

SOUNDPRINTS

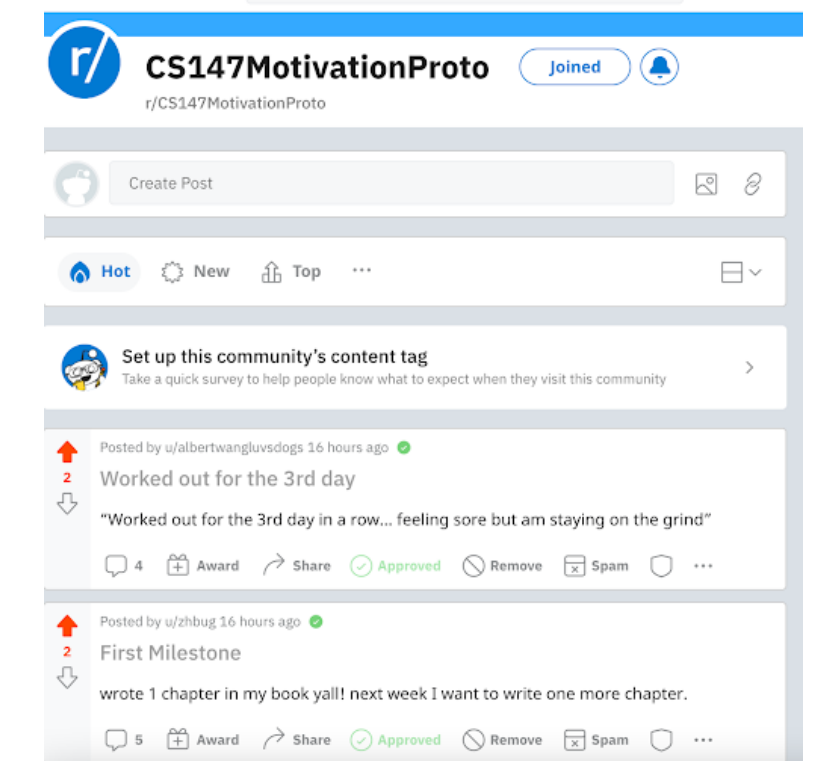

Audio spaces that connect and inspire.

