# Concept Sketch 1: iPhone

Selected Interface & Rationale

- "On-the-go" notifications

- Accessibility

- Simpler functionality/layout

Low-fi Prototype Structure

Tasks

Teacher
- **Create an assignment**
- Create a reward
- Check which students have completed homework/earned reward

Student
- **Mark task complete**
- Check new/complete tasks
- Change reward option

Parent
- Check tasks
- **Check student's progress towards reward**
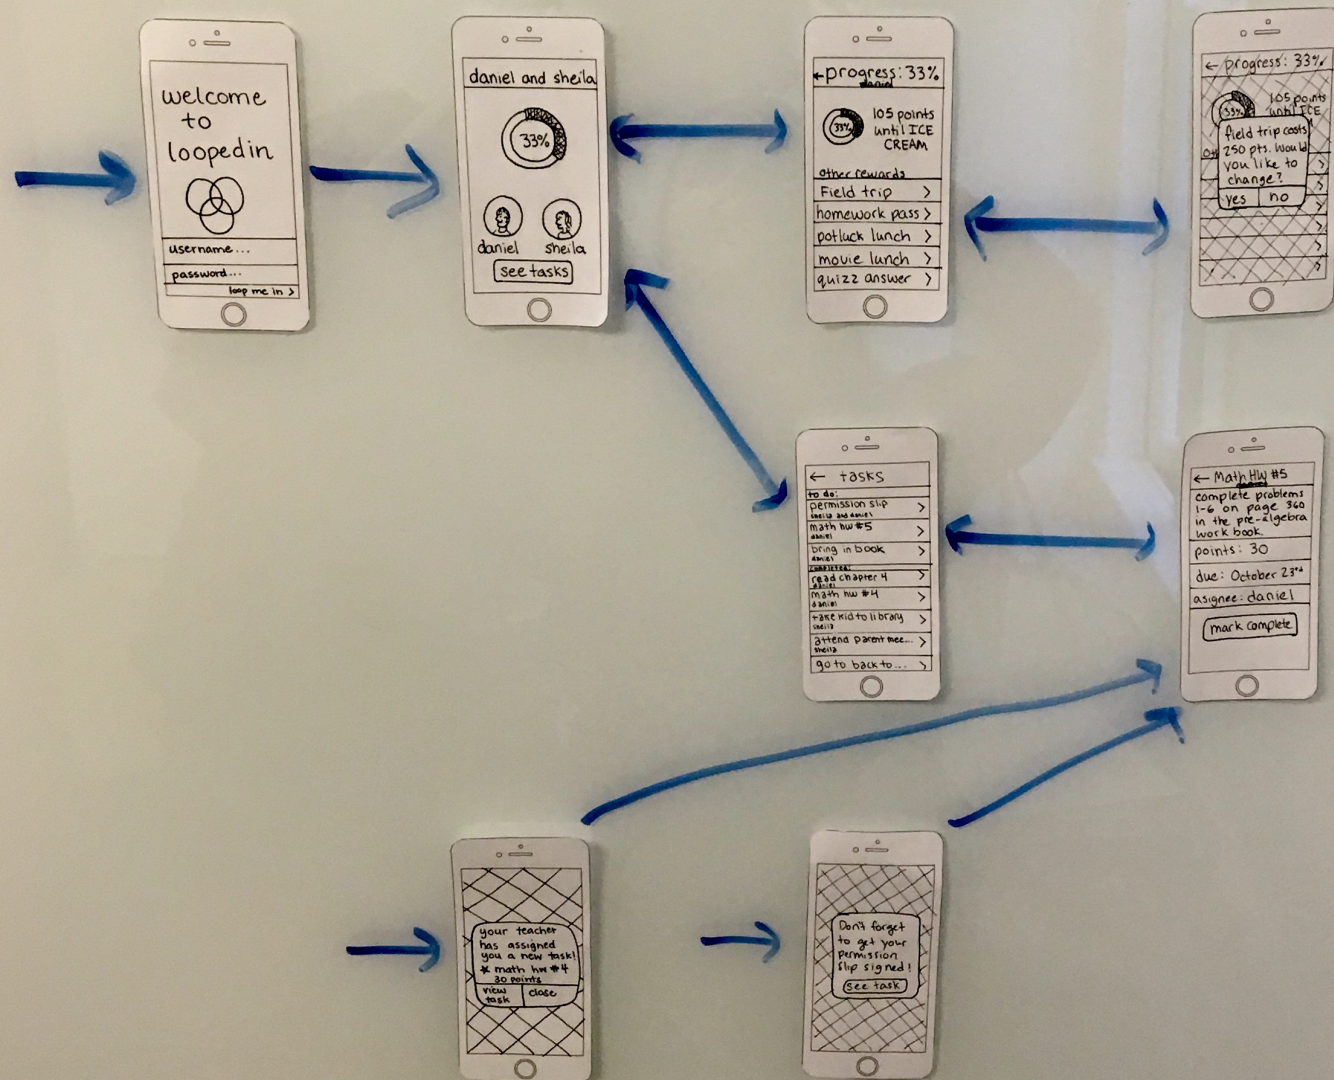

