

## ClassLens Medium-Fi Prototype on Marvel

### General instructions

- The login screen lets you log in as either a teacher or a student, which each have a different view of the application. You can explore both.
- Use logout (located in the menu in the upper right) to return to the login screen
- Clicking on some nodes in the career map will select them and highlight relevant edges
- Clicking on a search field will automatically input a value and “search” for it (Wizard of Oz)
- Click on review to see a list of classes to “review” (Wizard of Oz)
- Click on explore to “search” for classes (Wizard of Oz)
- Click on the menu in the upper right to see more navigation options, including going to bookmarked classes.
- Login, logout, and account setup has not been implemented yet, but will be in the real application

### Prototype Limitations

- Search functionality has not been implemented yet and returns hard-coded results.
- Career graph has not yet been implemented. The graph is static and not based on real data. The real career graph would be more interactive and based on user data. The user would be able to scroll nodes horizontally to navigate to different areas of the map and be able to select all nodes in the map.
- Course data, skills data, and user reviews are hard-coded and are made up for the purposes of this prototype. They should not be taken seriously and do not reflect on the quality of any courses. The real application would only use verified student and alumni reviews.
- Professor names and courses were used for illustration purposes only.
- Textboxes on the feedback form, checkboxes, and search fields throughout will allow the user to type in text once implemented