DESIGN PROCESS

NEEDFINDING

TESTING

Problem

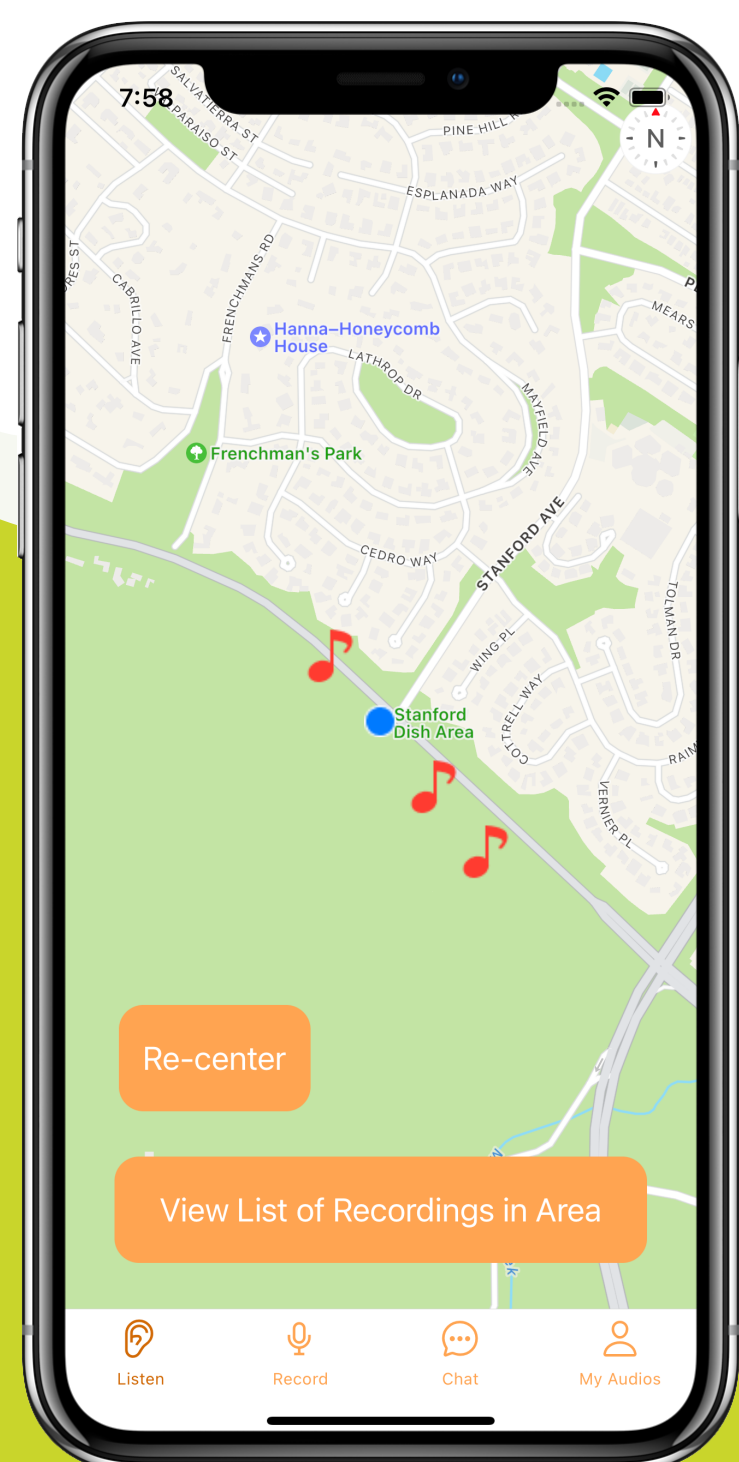

People often encounter daunting obstacles as they try to achieve their goals and **lack the community they need** to help motivate them and celebrate their achievements.

Solution

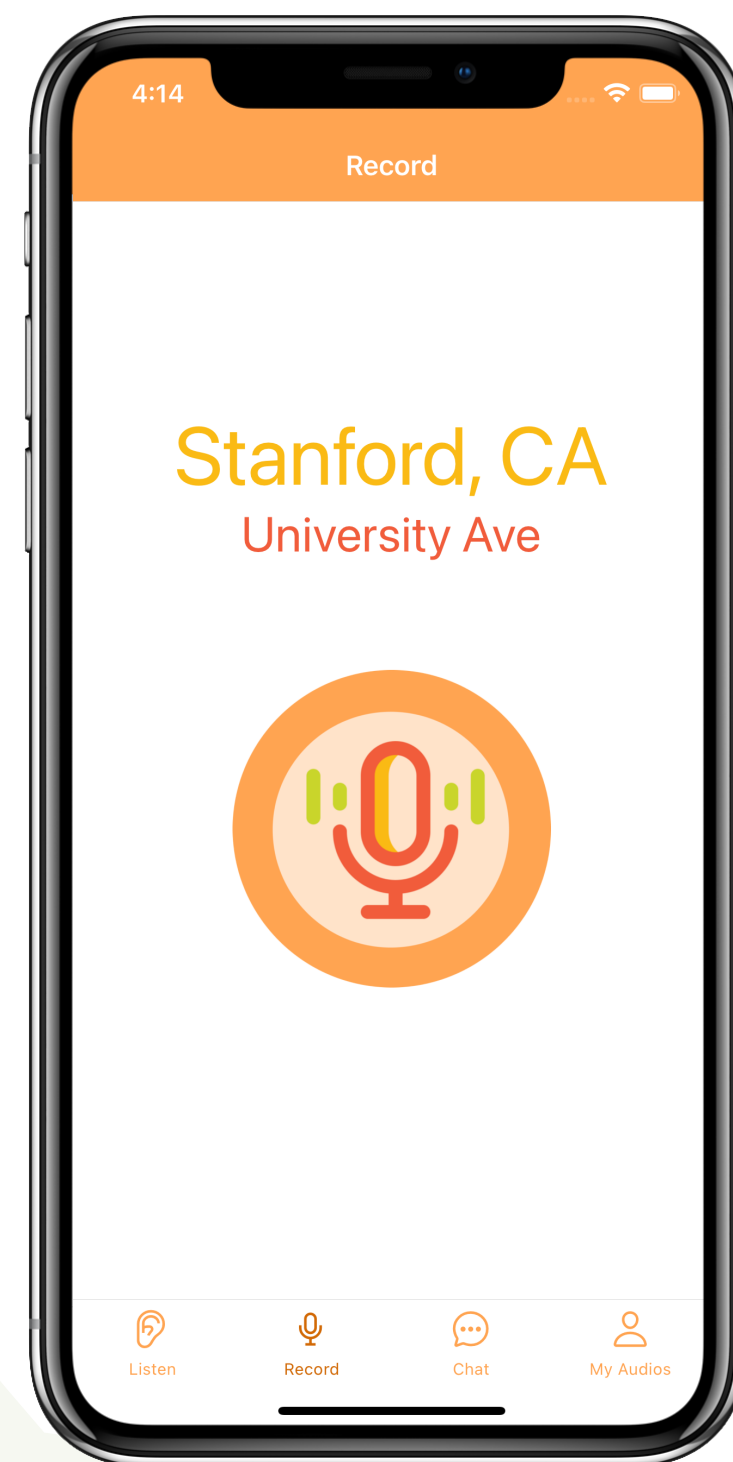

SoundPrints is a **location-based audio journaling app** that enables its users to **connect** with and **inspire** one another to achieve their goals. We hope users will be inspired by **listening** to the motivational recordings left by others at the places they visit and will make their own **recordings** to inspire and support others.

