dt+UX DESIGN THINKING FOR USER EXPERIENCE DESIGN + PROTOTYPING + EVALUATION

Visual Information Design

Prof. James A. Landay
 Computer Science Department
 Stanford University

Autumn 2018
 October 29, 2018

* Based on slides by Luke Vink, Scott Klemmer, and James Landay

Hall of Fame or Shame?

Palm Beach, Florida
 Ballot 2000

2008/10/29 dt+UX Design Thinking for User Experience Design, Prototyping & Evaluation

Hall of Shame!

Palm Beach, Florida
 Ballot 2000

Eye drawn to the wrong holes

If only 1% error rate, can still change a close election

2008/10/29 dt+UX Design Thinking for User Experience Design, Prototyping & Evaluation

One Possible Redesign

William Lidwell, Kirtina Holden, and Jill Butler *Universal Principles of Design*

Hall of Fame or Shame?

iFitness
 iOS App

2008/10/29 dt+UX Design Thinking for User Experience Design, Prototyping & Evaluation

Hall of Shame!

Non-conventional design is a waste of resources—iOS has better defaults

Know your users! 99% of users will want to enter *today's* weight

'Record' button almost invisible due to lack of contrast

2008/10/29 dt+UX Design Thinking for User Experience Design, Prototyping & Evaluation

One Possible Redesign

Possible Re-design

- ¼ of the controls
- Saved space can be used for statistics
- Date and time can be recorded automatically

The Art of Balance

Promotion & demotion of important objects

First Question for any design

> What are the most important things?

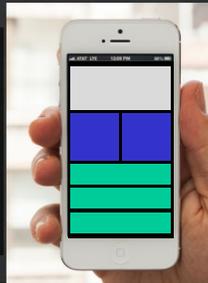

Information should be prioritized based on its importance to the user

Visual Design that has
Good Form
(Purpose)

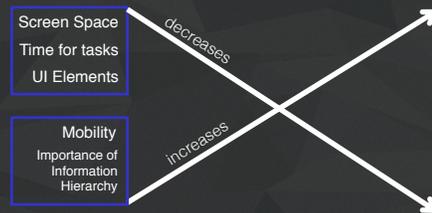

Using Context to Determine Layouts

Know Thy Users! (Design Discovery)

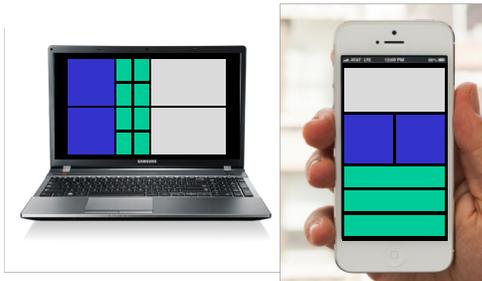

Context is extremely important to how much "Stuff" should be visible

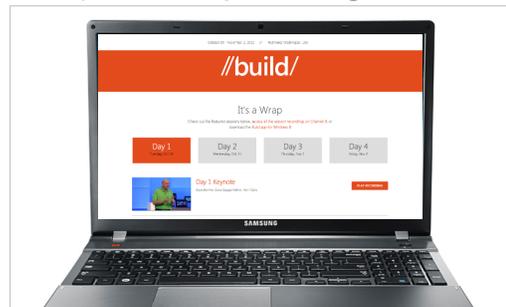

Using Context to Determine Layouts

Responsive Layout Design for Web

Responsive Layout Design for Web

Using Proximity to Indicate Relationships

“The whole is greater than the sum of the parts.”
– David Hothersall

Gestalt Psychology in information design
Information blocks should be grouped together if related, but unrelated elements should be located at some distance from each other.

