

MINGO!

MEDIUM-FI PROTOTYPE

PRESENTATION OUTLINE

- ✘ About Mingo
- ✘ Tasks
- ✘ Revised Interface Design
- ✘ Prototype Overview

MINGO!

make every mood a travelling mood

TEAM MINGO

BEN W.

KEVIN H.

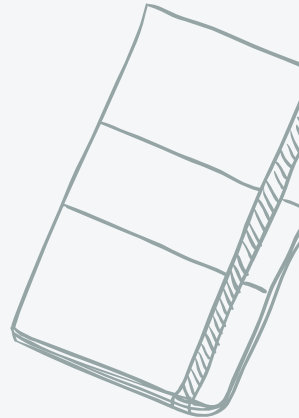

MINYMOH A.

Our mission:

Mingo aims to prevent ‘travel burnout’ by taking a traveller’s current mood into account when planning an activity. Mingo keeps travel fresh and spontaneous, allowing users to experience popular sights in new ways while also suggesting lesser known sights and experiences that help mix up the pace and tone of a trip.

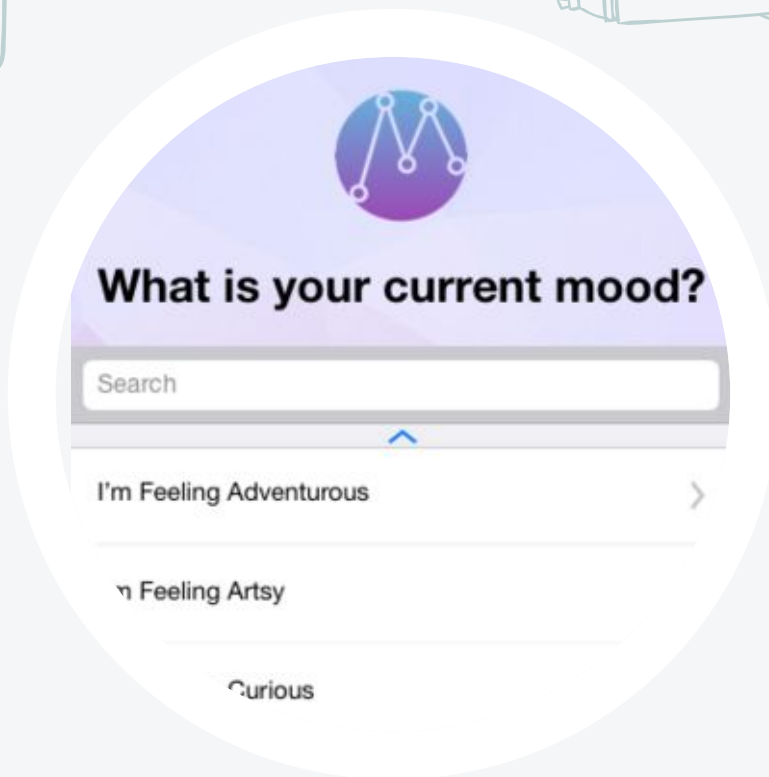

TASKS

WE KEPT THE SAME TASKS WITH NO CHANGES FROM OUR LOW-FI
PROTOTYPE

TASK 1 (SIMPLE)