KEY FEATURES

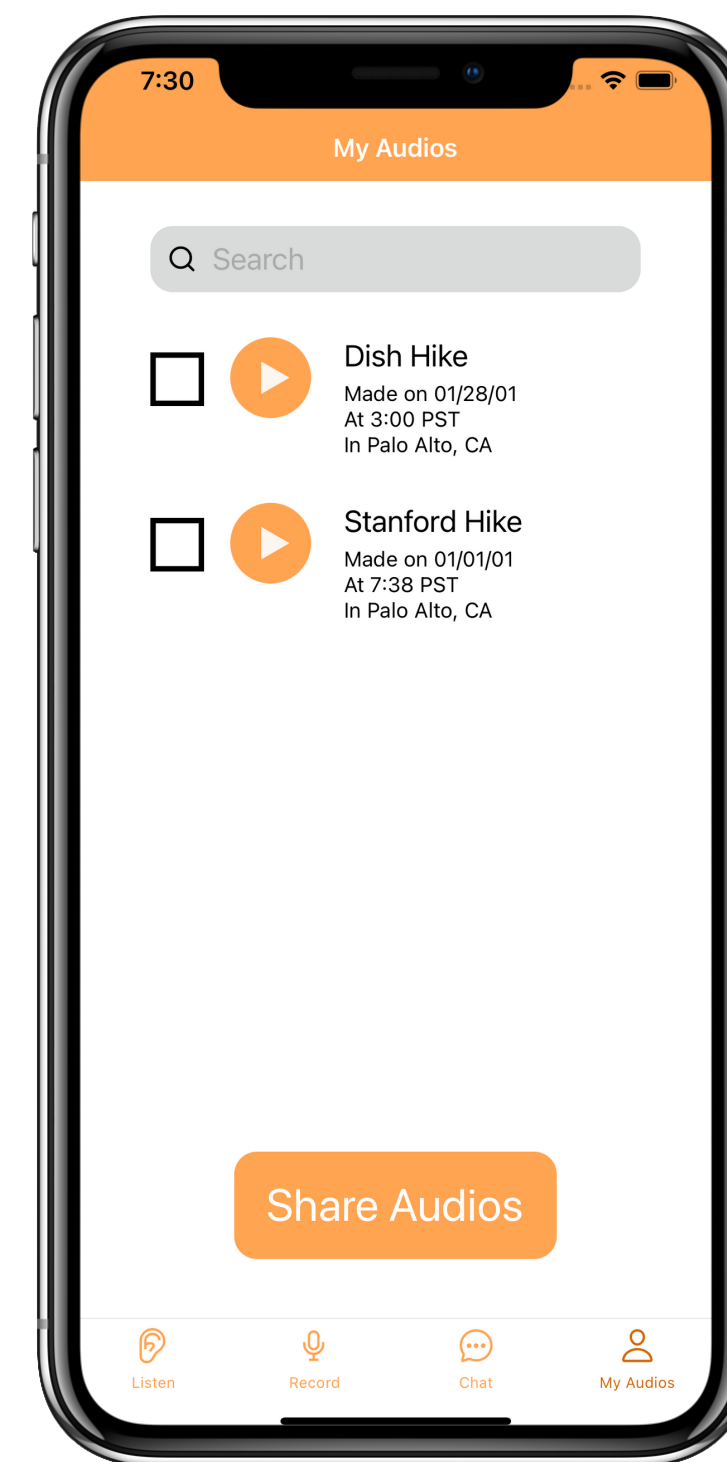

Listen to recordings made near you by others.

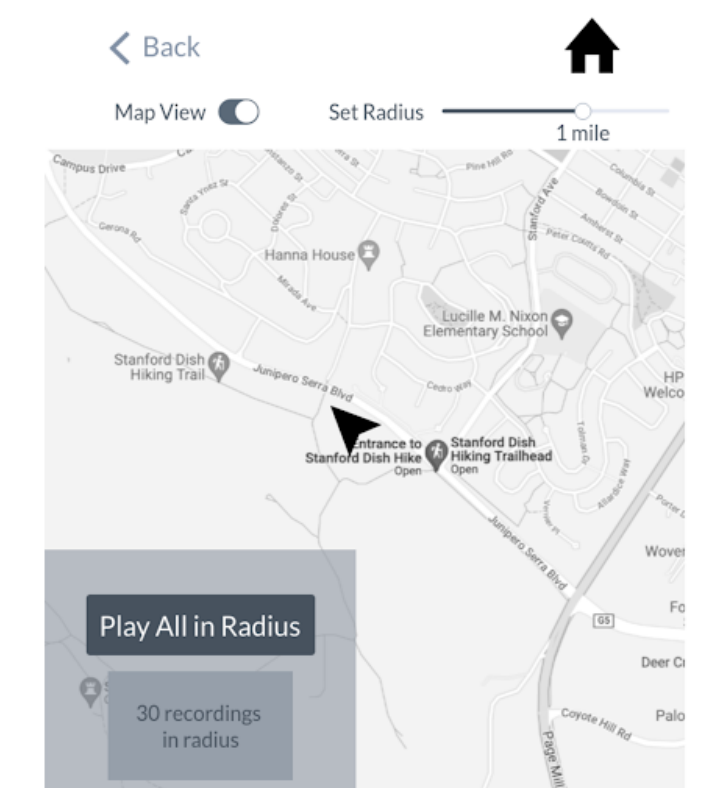

Create and post your own recordings.

Share your recordings with friends.
