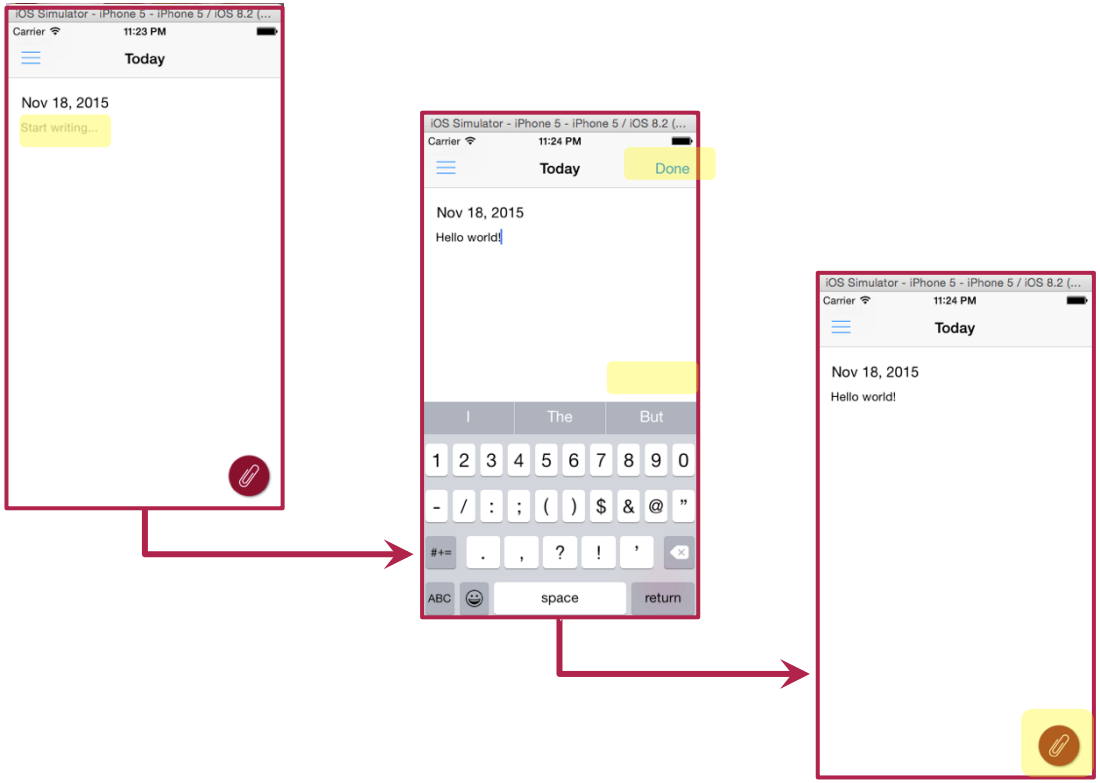
Done button

NO “save” button

No pin button

pin → paper clip

dynamic content



Prototype Implementation Status

tools

Sketch: static assets

Xcode: build the app (iOS)

Swift: Language choice

Implemented features

Task 1: writing in blank entry

Writing persists/entries saved

Dynamically updated dates

Navigation between screens w/ sandwich menu

Basic scroll view for pinning activities and past entries

Unimplemented features

Task 2: Pinning activities
Task 3: Looking back

Plan:

Thanksgiving break!

Wizard of Oz Techniques

Assume user has already used app many times
(so that old content already exists)

Hard-coded data

Previous entries
Trends

Issues/questions

Not sure how to import from other apps…

Demo

Summary

Task 1 implemented

Tasks 2 and 3... Thanksgiving break

Trends still needs a lot of work

Make users feel comfortable (finishing/saving entries, understandable navigation)

Entries (timing, looking back, re-editing)
