VALUE PROPOSITION

HealthMap

*Stay **confident** and **accountable** about your health before getting in a car.*

OVERVIEW

At one point or another, everyone has been a bit too tired, ill, or under the influence to drive. Though it may seem easier to just get in the car and drive, those actions can have negative consequences for you and your fellow drivers. HealthMap is an intuitive and easy health verifier that tests your motor skills, *helping you make a more informed decision before hitting the road (or not)*.

TASKS

1. I want to know if I am fit enough to drive (complex)
2. I want to know how to be a safer driver (simple)
3. I want to get help when I need help (medium)

Revised Interface Design

# REVISION #1

REVISION #2

TASK #1

Vision

Select the character you saw:

Hearing

Hearing Test

Play frequency 1

Tap on the screen when you hear the sound.

Reflex

Reflex Test

Pop the balloons as they appear on the screen!
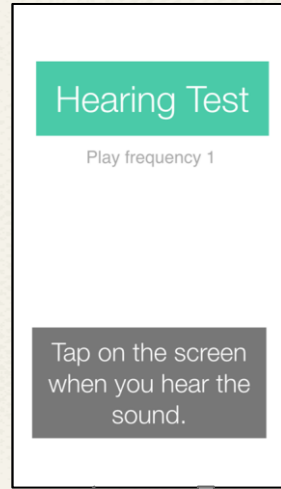

Stress

Stress Test

Please press your index finger against the back camera
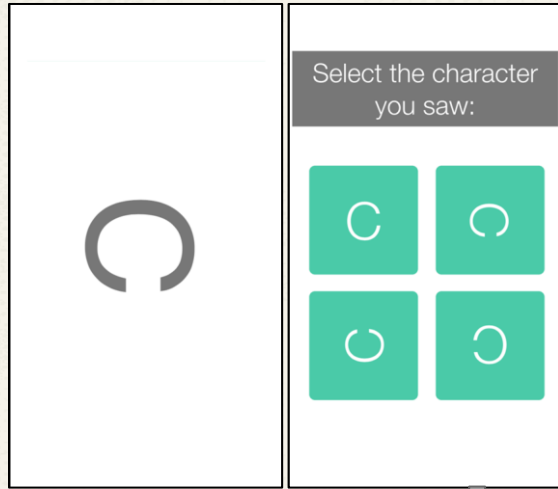

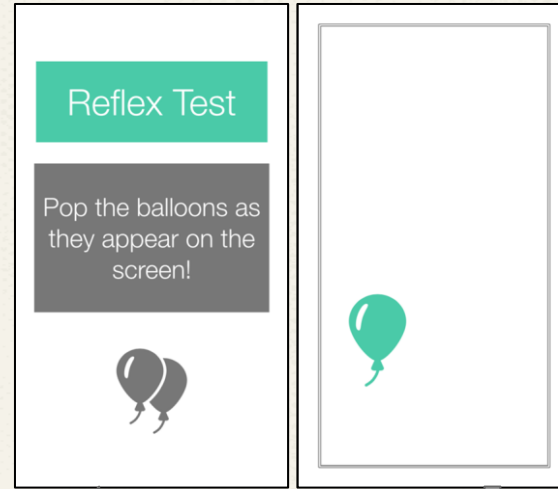

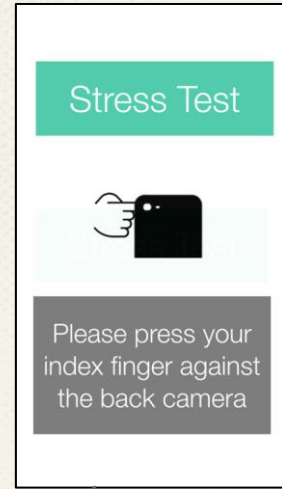

If passed

If passed

If passed

"I want to know if I am fit enough to drive"

TASK #2

Inconsistent results in vision →

*"I want to know how to be a safer driver"*

TASK #3
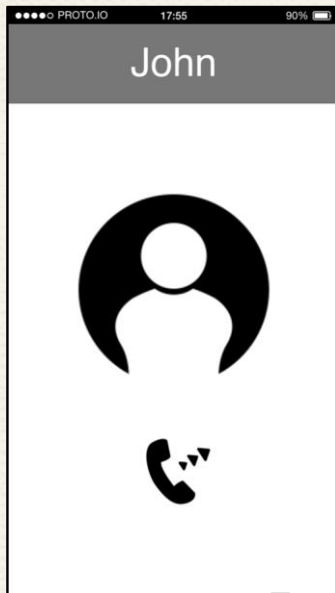

Contact accepts call

"I want to get help when I need help"

Prototyping Overview

PROTOTYPING TOOL

○ **Proto.IO**

☺ Sketch and add transitions in one tool

☹ Multiple editors not supported
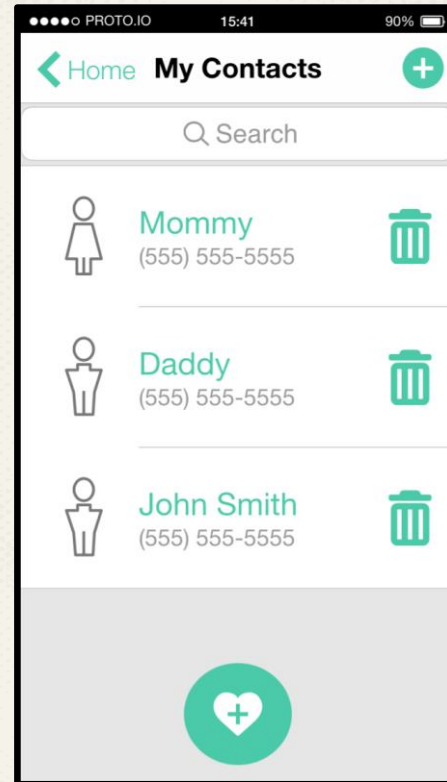

WOZ Techniques

○ Heart rate measurements

Hard-Coded Features

○ Test history
○ Address contacts
○ Location sharing

THANKS!
