

Instructions for testing our app

Please test it on an iPhone 6 if possible—while we used constraints to try to get it to work on different screen sizes, we didn't have time to fully test other screen sizes so we are sure it will work best on an iPhone 6.

We've also set up some accounts for you to log in to and play with and perform the tasks with. Since there are 3 different account types (students, parents, and teachers) we provide some of each:

Student: Eric

Email/username: **eric@gmail.com**

Password: 1234

Parent: Amy

Email/username: **amy@gmail.com**

Password: 1234

Teacher: George (History Teacher)

Email/username: **george@gmail.com**

Password: 1234

Also note that there are some bugs with "claiming a reward" (once you have enough points for a reward, you can claim it) on the back end – but the interaction works just fine.

You will see that Eric is in another class as well, and we've set up some other students so that the teachers don't have just one student. If you would like any of those log ins, let us know!
