Domain: Information Consumption

HOW DO YOU CONSUME?

POVs And Experience prototypes

Andrew, Nimit, Peter, Stephen

**Something we said last
Friday...?**

Our Initial POV

WE MET Andrew..

and we were surprised to realize that... he needed socially agreed upon, expert endorsed information from a variety of constant sources.

It would be game changing to...

Deliver him socially agreed upon and expert endorsed information all in one place.

Additional Needfinding

New recruit: Jason

- ▶ Jason is an **expert** in securities litigation (**an extreme user**)
- ▶ He **only** reads content relevant to his work
- ▶ He almost **exclusively** googles his questions
- ▶ When google fails he turns to **experts** he finds in forums or in person

What we got from Jason

- ▶ Experts find it difficult to find new information
- ▶ Experts (aka busy people) don't have time to find new interests
- ▶ Busy people don't spend a lot of time reading the news
- ▶ Experts consume a large amount of info on a focused topic

New recruit: Apoorv

- ▶ Apoorv is a ***visually impaired*** student at the GSB
- ▶ He ***listens*** to all of his content
- ▶ He finds himself ***frequently googling*** tangential questions ***after reading an article***
- ▶ He also finds this to take ***a lot of effort and time***

What we got from Apoorv

- ▶ people want **quick, holistic** views of news
- ▶ After reading article's it is common to do **further research** into a topic with google
- ▶ This can be time consuming.

Discovering POVs

**WE MET
Jason
(securities
litigation
expert)**

Who Needs

a large source of
information
regarding a very
narrow topic

Because

he has a singular
interest in a topic
he is an expert in

**It would be game
changing to
expand his
horizons -
introduce him to
content that he
wouldn't normally
come across *but
still interests him***

WE MET
Apoorv
(deep
diver)

Who Needs
to the point
summaries of big
pictures

Because
piecing together
all the details and
background is
time consuming.

It would be game
changing to
put all the details
right in front of
him

**WE MET
Andrew
jr.
(revised)**

Who Needs
information that is
short, concise,
and endorsed as
credible

Because
he's picky,
knowledgeable,
and
“social proof is
BIG”

**It would be game
changing to**
help him more
easily **see** what
content is **socially
endorsed** and take
out the **fluff**

**WE MET
Priyanka
(beauty
obsessed
pinterest
user)**

Who Needs

curated beautiful
information that is
easy to obtain and
credible

Because

there's a lot of
crap on the
internet

**It would be game
changing to
feed her credible
information in *a
beautiful way* that
was *free of crap***

Top HMWs

Jason

How might we...

Make all info
relevant to
his expertise

Broaden his
interests

Use what he
already knows to
curate deeper
content

Apoorv

How might we...

Do away
with search

Make the
big picture
smaller

Give relevant
context around
what he is
reading

Andrew Jr.

How might we...

Connect
him to
experts

Make
social proof
visible

Weight
endorsements
by person

Priyanka

How might we...

Make
credibility
visible

Incentivise
her to read
ugly
information

Use her picture
preferences to
give her “better”
content

Experience Prototypes

Anti-Personalized Homepage

Assumption: that users would be interested in discovering novel content

A screenshot of a web browser displaying a homepage. The browser's address bar shows a search engine. The page has a white background. At the top right, there is a link that says "Next Article >>". The main content area features the word "Curio" in a large, black, serif font. Below the title is a large black and white photograph of a band performing on stage. To the right of this main image is a vertical column of three smaller, square images: the top one shows a person in a red shirt, the middle one shows two people's faces, and the bottom one shows a man's face. Below these images is a quote in black text: "Kreuger said club owners demanded gigs of up to eight or more hours a night, every night."

(APH) Breakdown

Tested:

By holding pages over a computer screen

Results:

- ▶ Taylor found the article interesting, liked that it was different
- ▶ But was confused by what text and pictures did if clicked

Valid

Assumption?

We think so.

- ▶ Taylor appreciated the novelty of the content
- ▶ He also liked that he didn't have to put time into discovering it.

New assumption:

Users value information more if it's shared by a close friend

Expert Leaderboard

Assumption: People would like a way to “see” credibility

Leaders on.... Squirrels

①	Jim Nantucket	+1,653 Feed
②	Squirrel Joe	+1,234 Feed
③	Jennifer Ardilla	+977 Feed
④	Susie Acorns	+738 Feed
⑤	Greg Furrytail	+655 Feed
⑥	Samantha Oaktree	+621 Feed
⑦	Taylor Seaton	+543 Feed
⑧	SōngShū Dādōng	+299 Feed
⑨	Drew Sciattolo	+17 Feed
⑩	Ryan Greengrass Sheppard	+8 Feed

Squirrel Joe

Squirrel!

Ammmmm!

Query:
Are Squirrels taking over the world?

Squirrels Global

Query:
What kind of parks do Squirrels like best?

.....

Leader- board Breakdown

Tested:

By holding pages over a computer screen

Results:

- ▶ Anthony questioned the authority of our “experts”
- ▶ he liked it’s similarity to google search
- ▶ He liked articles displayed by queries

Valid

assumption?

We think so.

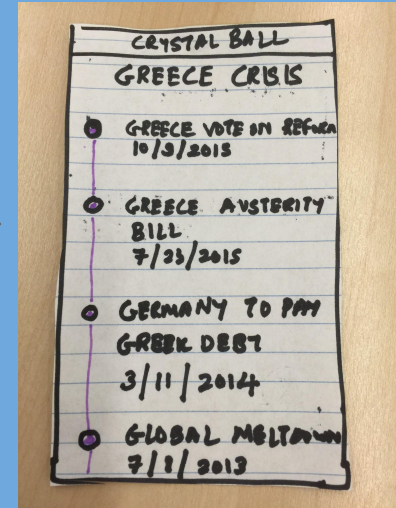

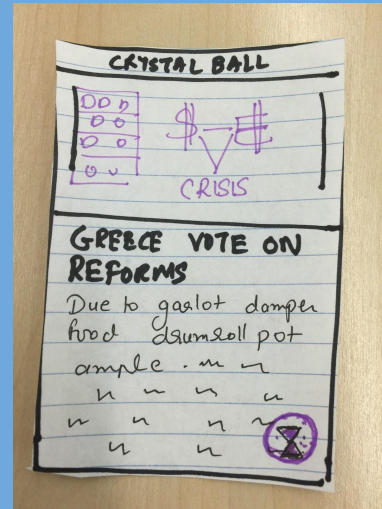

- ▶ Users **do** seem interested in seeing what experts are reading
- ▶ however, proving people are experts is tricky

New assumption:

Social proof alone may not be enough to validate people as *experts*

Time machine button

Assumption: people generally want more information on a topic after reading an article

Time Machine Breakdown

Tested:

By holding cutouts like a mobile screen

New assumption:

Users value information more if it's shared by a close friend

Results:

- ▶ The user liked the simplistic design of the button
- ▶ was amazed to see a whole timeline of news
- ▶ found the idea powerful, useful

Valid assumption?

We think so.

- ▶ the user claimed to frequently do further research after reading an article
- ▶ he said such a service would save him a lot of time.

Best prototype?

**:Time Machine
Button**

THANKS!

Any questions?

Our Initial POV

- ▶ Here you have a list of items
- ▶ And some text
- ▶ But remember not to overload your slides with content

You audience will listen to you or read the content, but won't do both.

THANKS!

Any questions?