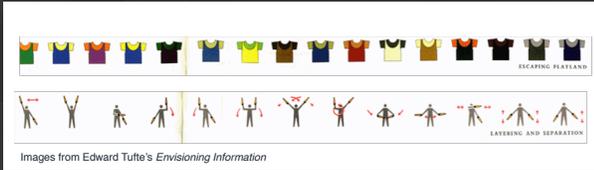

2018/10/29

Using Proximity to Indicate Relationships

2018/10/29

Small Multiples

- Economy of line
- Similarities enable us to notice differences

International Women's Day

SMALL MULTIPLES

Echeverria, Heriberto 1971
 March 8 - International Women's Day

Diaz, Estela 1974
 March 8 - International Women's Day

Administrivia

- Medium fi prototype & presentations
 - must be on web site by this Friday or grade will be docked
 - problem getting a web site up, talk to your CA
- Web Workshop
 - Thur., Nov. 1st, 7 PM (Gates 219)
- CS 194H
 - Mon/Fri 3:30-5:20 PM
 - continuation of projects from CS147 & advanced techniques
 - need at least 2-3 of a project team to continue, individuals can join another team
 - more iterations – get to release quality
 - no exams – less writing (mainly project presentations) – fewer lectures – individual studio assignments on advanced techniques
 - cap at 28-32 students

TEAM BREAK
(TALK ABOUT MED-FI PROTOTYPE PLANS)

Using Blank / White Space as an Object

- White space can be used to suggest importance or prestige
- The more space around a group, the more valuable it should be for the user
- Think of whitespace as an “element” – consider its position

A higher plain
White Space = Value

What Are The Important Things Here?

Jan Tschichold's Revolution

Champion of Modernist Typography

Die Neue Typographie
Berlin, 1928

Bauhaus school
Dessau, 1925-26

Type Classifications

Typeface (Arial) vs **Font** (Arial Bold)

Serifs: Structural details in letters that (may) help the reader connect them

	Sans Serif	Serif
	Optima	Fenice Bold
Roman	answ	answ
Obliqued	<i>answ</i>	<i>answ</i>
True italic	<i>answ</i>	<i>answ</i>

Asymmetric Typography

JAN TSCHICHOLD

How blocks used to be arranged in magazines. Schematic, thoughtless centering of blocks (= ugly).

The same blocks, correctly arranged in the same type-area. Constructive, meaningful and economical (= beautiful).

© 2008 1029 | 147.CS Design Thinking for User Experience Design, Prototyping & Evaluation

Grid Systems

- A key pattern for implementing rationality, modernism, asymmetry
- Note that no elements are “centered”

Java Look and Feel Design Guidelines

Color Definitions (digital)

- **Hue** is gradation of color (i.e., name: “yellow”)
- **Saturation** is purity of the hue (vividness)
 - how much gray
- **Luminance** is the brightness in an image

Photo Hue Saturation Luminance

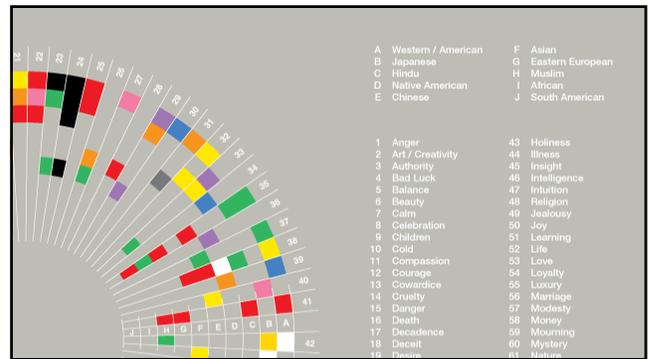

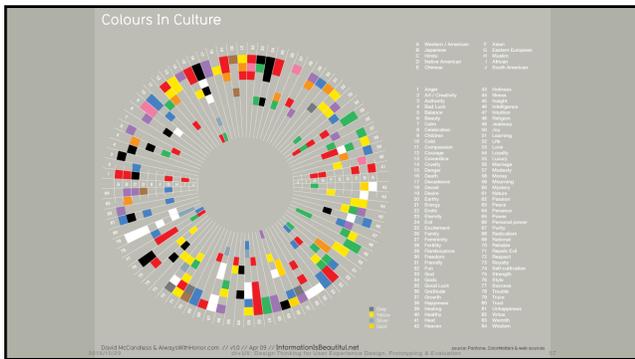

© 2008 1029 | 147.CS Design Thinking for User Experience Design, Prototyping & Evaluation