# Teacher Task: create task

Student Task: mark complete

Parent Task: check progress

Experimental Method
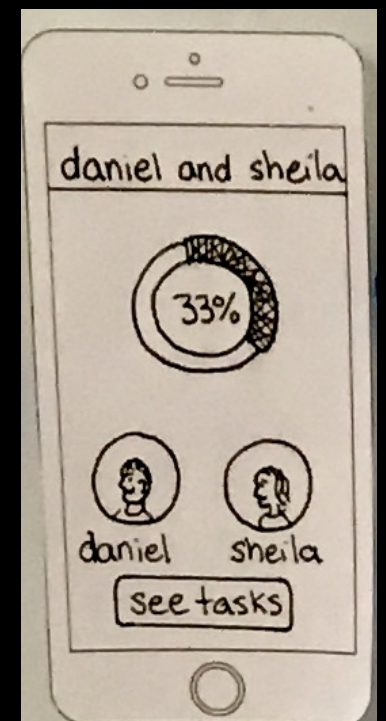

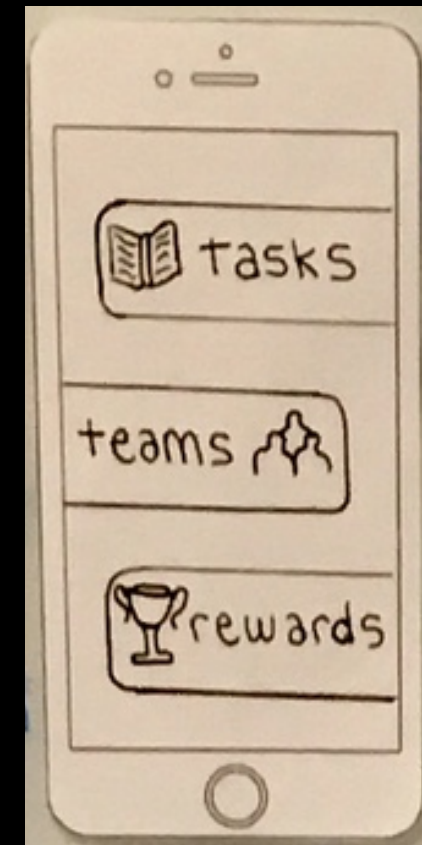

Experimental Results

Teacher

- Trouble checking to see if Daniel had completed homework

- Confused by student/parent teams

Student

- Wanted to click profile pictures
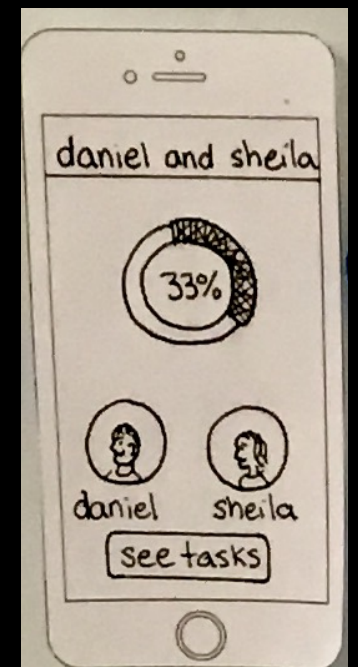

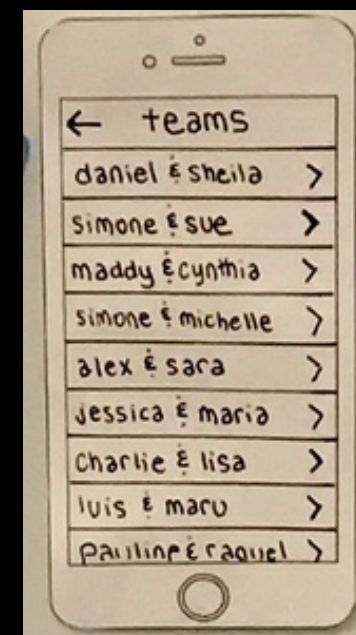

- Uncertain about progress bar

Parent

- Tried clicking Daniel's picture

- Concern about student marking tasks complete

Suggested UI Changes

- Separate role of students and parents

- Better visualize progress in real time

- Profile pictures

- Teacher verification of task completion

- Sign up

- Display students who've completed task on task page

Moving Forward
