“Bringing ideas to life”

Assignment 8: Midway Hi-fi

Irene Hsu, Ke Xu, Jessica Zhang

Problem

For people from all walks of life, the bustle of everyday leaves little time and energy for personal side projects.

Solution

docket is a public platform that documents project-related ideas throughout the day and allows users to support one another's projects for inspiration and motivation. Through documentation and social interaction, **docket** aims to build momentum for personal projects.

Overview of Talk

- Heuristic Evaluation Results & Design Revisions

 - General

 - Task 1, 2, 3

- Implementation

 - Tools

 - Completed & Ongoing

 - Wizard-of-Oz & Hard-coded Data

- Demonstration

HE Results & Design Revisions

General

- misleading icons/sections [H2-2 Aesthetic] [H2-8 Match]
 - “Explore” & “Following” icons: misleading
 - “Projects” → “My Projects”
- better metaphors [H2-8 Match]
 - “Stages” → “Sections”
 - “Quicknotes” → “Notes”
- unaddressed:** branding [H2-6 Recognition]

HE Results & Design Revisions

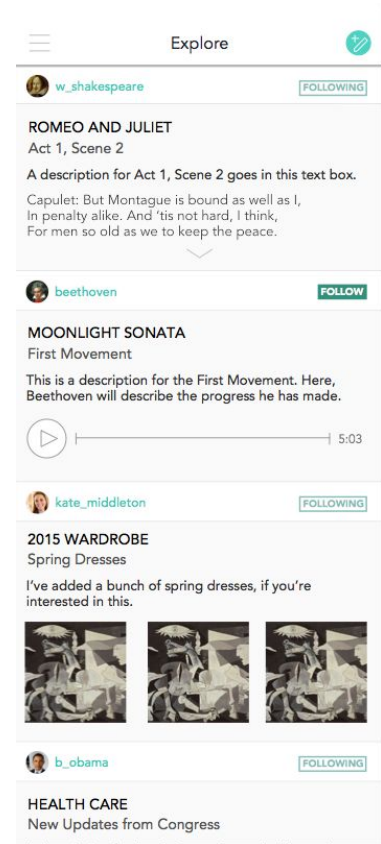

Task 1: Follow Inspiring Projects

-feed: visually overwhelming

[H2-2 Aesthetic]

confusing sectioning of project updates
black text on white background

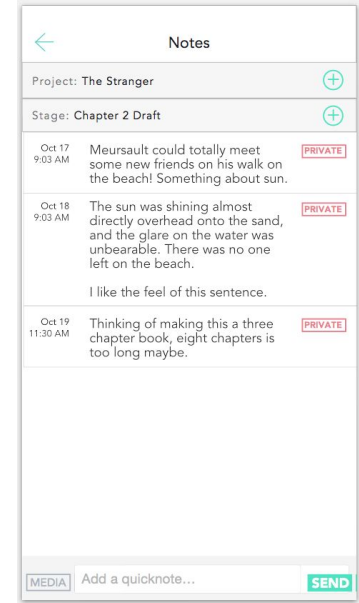

-**unaddressed**: subscribing to other users

HE Results & Design Revisions

Task 2: Add a Public Note

- issues w/ managing notes [H2-3 Control] [H2-1 Visibility]
 - organizing into stages, deleting
 - showing status of note
 - (public, private, stage, etc.)
- redesign into message format
- select stages from another window
- add delete features (slide out)

HE Results & Design Revisions

Task 3: Look through project page

- visual design [H2-8 Aesthetic]

 - cluttered notes

 - black text on white background → off-gray

- related:**

 - add project list page [H2-7 Flexibility]

 - add “complete” feature [H2-7 Flexibility]

Implementation: Tools

-iOS

on-the-go momentum

-XCode (Swift)

collaborate

resource to learn

Implementation: Completed

Task 3: Look through project page

- project page

 - clickable

 - hard-coded content

- "My Projects"

Implementation: Ongoing

-Task 1: Follow Inspiring Projects

create feed

-Task 2: Add a Public Note

create page

link to update with project page

Implementation: Wizard-of-Oz

—

-none

Implementation: Hard-coded Data

- preloaded user
- feed pre-loaded with project updates
- pre-loaded notes
 - can add project section
 - can add notes
- pre-loaded project sections & updates

Implementation: Questions

-Is it possible to use two platforms to implement the app and merge them together? (Meteor & swift)

Demonstration

Task 3: Look through project

Summary

-**completed:** Task 3 is completed!

-**uncompleted:** Task 1 & 2

-design changes

metaphors & labels

text on background

organized “Notes”