Color: Edward Tufte – by hue

The Basics of the Color Wheel

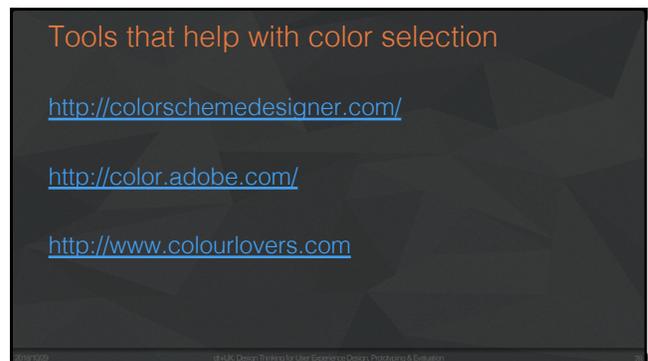

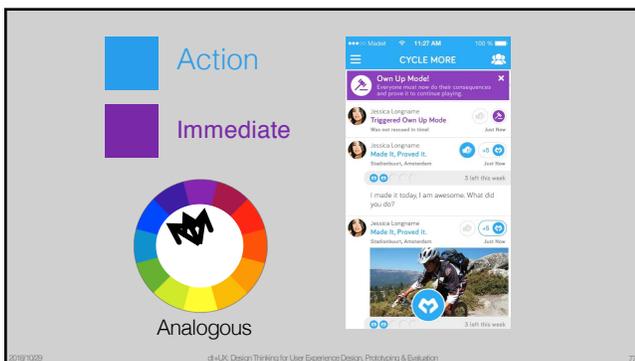

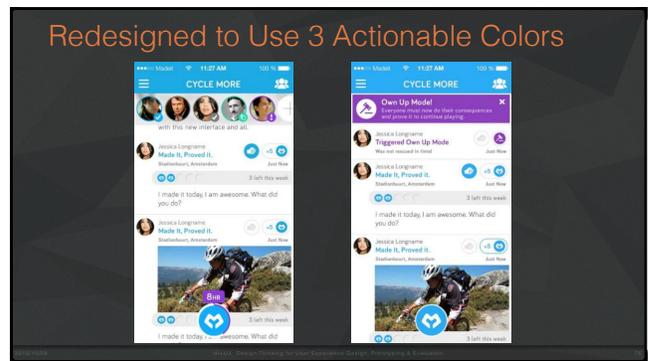

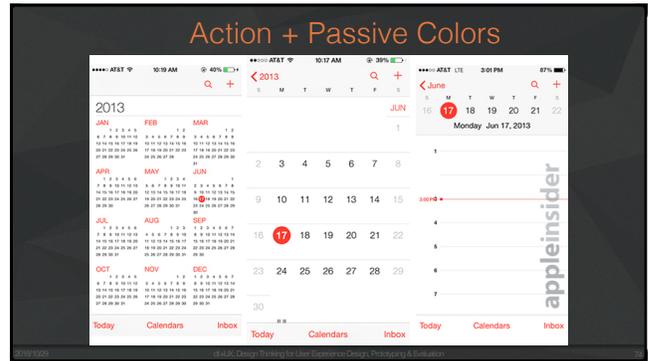

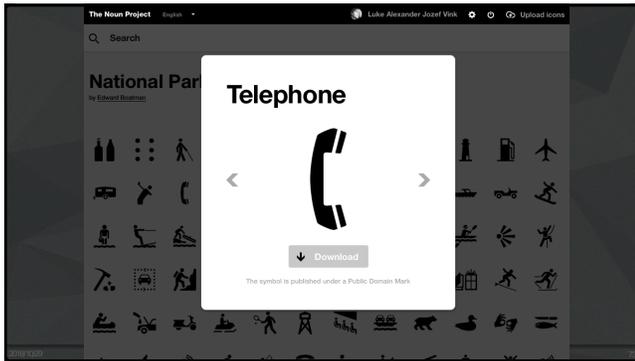

Warm Colors : Triggering / Sensual

Visual Design that is
Interesting
[the wow factor]

Why Make Information Interesting?

