People crave new, organic, and spontaneous connections. In response, we've created Joynus—a location-based way to connect through spontaneous events.

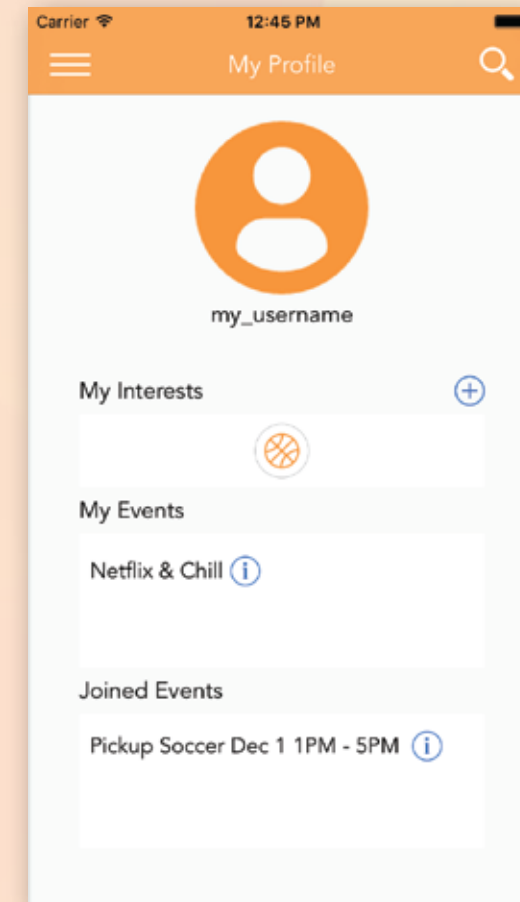

DESIGN ITERATION

Low-fi
paper sketch

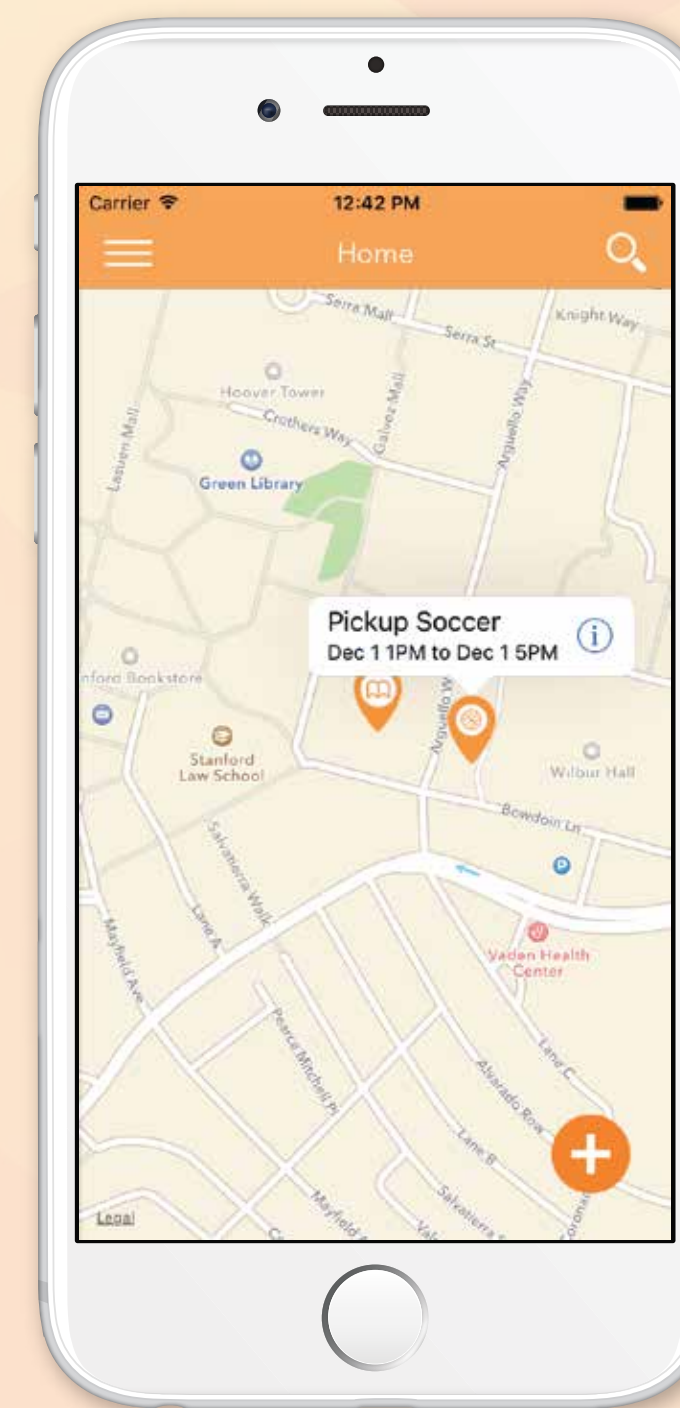

Medium-fi
proto.io

High-fi
mobile app

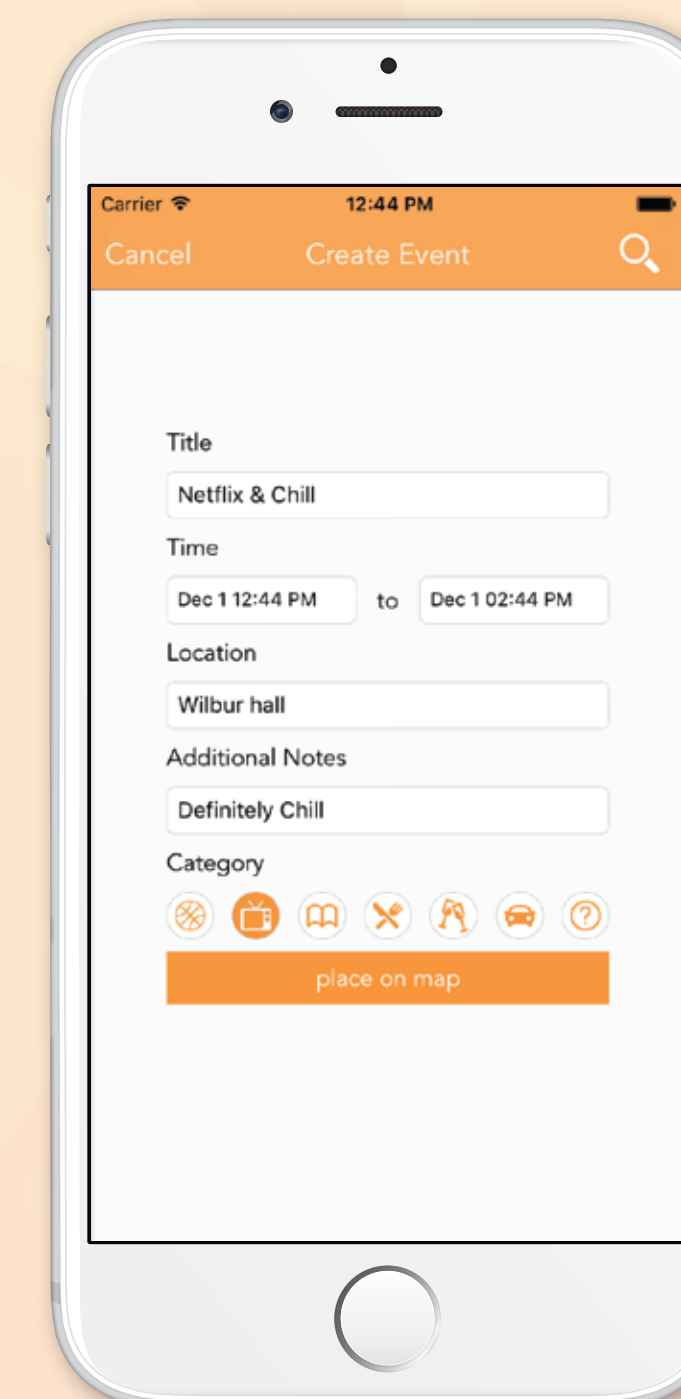

- shift from navigation bar to side drawer
- search and create made prominent features
- added ability to view/edit event details from profile

Map-based interface
for intuitive navigation
of existing events

Create new events
by category so users can
find relevant activities

Add profile interests
and be notified when
related events appear