Do Something Based on Current Mood

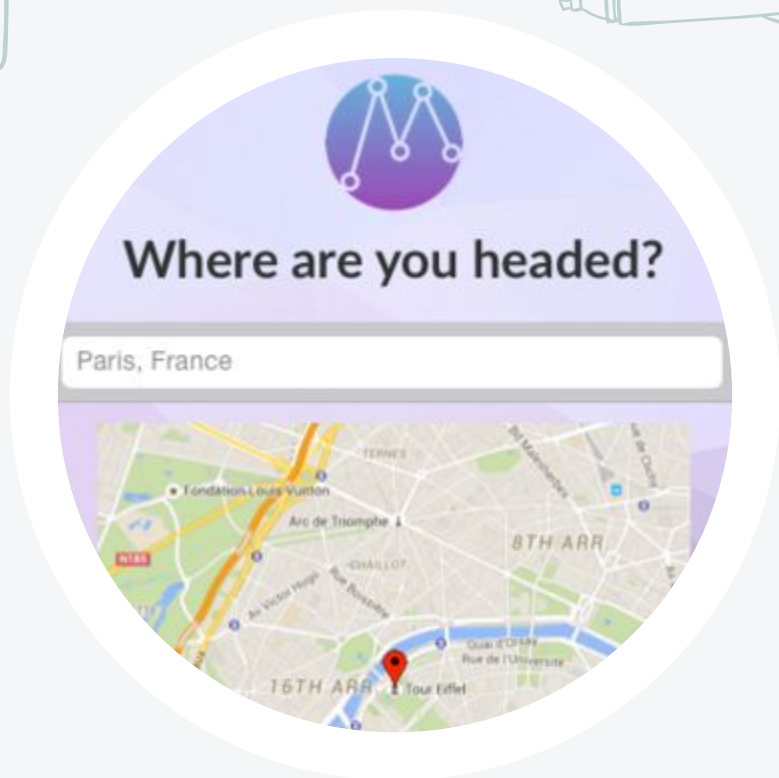

Your Mingo Reminders

Date	Time Slot
8/1/15	4:00PM - 6:00PM
8/3/15	12:30PM - 4:00PM

... and Time Length

TASK 2 (MEDIUM)

Set a Reminder to Explore During Free Time

TASK 3 (COMPLEX)