- Differentiation from similar work
- Creates “willful” interaction as opposed to “forced”
- With an interesting interface that is simple to learn, the user will teach themselves

Non Conventional Layouts

- Hard to get right & easy to overdo!
- Try new shapes
 - circular charts
 - hexagonal Objects
- Like all techniques (color, etc) – restrict unconventional layouts to the most important information

Wilfred Castillo: Tide Prediction: <http://www.wilfredcastillo.com/Tide-Prediction>

Partly Cloudy
iOS App

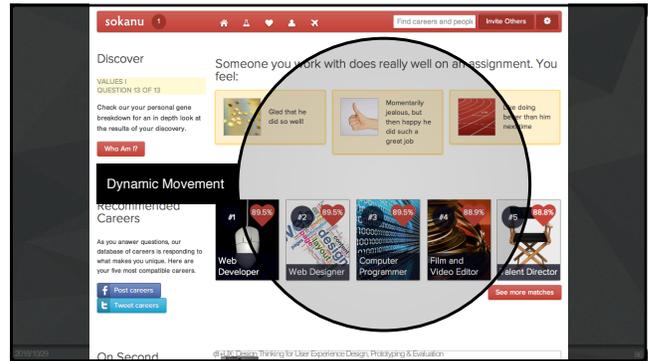

Colours In Culture

Non Conventional Layout

Autumn 2018
 Prof. James A. Landay
 Stanford University

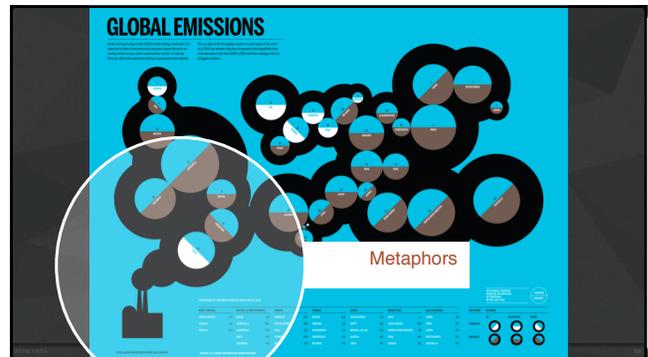

Dynamic Movement

- Hard to get right & easy to overdo!
- Animation is best used to connect information & create “flow”
- Like size, color & unusual shapes, animation draws attention to the eye & suggests importance

Metaphors (using the real world to describe info)

- Hard to get right & easy to overdo!
- Very useful to provide meaning and connect information to logic
- As you have seen before, the more direct or specific a metaphor, the more contextually relevant it is to a generation or time

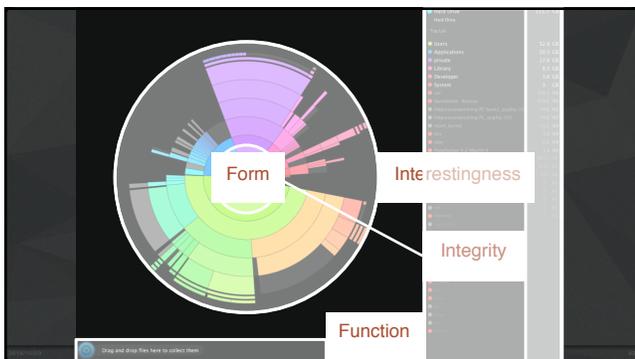

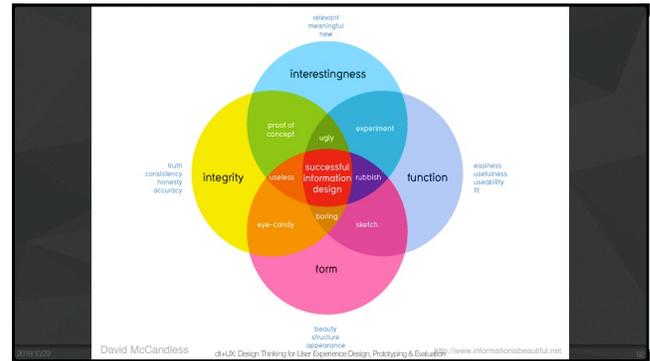

The best designs **balance** the techniques you have seen

and

The **less** techniques used, the easier it is to balance them

Overwhelming Use of Different Techniques

- ### Summary
- Start with Context, what is the nature of the information? What is the most important?
 - Design first in grayscale to focus on hierarchy
 - Small changes help us see key differences
 - e.g., small multiples
 - Avoid clutter, focus on the essence of your tasks
 - Use color properly – not for ordering!
 - Only use 1-2 colors at a time, unless absolutely necessary
