High-Fidelity Prototype README

CS 147 — Fall 2022

Avika P, Juben R, Madison F, Xinyi W

High-Fi Prototype

<https://github.com/stilakid/CS147-Wallus>

Operating Instructions

We recommended accessing the app on an iOS 16 device, preferably an iPhone, although it should work on iPads and android devices too.

1. Download "Expo Client" from the App Store

2. Login to the Expo App with

- username: *stilakid@stanford.edu*
- password: *@WallusLovesPudding*

3. Do one of the following:

a. Scan the QR code to the right.

b. Alternatively, open your mobile browser, visit

([https://expo.dev/@stilakid/Wallus?](https://expo.dev/@stilakid/Wallus?serviceType=classic&distribution=expo-go)

serviceType=classic&distribution=expo-go), and

click on the "Open in Expo Go" button.

4. Wait for the app to load and enjoy!

Limitations

1. Chat is limited to 2 users and viewable globally across all accounts
2. Completed tasks including accepting and invite or sending an invite are not permanently stored nor reflected on screen.
3. If a user goes to their newly joined investment group, they will be led to an existing investment group because of the previous point
4. User's investing activity will not be reflected under 'My Activity' in profile screen and the community feed.
5. Editing a profile picture is not implemented
6. Daily movers is not currently updated every day

Wizard of Oz

1. Personalizations and recommendations are implemented by Wizard of Oz. Most notable are *Wallus's Tips* in Detail Pages and *Recommended for you* in Markets.

Hard-Coded Items

1. User profile including name, image, prior investing history, investment groups, and investing history
2. Community page including the rationale and reactions
3. Numbers and charts in Investment Details pages
4. Notifications displayed
5. Dictionary term entries.
6. Friends that can be invited to an investment
