

# HealthMap

Stay confident and accountable about your health before getting behind the wheel.

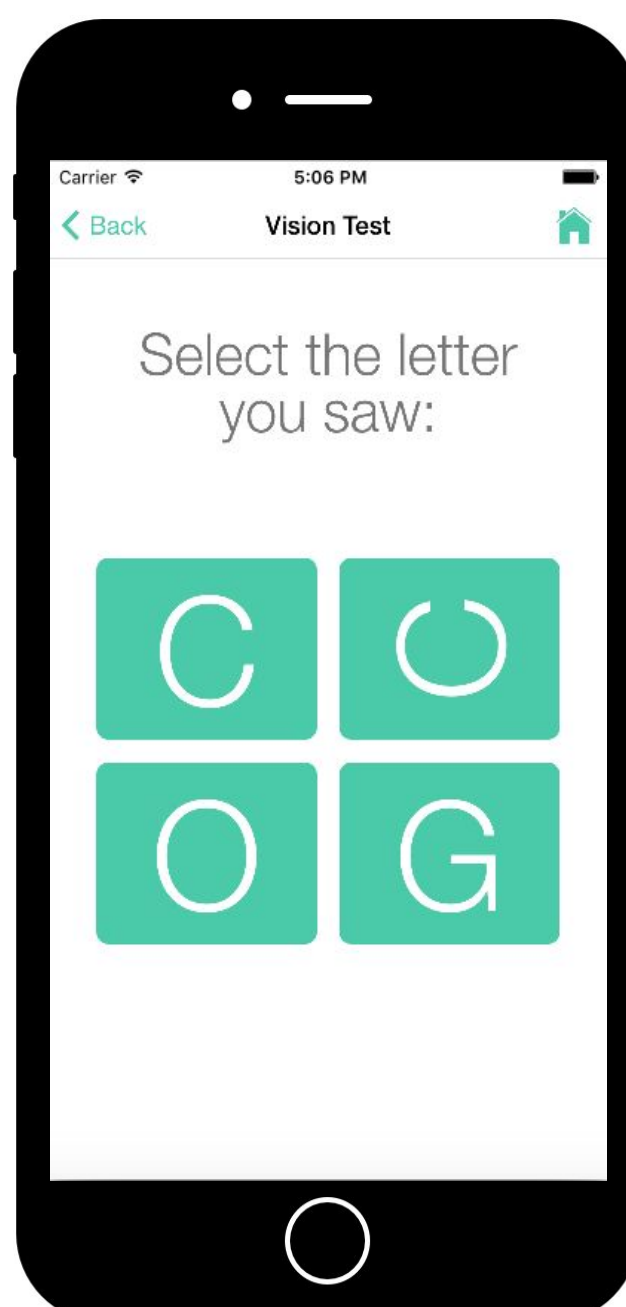

## Overview

Drowsy driving, DUIs, and other medical-related impairments create an unsafe driving environment.

