README

Mingo Med-fi Prototype on Marvel

General Use Notes

- Tapping the blue buttons will move the user from screen to screen
- Tapping the back arrow take the user to the previous action in a given task flow
- Swiping directly over the stacked arrows will move the user from screen to screen
- Tapping on drop down menus allows the user to input calendar date and time values. The drop down menus close when the user taps anywhere on the screen.
- The Mingo Alarm Screen can be accessed in this prototype by tapping on the text of the confirmation message in both the Trip Confirmation and Reminder Confirmation modals. (Wizard of Oz)

Prototype Notes

- All locations and activity suggestions are hard coded into this prototype. The real application would give suggestions based on user inputs.
- Arrows in the vertical direction indicate that the contented could be scrolled through, but this scrolling functionality has yet to be implemented.
- The search fields in various screens will allow for users to input text, but have yet to be implemented.
