share your vision. get your shot.

Where We're At

# Team Mission Statement

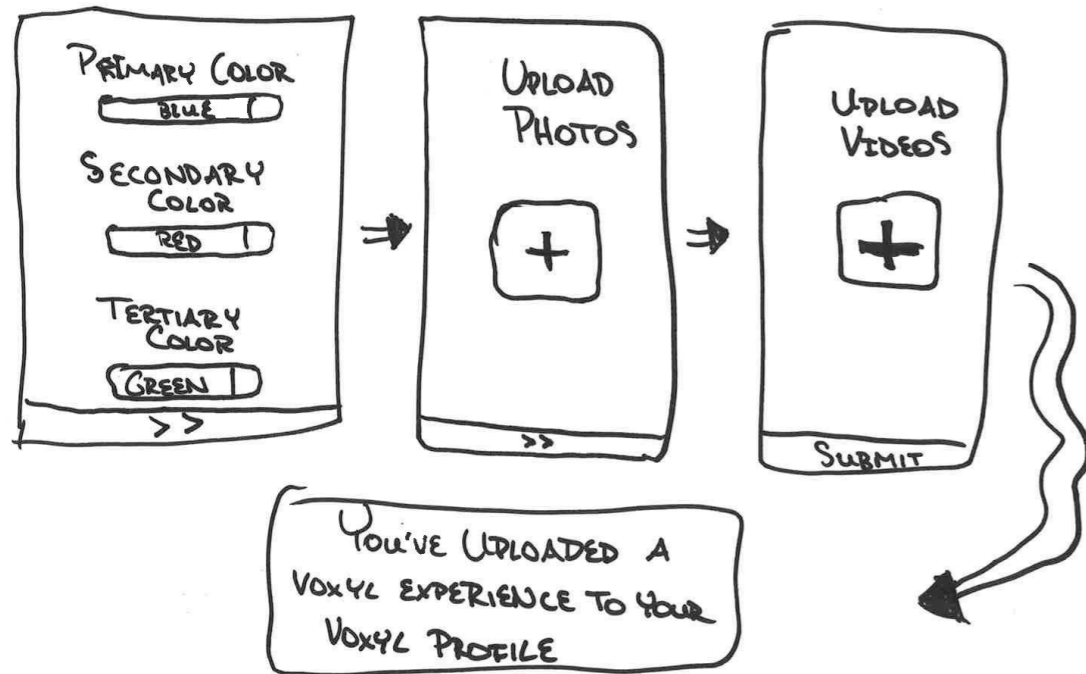

Art happens when your vision can find its place in the  
context of another person's mind

