# *Saving the Day*

*Tasks*

# Tasks

**Write**

Simple Task

**Review**

Medium Task

**Reflect**

Hard Task

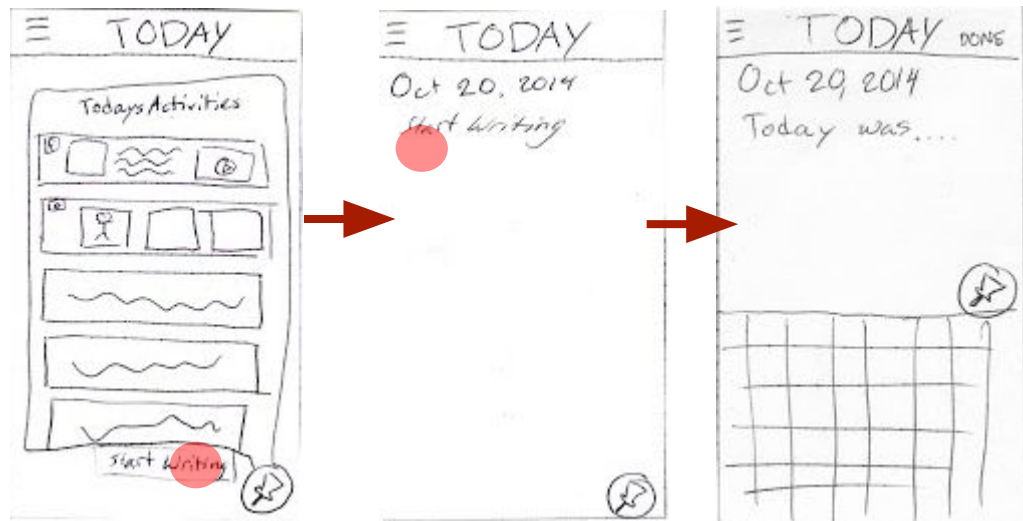

*Design Changes*

# Considerations

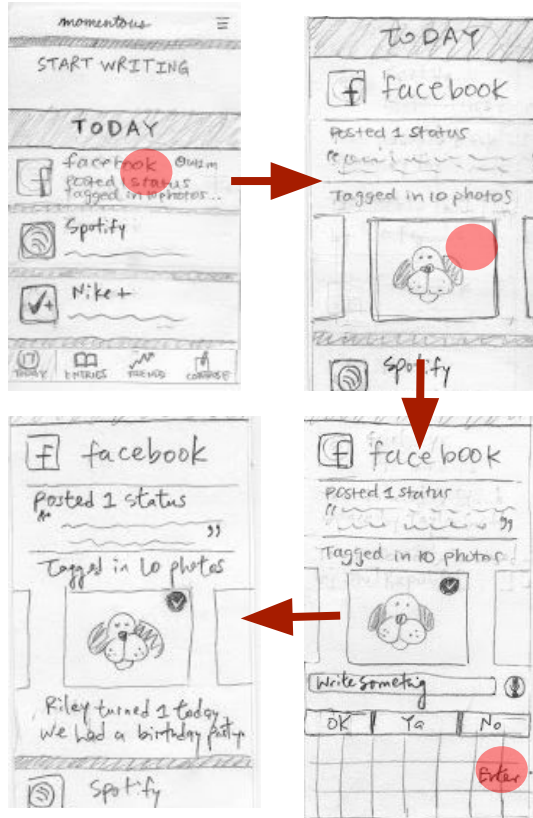

- Remove redundancy between the “**start writing**” and “**compose**” features
- Create a clear **home screen**
- Give users a clear **call to action** from the default view
- Give users a way to **pin trends** to entry
- Remove confusion between “**today**” and “**entries**” tabs