Travel Spontaneously Without Missing Out on Major Attractions

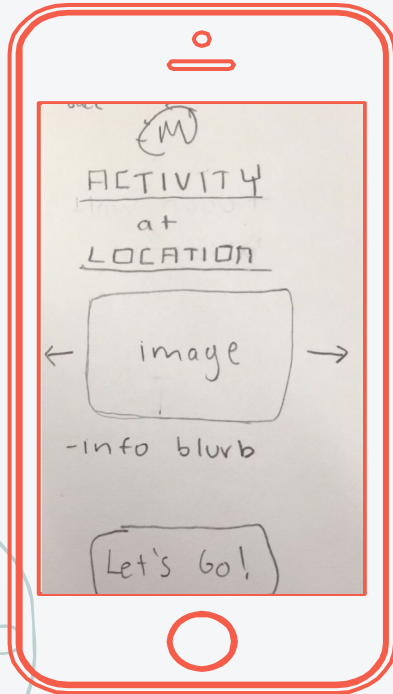

REVISED INTERFACE DESIGN

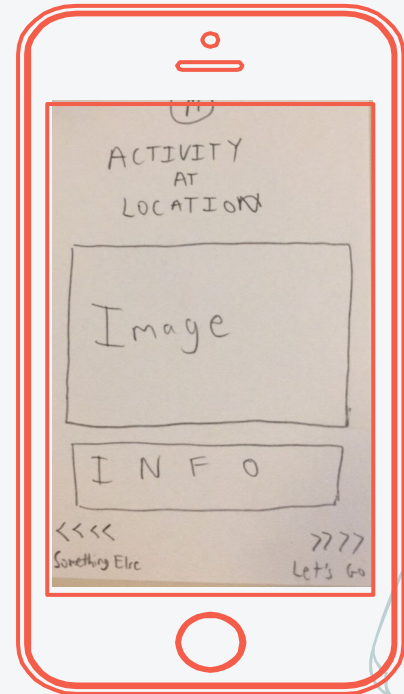

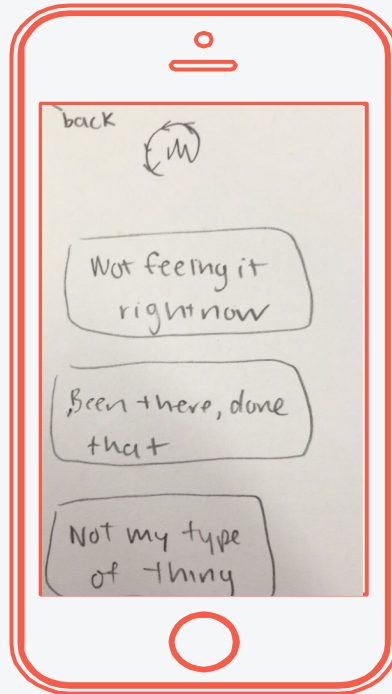

CHANGES

CHANGE 1

Before

After

CHANGE 1 (DESCRIPTION)

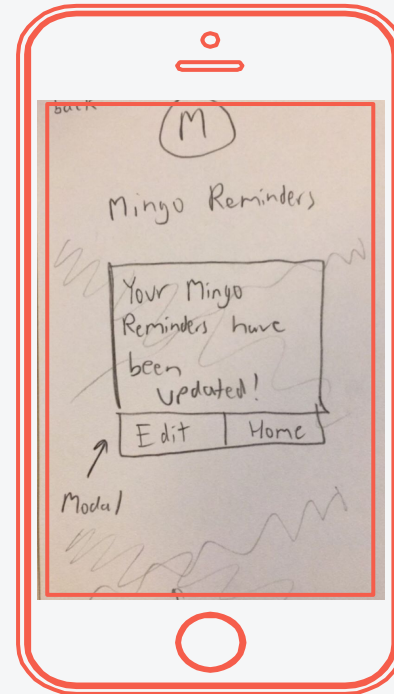

- ✘ Removed ambiguous left and right arrows
- ✘ Removed feedback screen
- ✘ Users swipe left for a new suggestion
- ✘ Users swipe right to perform the activity

CHANGE 2

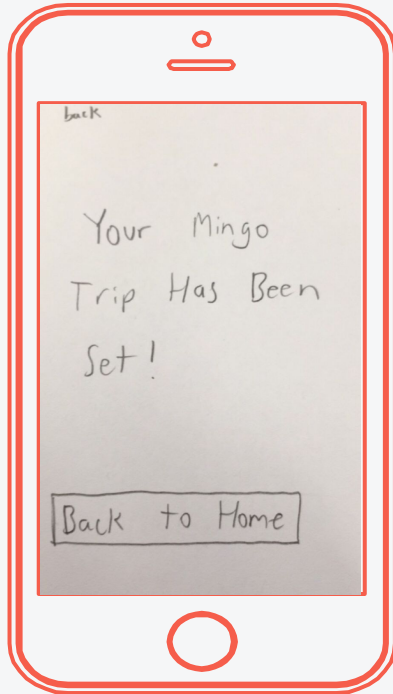

Before

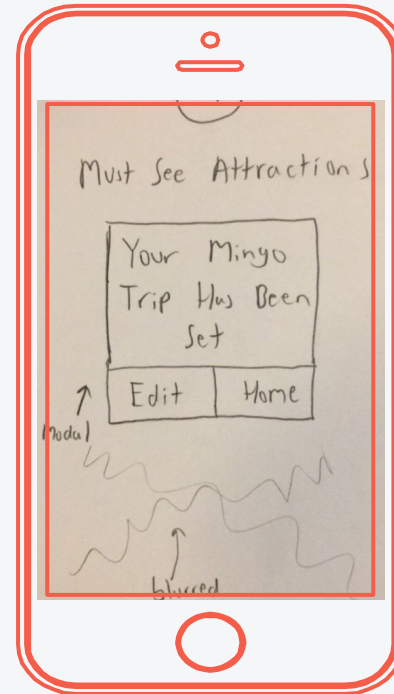

After

CHANGE 2 (CONTINUED)