# Team Mission Statement

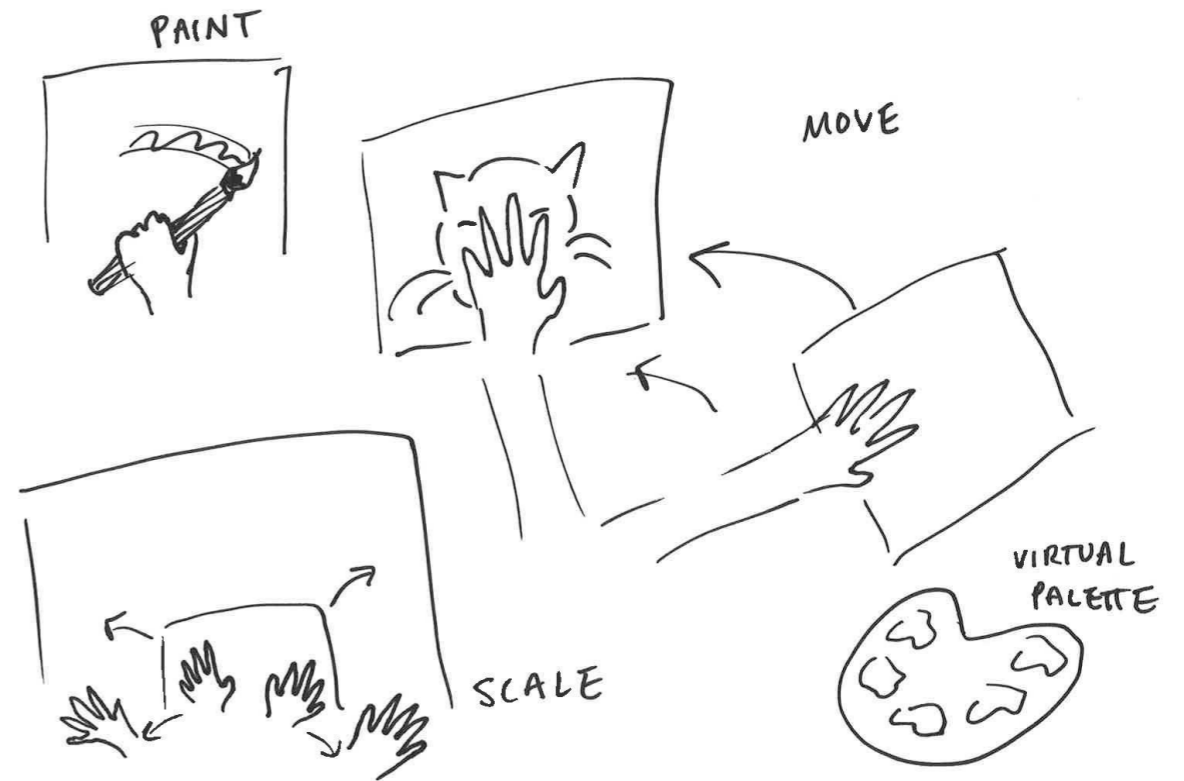

**Make your vision understood.**