# Compose

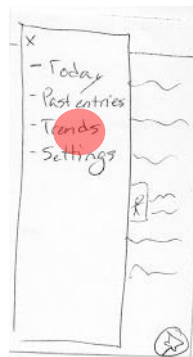

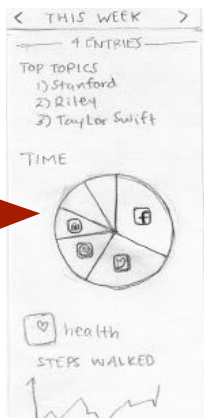

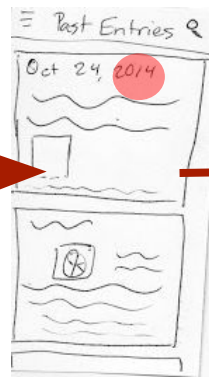

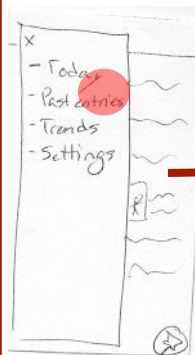

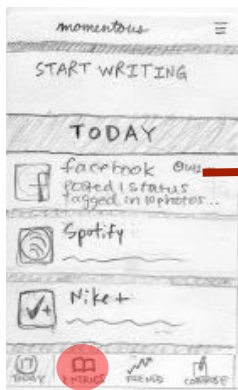

# Pin Activity

# Reflect

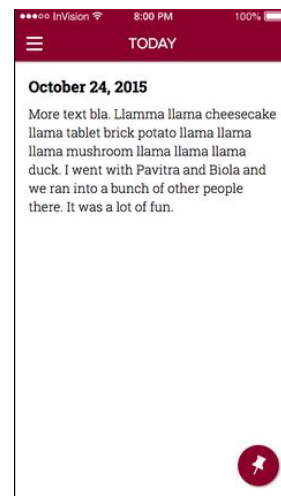

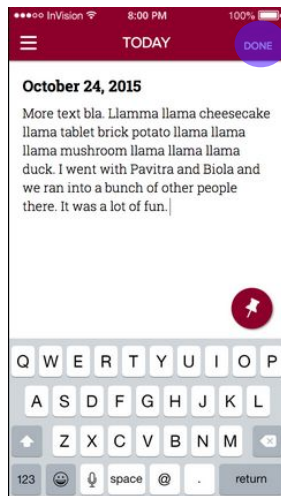

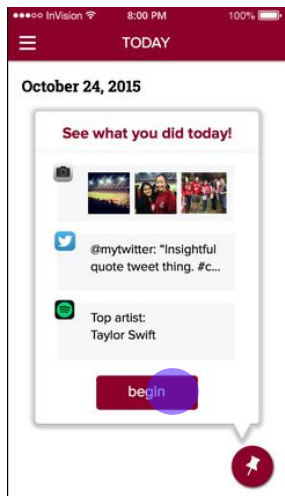

# Changelog

- **Replace tabs** with sandwich
- Home screen is **plain text with pin icon**
- First time pop-up on today's entry to **highlight activity**
- Scroll view of activities expands to **card view**
- **Rename** sandwich items: "today", "past entries", "trends", "settings"
- Allow users to **pin insights** to their entry, not just activities
- Allow users to **search** when reflecting on past entries

