Medium-Fi Prototype Instructions:

We used proto.io for our prototyping. Unfortunately, we have to link directly to the proto.io website because exporting it doesn't work properly. To our knowledge, you will not have to end up making a proto.io account to view our prototype.

Operation Notes:

- If when exploring, you get to a screen that is a dead end, open the menu on the right side and under the screens tab, select the screen you wish to traverse to. The home screen is a portal to all the tabs/functionality.
- When clicking around on the screen, places that are clickable will flash blue. If following along with the tasks below, make sure to follow the instructions so not to mess up the task flow. Otherwise, have fun clicking around.
- The 'phone' and 'text' and 'mail' icons, actually work and will try and open an appropriate application on your computer. Do not tap these unless you actually want to call one of our group members.

Limitations:

- Not all the tabs are linked up on every page. The initial page of every tab is linked up to all the others, but beyond those pages, the tabs are not guaranteed to be linked.
- The 'Find someone specific' task / Search functionality must be followed very specifically. To play with the search tab, follow task 2.
- There are hard-coded profiles into the app, so no matter what preferences you pick on the home screen, you will get the same people.
- There is no ability for the application to save any data. So if you star a contact, they won't remain starred. Or if you book a meeting, it won't show up in your meetings under the 'Me' tab

The following are the main task flows that we wanted to demonstrate to our testers/users. Below, we walk you through the tasks and explain any hard-coded situations.

Task 1: Find someone to talk to now

1. Start on the 'Home Screen' (Now tab)

2. Interact with Screen. When you have finished selecting your options, tap the 'Go' button.

3. Look through your matches given your selected options by swiping through the pages. [You must click in the white space to swipe. If having trouble on a trackpad, try clicking with one finger and sliding left/right with another]

- View bios by clicking on the person's picture or clicking 'View Bio' button. Clicking on either toggles the bio's visibility.
- Swipe back to Sam. R (the first page). Click the 'Talk Now' Button to set up a meeting with sam now.

4. Press the 'Okay' button in the confirmation alert (The 'cancel' option does work, and will cancel the appointment). Then interact with the confirmation screen. The following are options:

- 'Star' the person
- Cancel the meeting by tapping 'nevermind'.

Task 2: Find someone specific to talk to (**Sam**, who is an **RA** in **Wilbur**)

This interaction is very hard-coded [to show all possible interactions]. Please follow the following instructions

1. Move to the 'Search' tab
2. Click on the Search bar and type 'Sam'. Press Enter
3. Tap the 'Wilbur' tag
4. Tap the 'RA' tag
5. Click Search
6. Here, you can view search results. Find 'Sam R.' and click on her
7. View Sam's profile and find her time availability by clicking on the calendar icon
8. Just View Sam's Schedule

AND/OR

9. Follow the steps below to select a time to meet with Sam
 - Tap the right arrow icon to view other day(s)
 - Tap the left arrow to go back to 'Today'
 - **Tap '5:00pm'** [DO NOT CLICK THIS MORE THAN ONCE. Also will not work if you choose another time]
 - Tap 'Book' Button

10. Press the 'Okay' button in the confirmation alert. Then you have the option to interact with the confirmation screen again.

Task 3: Follow up with someone

3 Pathways

My Staff

1. Navigate to the 'Me' tab
2. Tap on 'My Staff'

3. Tap on 'Sam R.'
4. Tap 'Quickbook' to immediately schedule an appointment for when they are next available
6. Press the 'Okay' button in the confirmation alert. You can now interact with the confirmation screen.

Recents [****not implemented****]

1. Navigate to the 'Me' tab
2. Tap on 'Recents'
3. Find a person and view their profile to schedule a meeting

Starred [****not implemented****]

1. Navigate to the Starred tab
2. Find a person and view their profile to schedule a meeting

Thank you for looking at our prototype! We hope you enjoyed it.