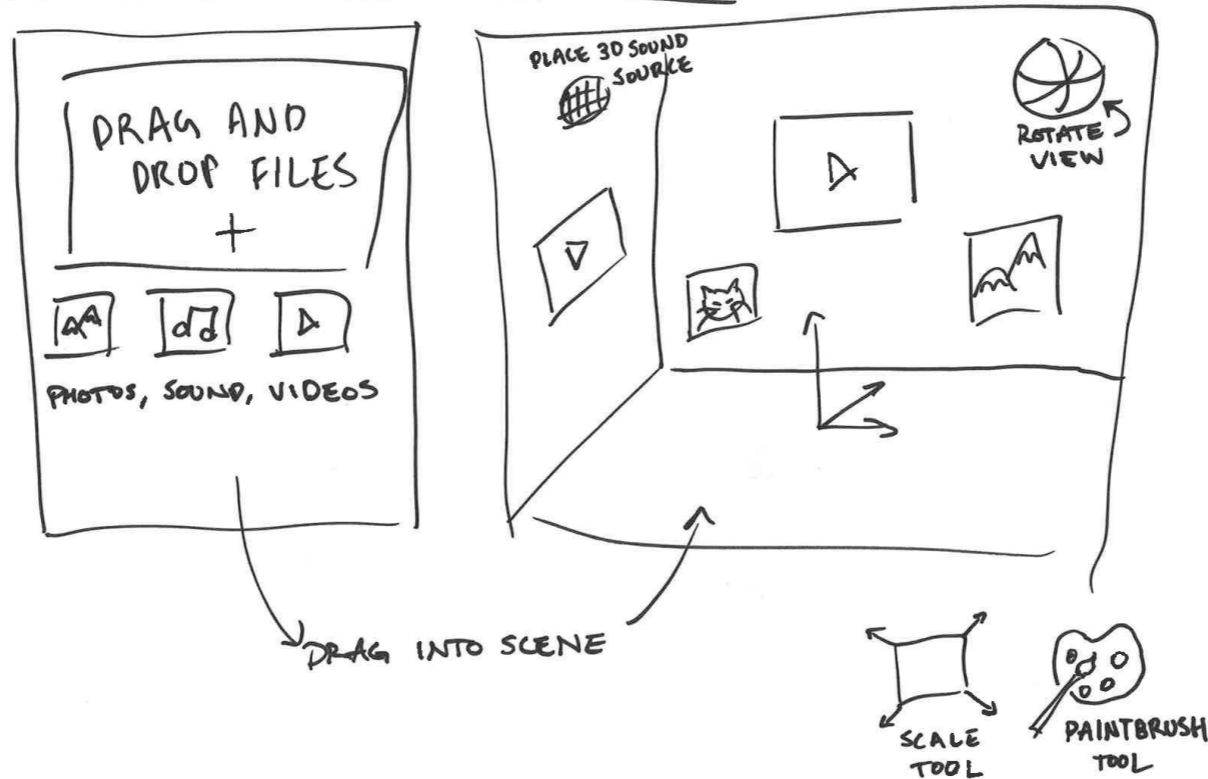

# VOXYL FOR ARTISTS: MOBILE APP

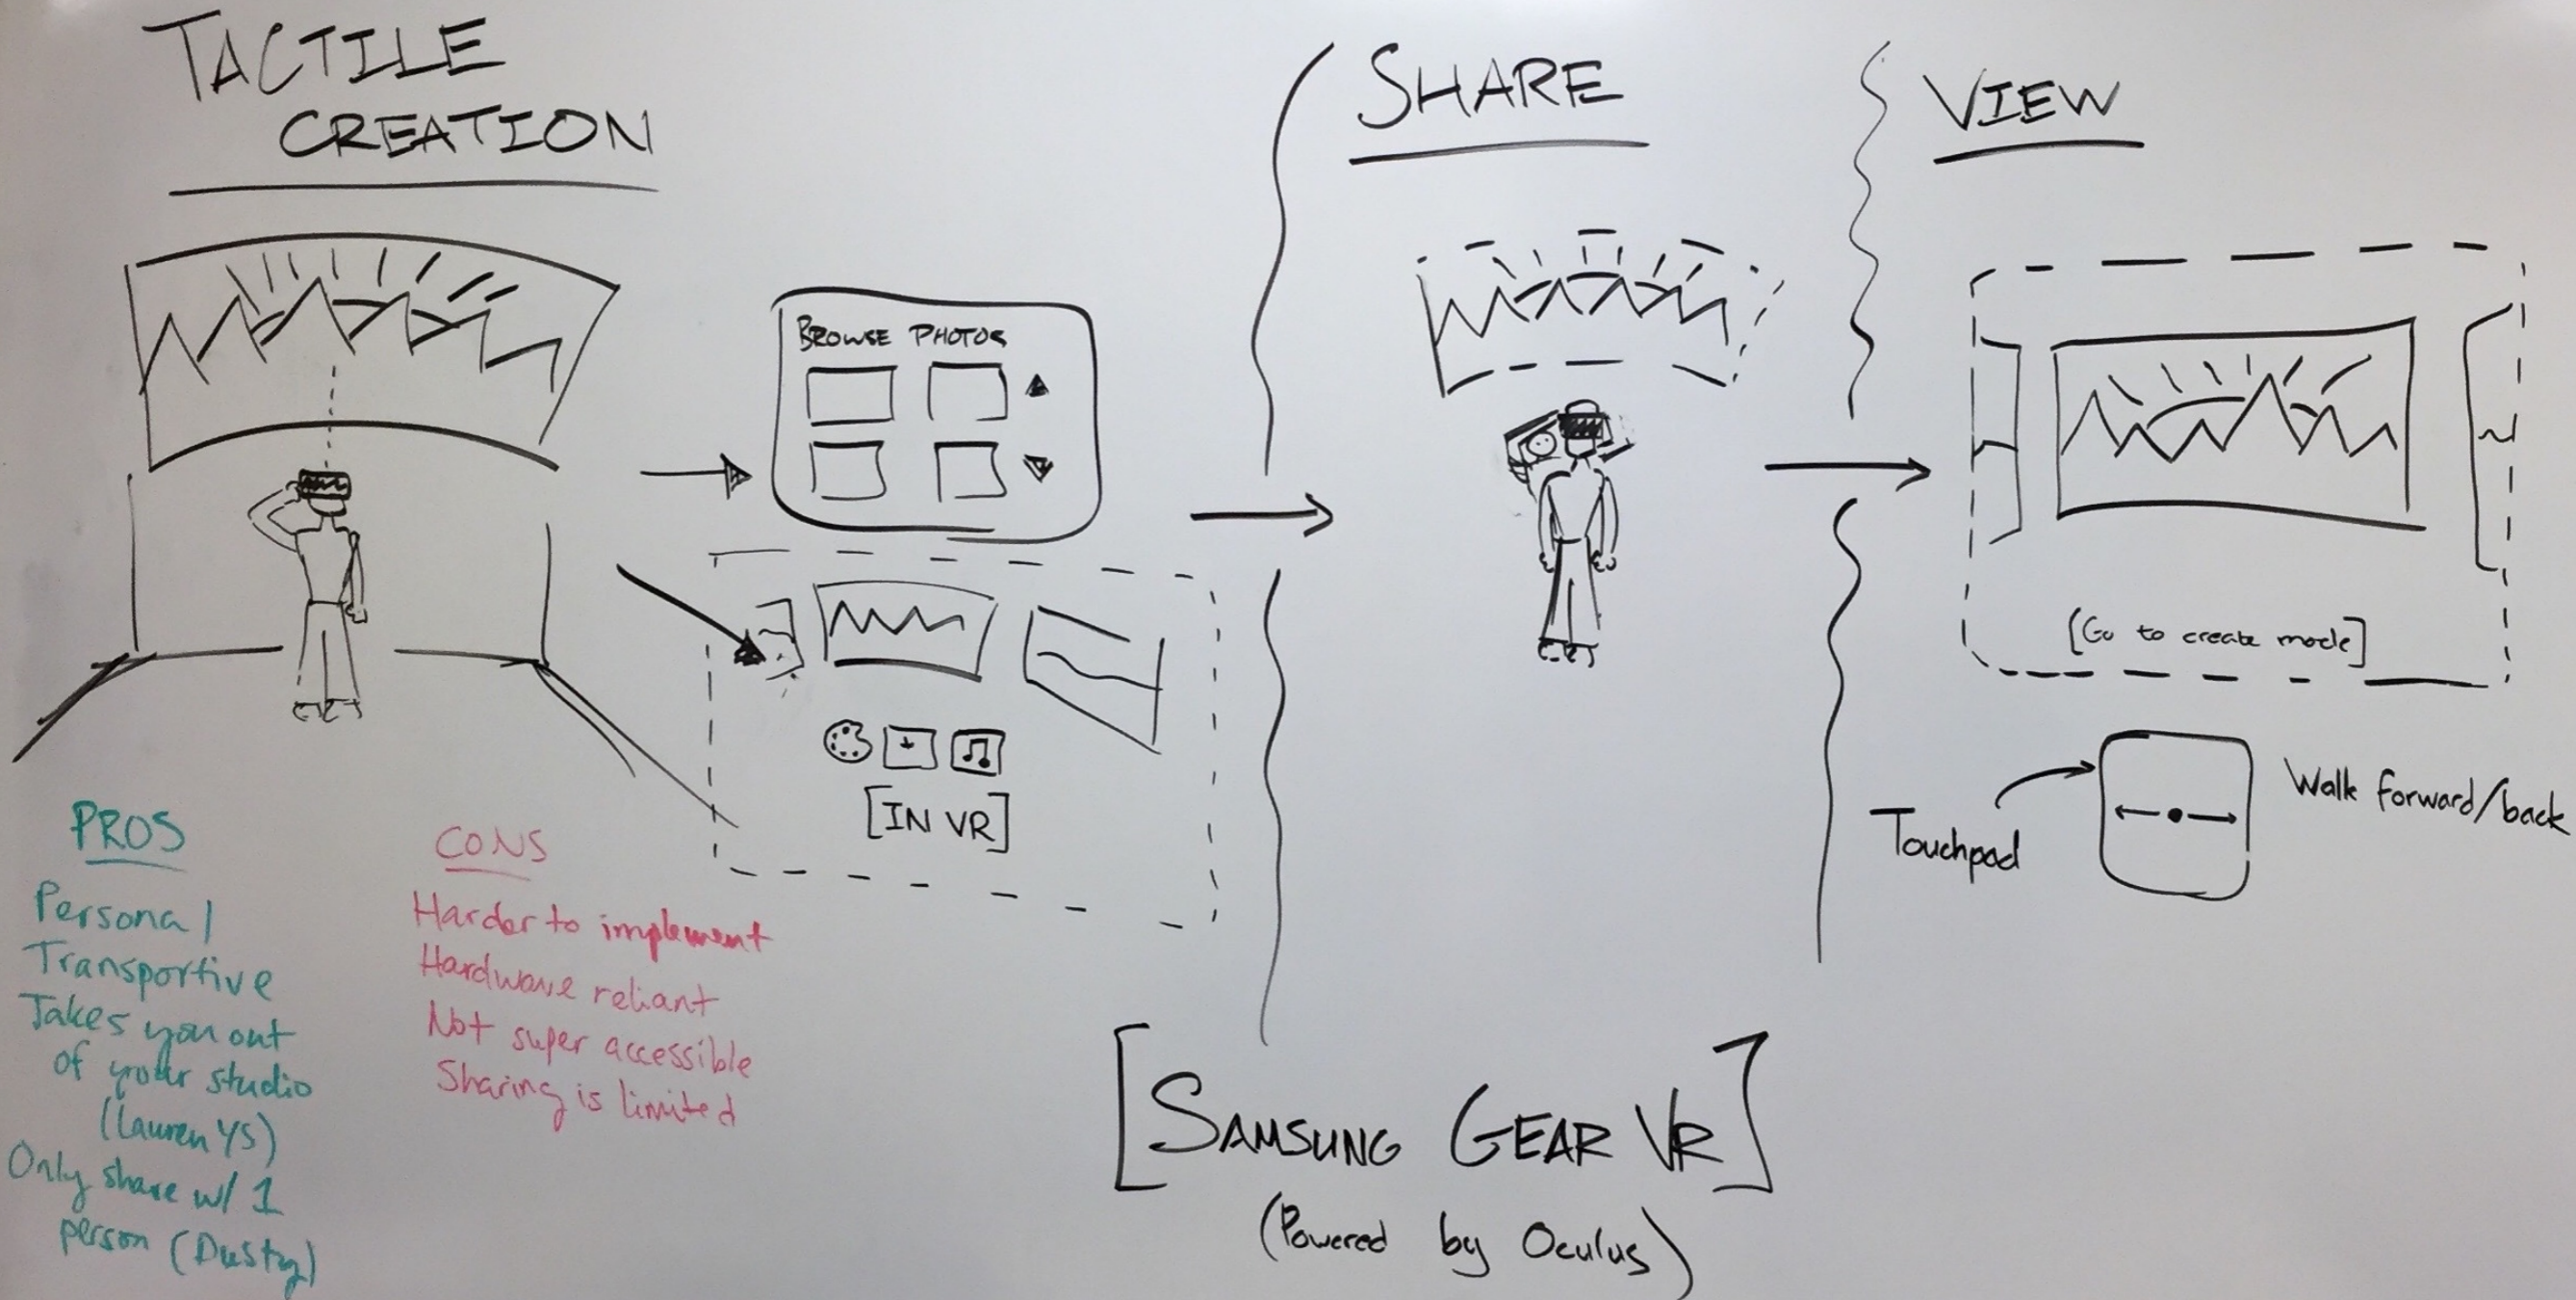

# VOXYL FOR ARTISTS - 3D