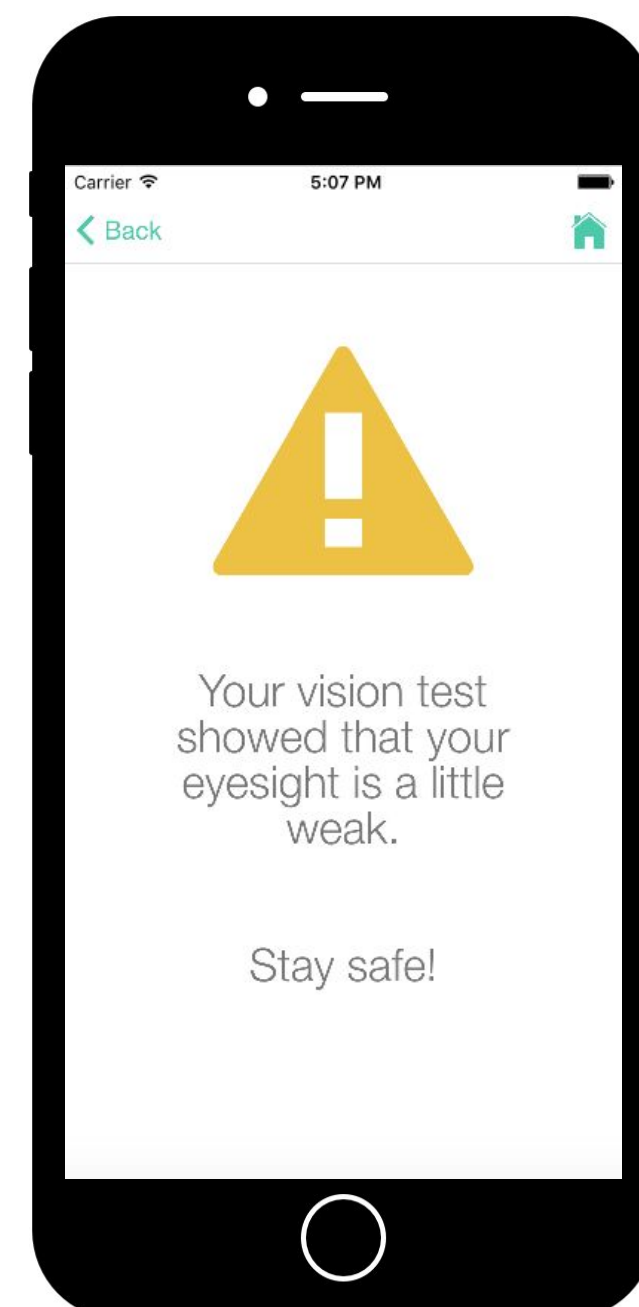

HealthMap assesses your motor skills to help you decide whether you're fit to drive.

## Our Solution

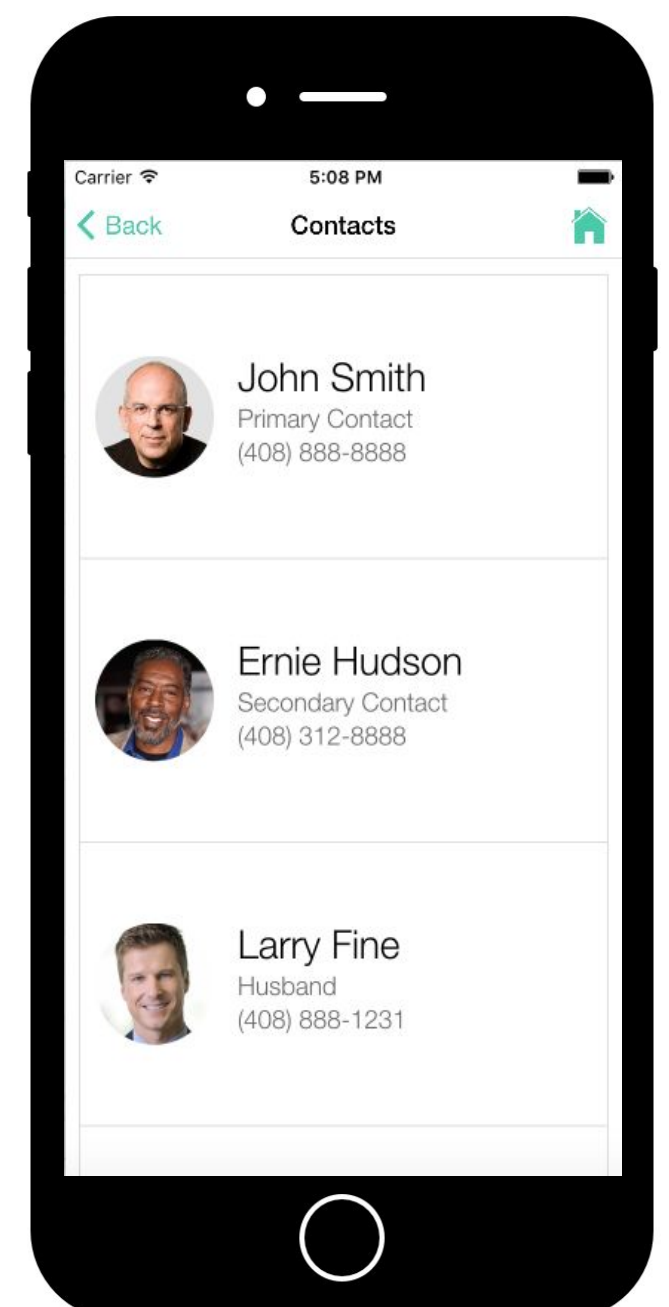

- Vision, hearing, reflex, heart rate measurements from existing phone hardware
- Issue warning for borderline results
- Phone-a-friend feature for immediate assistance

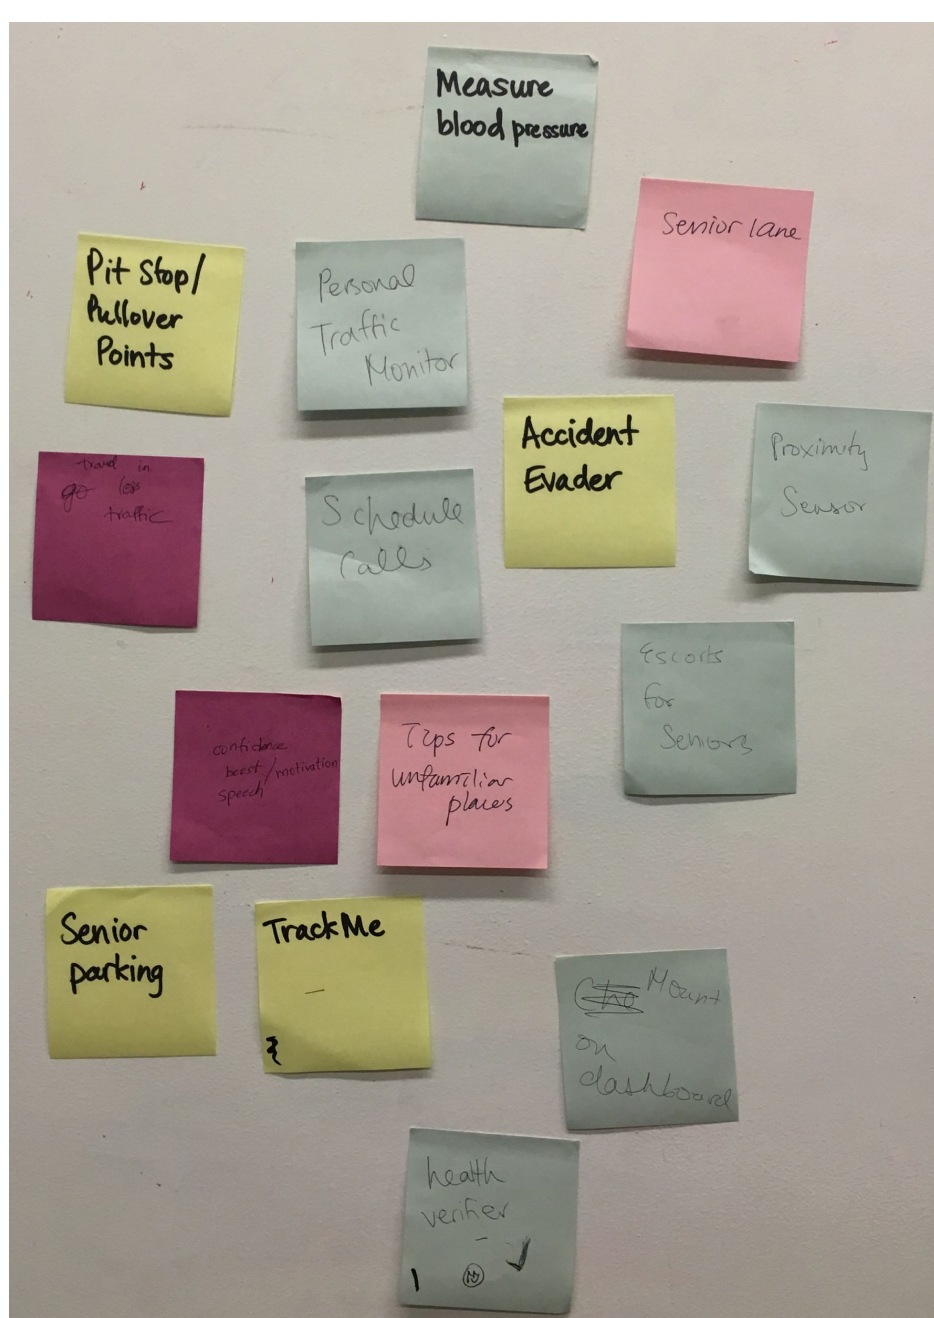

Evaluate your health with simple tests

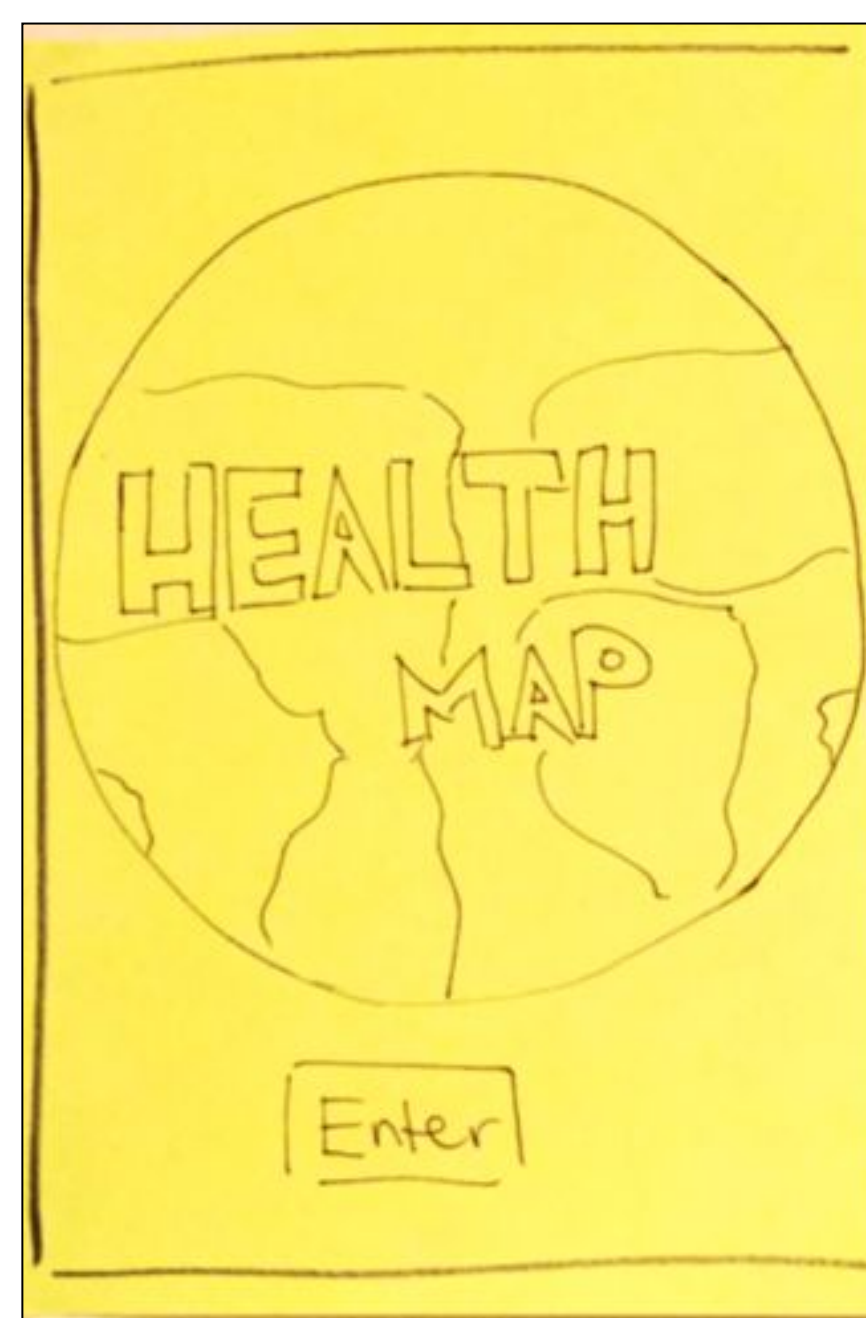

Identify warning signs that may affect your driving

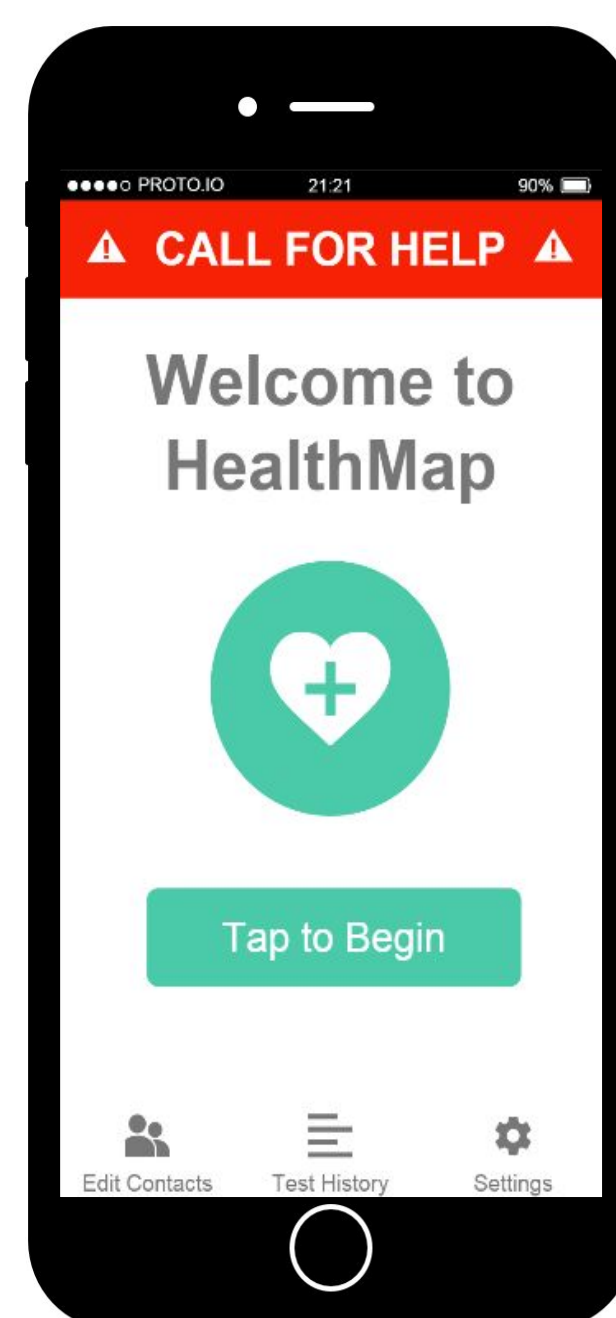

Call and share your location with an emergency contact

Brainstorming potential solutions to problems discovered in needfinding

Low fidelity prototype of selected solution

Medium fidelity prototype of selected solution

## Design Iteration

- Hand-sketched low-fi prototype
- Med-fi tool: Proto.IO
- Hi-fi tool: Ionic
