README

Sign Along Medium-Fi Prototype on Marvel

General Use Notes

- Tapping the various options on the screen (for instance: Interpreter/concert-goer, tapping on a particular concert) will highlight that option
- Tapping the “vote” button allows users to vote for their favorite submissions
- Tapping the “done” button will advance the user to the next screen
- Tapping the “back” button will take the user back to the previous screen
- Tapping on one of the people in the “vote your favorites” screen will highlight the heart icon
- Tapping on the icons on the bottom of the screen will take the user to the corresponding screen
- Tapping the “Meet X” banner will bring up a blurb summarizing the background of that interpreter and tapping the bar above the blurb will bring the screen back down
- Tapping the play button will allow users to play video submissions or songs
- Typing in the box “Type a message here...” allows the user to message other users
- Clicking the “record/save” buttons as an interpreter allow you to perform these actions

Prototype Notes

- The “Login with Facebook” feature allows users to connect their Facebook profile in the real app. It is not connected in this prototype.
- The “Buy” feature allows users to purchase tickets by linking with the Ticketmaster website in the real app. It is not connected in this prototype.
- This prototype assumes that the user chooses the Kanye West concert, but the real app will allow the user to choose any concert available.
- This prototype does not link to anything when the user taps on the icons on the bottom of the screen, but will link to corresponding pages in the real app.
- The record/save features will allow use of the phone’s camera, but have not been implemented in the prototype.
- The play feature has not yet been implemented, but will play music/submission videos