GALLERY w/ Gestural Interaction

# VOXYL FOR ARTISTS - Web App 1

# Selected Interface

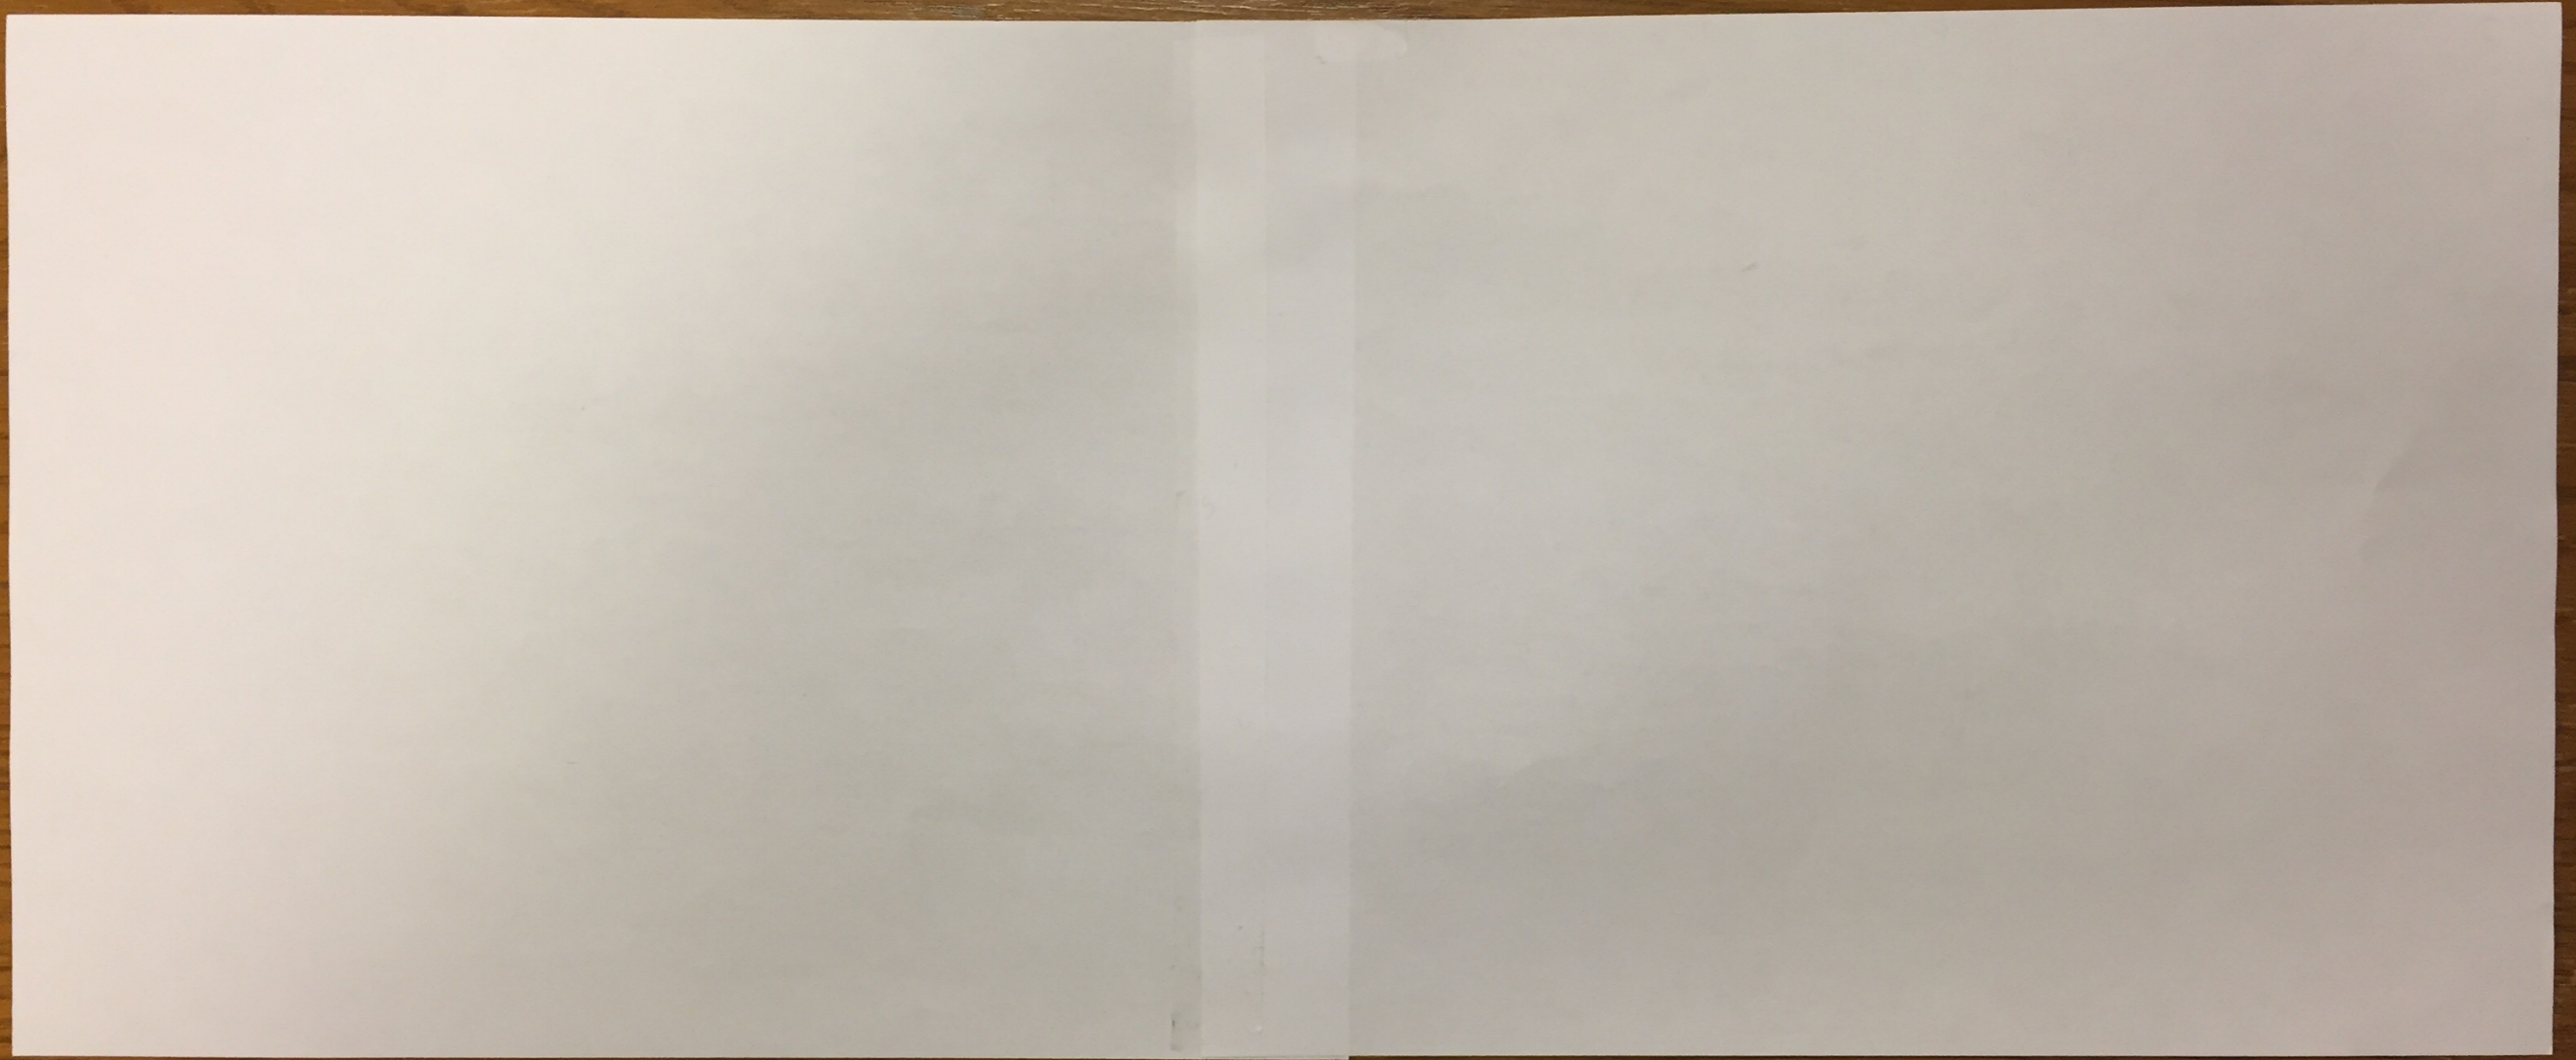

## PROS

- Personal
- Transportive
- Takes you out of your studio (Lauren YS)
- Only share w/ 1 person (Dusty)