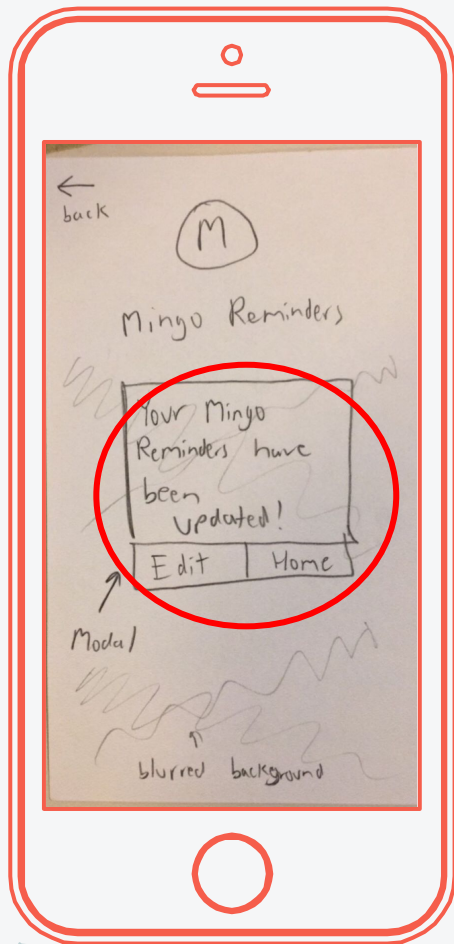

Before

After

CHANGE 2 (DESCRIPTION)

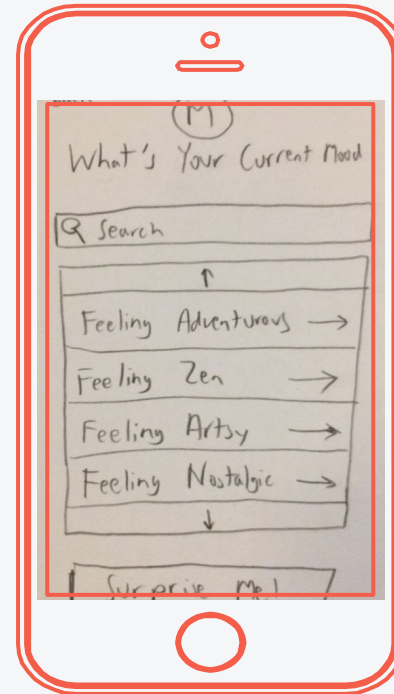

- ✘ Removed separate confirmation screens
- ✘ Use of modals on screens instead (popup or alert box with blurred background)

CHANGE 3

Before

After

CHANGE 3 (CONTINUED)

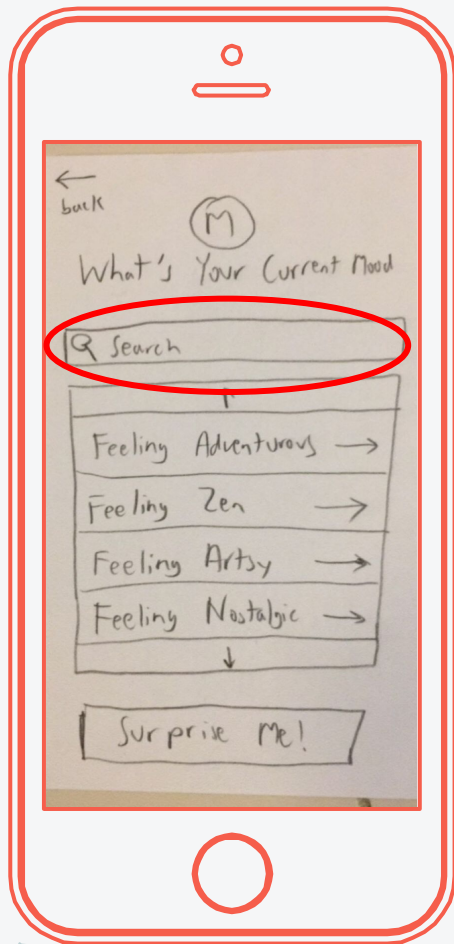

Before

After

CHANGE 3 (DESCRIPTION)

