Compass Hi-Fi Prototype

Charlotte Camacho, Katie-Rose Skelly, Joseph Getz, Michael Peterson

Our hi-fi prototype is a website, reachable at the url <http://stanfordcompass.weebly.com/>. By navigating to this page in our browser, you should be able to access everything you need. There are no additional operating instructions or downloads necessary.

The only limitation of our hi-fi prototype involves the chat system. We were not able to setup a 24/7 chat with The Bridge Peer Counseling Center like we had hoped, so we hard coded this chat feature. You currently cannot type anything into the chat box and cannot send any messages to The Bridge. You are also not able to receive any messages from The Bridge. Thus, the page for the chat stands just as a placeholder to represent the functionality that would be there if The Bridge had agreed to provide this capability. This chat page is accessible through the connect page by clicking the “Chat with The Bridge” button on the bottom right of the connect page.