## CONS

- Harder to implement
- Hardware reliant
- Not super accessible
- Sharing is limited

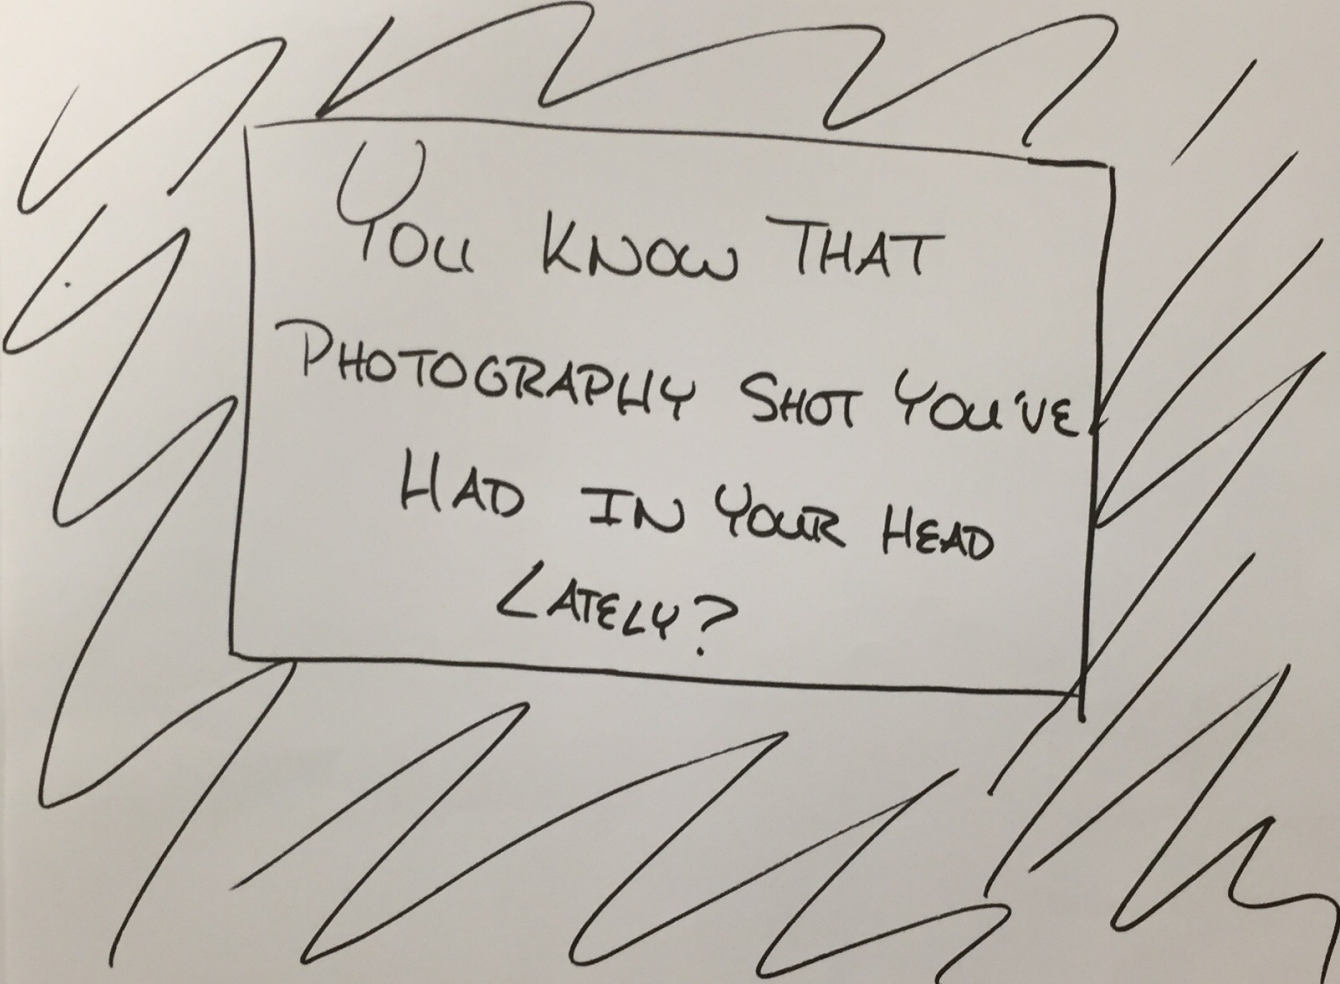

[SAMSUNG GEAR VR]  
(Powered by Oculus)

# SIMPLE TASK: CREATE A NEW, SHAREABLE VISION

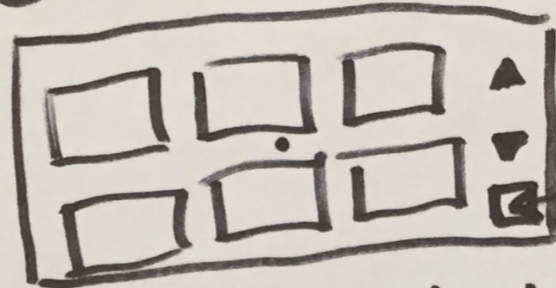

# Medium Task: convey concrete details using photos, video, and colors

① Equip VR headset

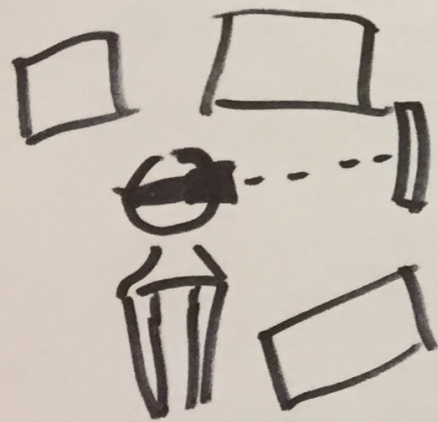

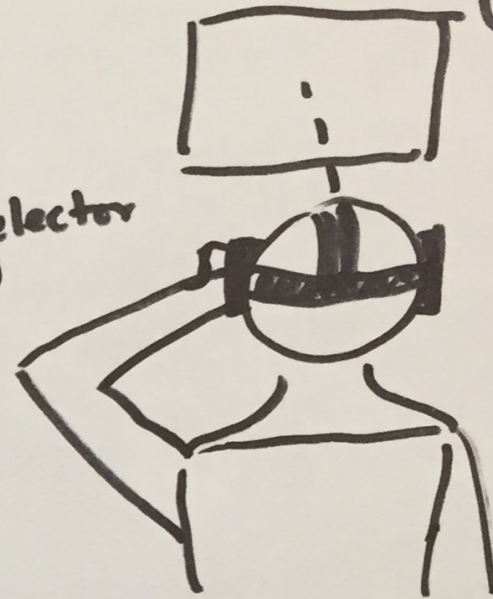

② Choose media from gallery

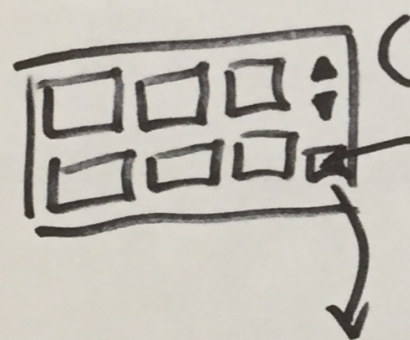

Hover viewpoint selector over desired media and press select button on headset

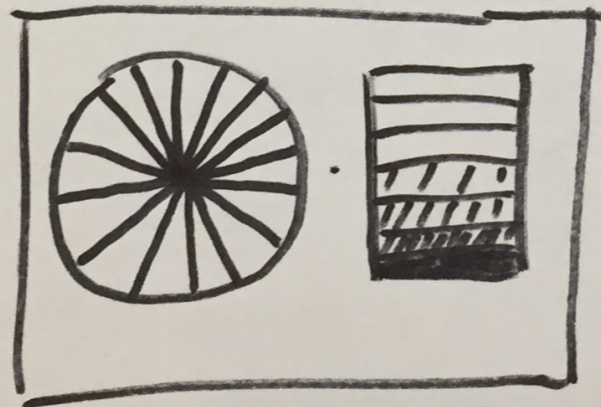

③ Position media in 3D space using head tracking. Press select button to place. Press back button to return to gallery.

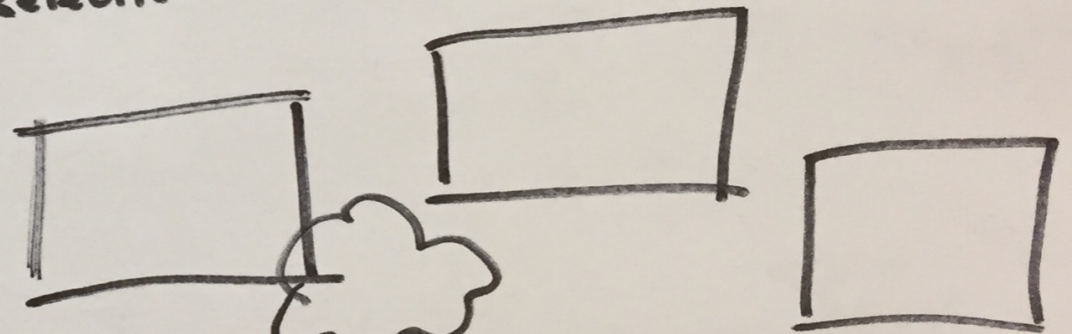

④ Repeat step 3 for multiple photos and videos.

⑤ Select color box. This expands the color selection interface.

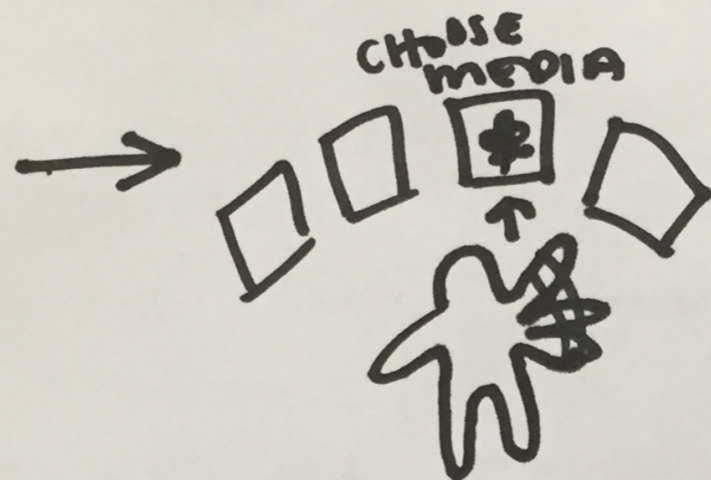

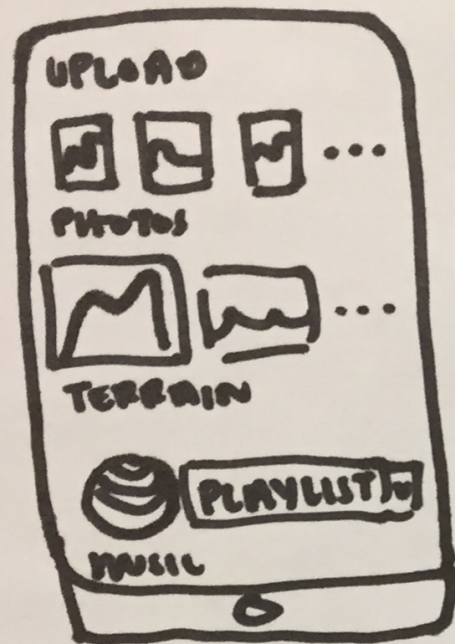

⑥ Pick color on color wheel and weight from right-hand chart.