- ✘ Added search box to both mood and location screens
- ✘ This changes the flow of selecting a mood slightly (results list)

REVISED INTERFACE DESIGN

TASK FLOWS

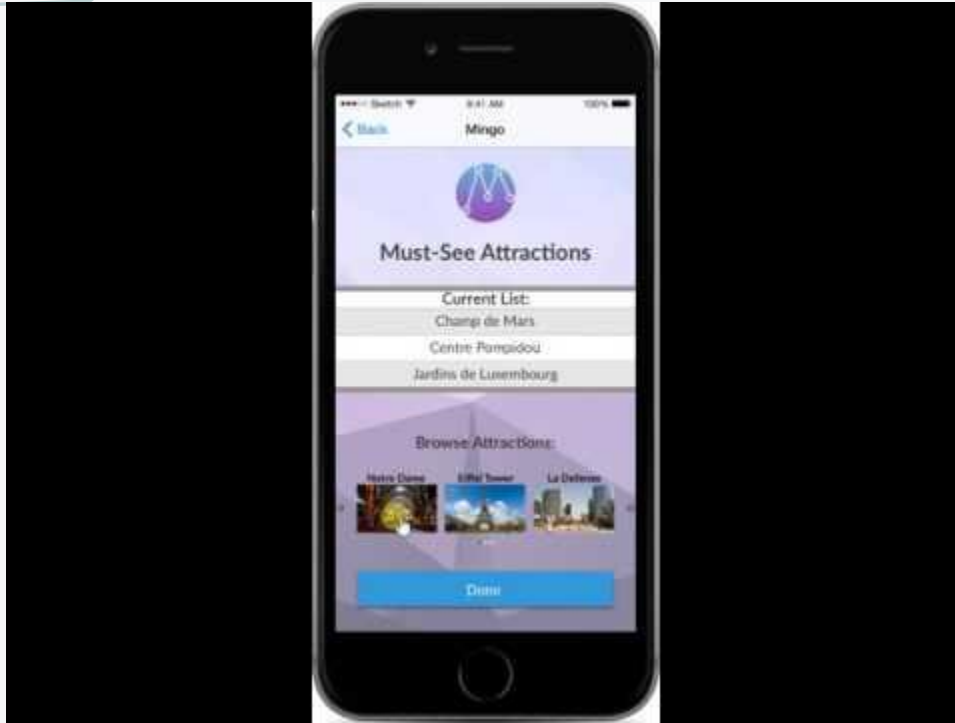

TASK 1 (SIMPLE)

Do Something Based on Current Mood

TASK 2 (MEDIUM)

Set a Reminder to Explore During Free Time

TASK 3 (COMPLEX)

Travel Spontaneously Without Missing Out on Major Attractions

PROTOTYPE OVERVIEW

TOOLS, LIMITATIONS, AND TRADEOFFS

- ✘ We used **Sketch** to create the individual screens:
 - Sketch helped us create realistic mockups by offering reusable templates for components
 - Sketch mockups are not dynamic (everything is hard-coded)

TOOLS, LIMITATIONS, AND TRADEOFFS

- ✘ We used **Marvel** to link the screen together and create the demo:
 - Marvel helped “bring the app to life”
 - We could not test any real functionality (back-end database, engine, performance)

PROTOTYPE TECHNIQUES

- ✘ Simulated Timeskip: Users can get to the alarm screen by tapping the modal dialog box (Wizard of Oz).
- ✘ All data used (moods, attractions, reminders, etc). is hard-coded!

THANKS!
Any questions?

CREDITS

Special thanks to all the people who made and released these awesome resources for free:
