

## **Compass - Medium-Fi Prototype README**

Charlotte C., Joseph G., Michael P., Katie-Rose S.

### *Operating Instructions*

Click the “Prototype” button on our website under “Assignment #6 - Medium-Fi Prototype” to follow the link to our medium-fi prototype. You will be redirected to the InVision website, which is hosting our medium-fi prototype. From here, you will be started at the home screen. Feel free to click any buttons you like to follow the different paths of the website. If at any time you would like to return to the home screen, please click on the “Compass” logo in the upper-left corner of the screen. If you would like to return to the base screen of the path that you have taken on the site (e.g. clarify, connect, support), then click on that text in the upper-right corner of the screen.

### *Limitations*

At the moment, our questionnaire that we use to connect users with a resource via the connect page does not truly work. First, we just have an image of the questionnaire and it can't be filled out within the medium-fi prototype. We also haven't yet determined the best resources based on a user's response, so we just direct them to the CAPS page from the questionnaire. Eventually, users will be able to fill out this questionnaire, submit their responses, and be recommended an appropriate resource.

Additionally, on our support page, we do not correctly provide the Bridge chat feature that we hope to have in our final product. We show the capability to chat with the Bridge on the support page, but we do not actually have the capability to chat with a peer from the Bridge at the moment.

Due to strange formatting issues, the pages of our medium-fi prototype are slightly bigger than the normal computer screen page, so you will need to scroll up and down and left and right to be able to see the entire page.