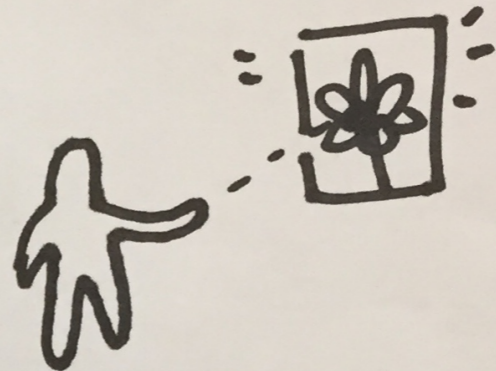

⑦ Add splashes of color to the scene using head tracking and the selector button.

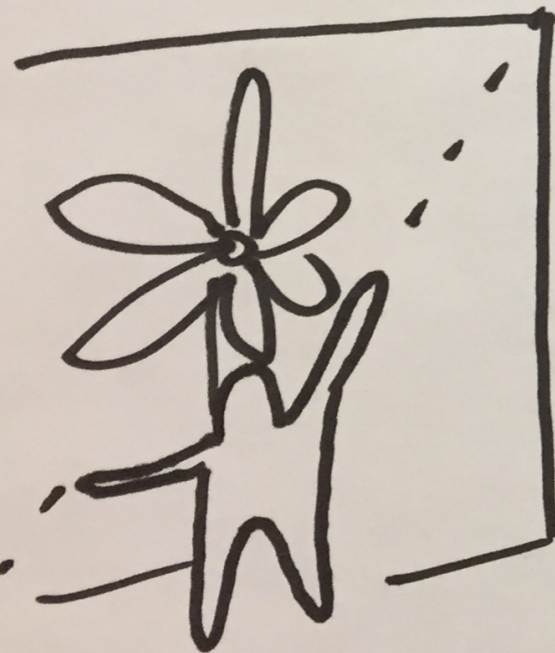

COMPLEX TASK : CONVEY MOOD & SCALE. BE UNDERSTOOD.

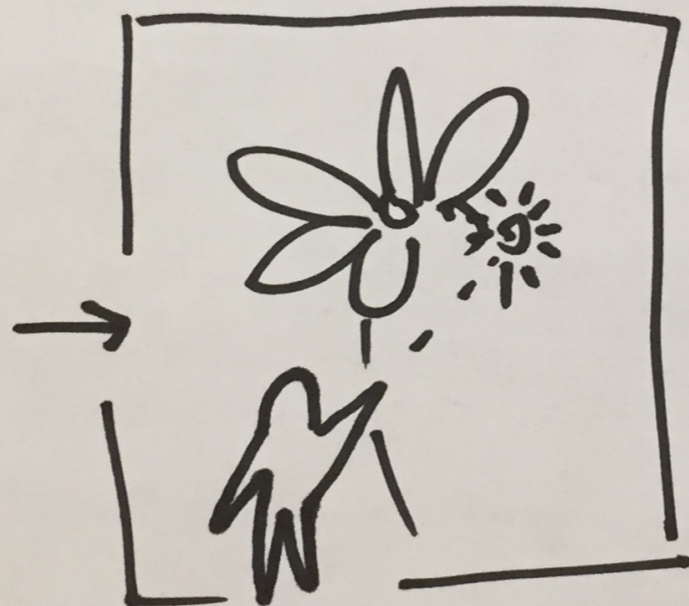

PLACE MEDIA.

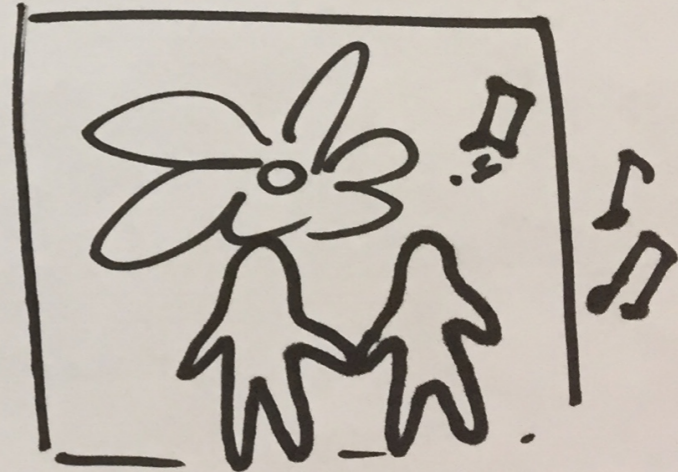

SHARE VIEW

SCALE IT.

ATTATCH MUSIC/  
PLAYLIST.

THE CLOSER YOU GET TO HOT SPOT, ↑ AVAILABLE MUSIC.

# Experimental Results

# Suggested UI Changes

- More robust and explicit navigation tools
- More open-ended labels
- Quick blank space filler
- Collaboration mode