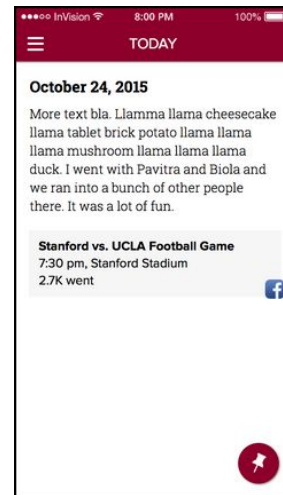

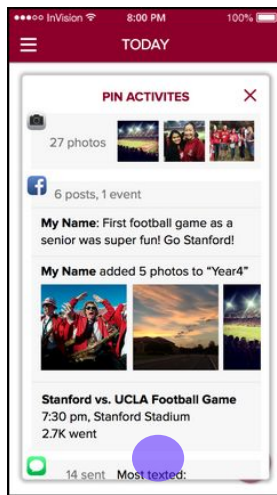

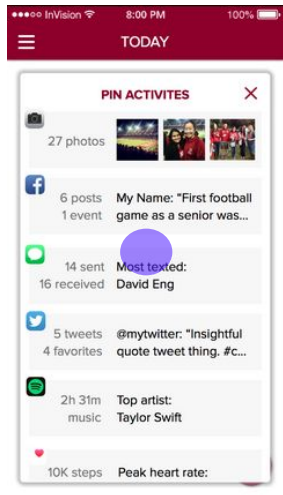

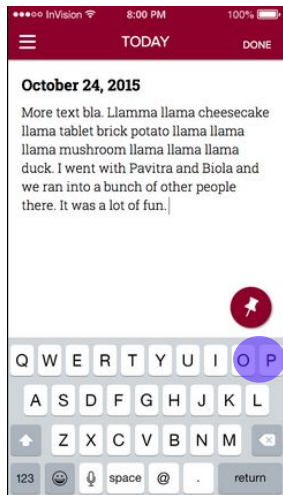

*Medium-Fi  
Task Flows*

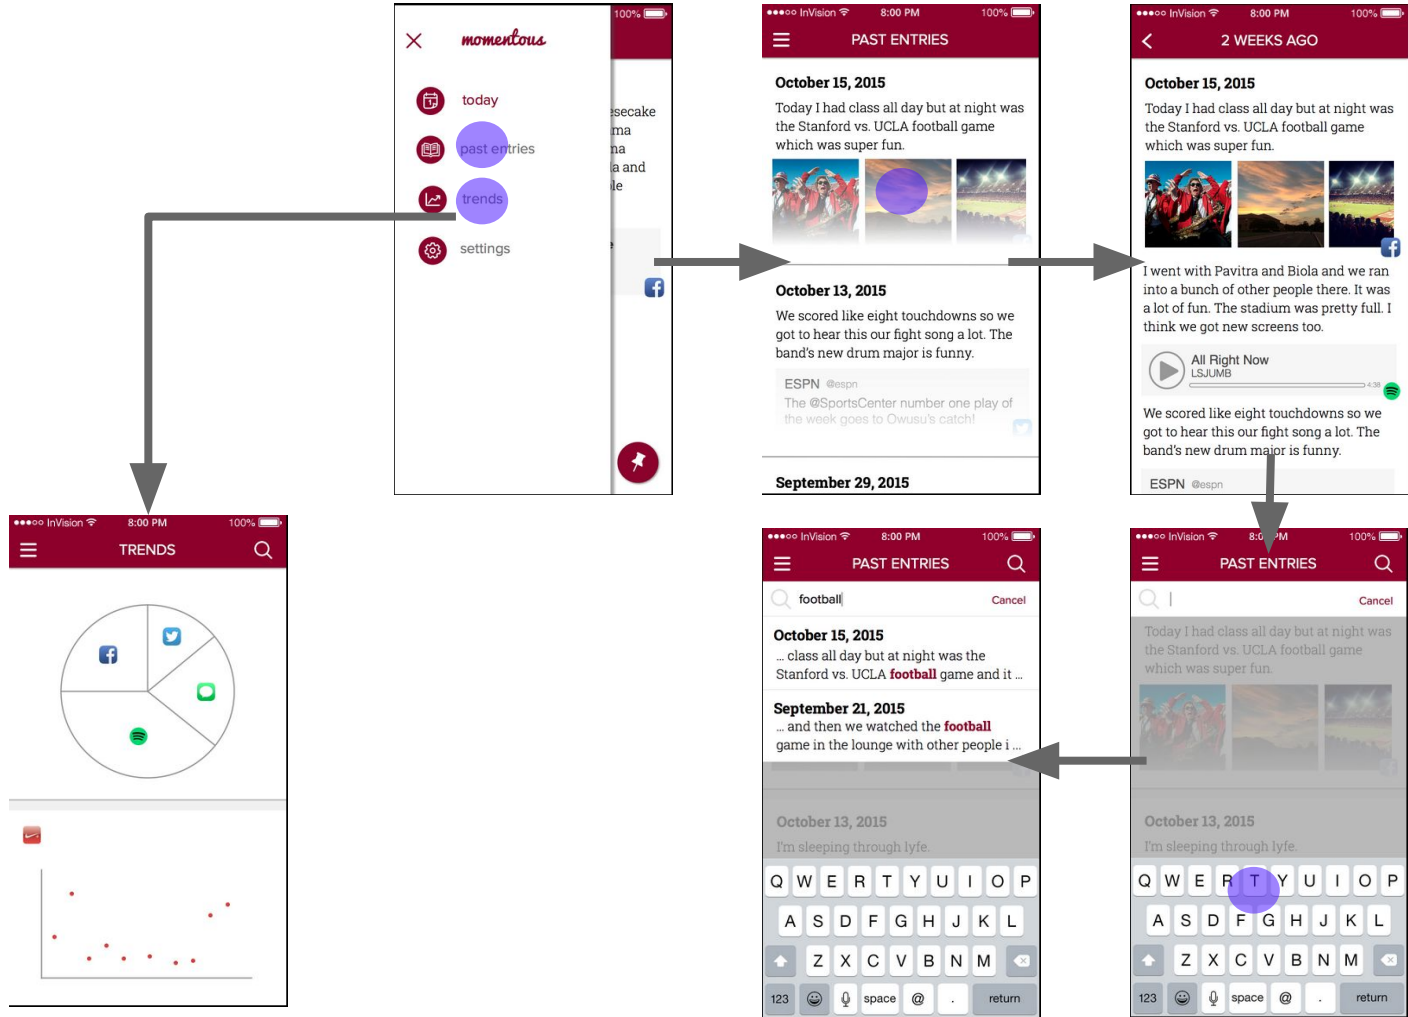

# Compose

# Pin Activity

# Reflect

*Prototype  
Overview*

# Prototyping Tools

## Sketch

- Ease of view creation
- Intuitive interface
- Difficult for collaboration

## Invision

- Multiple transitions options
- Sync to phone
- Inability to scroll on overlay
- No dynamic input capabilities

# *Limitations and Wizard of Oz techniques*

- **Hardcoded data** for all content, trends, and search results
- Not much **seed data**

*Appendix*
