# Road Map

Problem Overview

Our Solution

Prototype Video

Design Evolution

Current UI

Looking forward

# Problem

Long distance relationships and friendships are  
**difficult to maintain.**

# Ineffective Solutions

Too much effort

Boring

Impersonal

# Our Solution: Quest

## Value proposition

Making digital communication meaningful and fun

## High level description

- **Sender:** Hides a message at physical location
- **Receiver:** Follows AR path of coins to the location and opens the message

# Our Solution: Quest

**Delayed gratification** of receiving a letter

**Convenience** of receiving a text instantly on a smartphone

**Shared experience** for sender and receiver to connect through

# Hi-fi Video Prototype

# Design Evolution

# Needfinding

**Amber:** student in Toronto

*“There is just something about **receiving a letter** from a traveling friend, you just know that she/he cares about you, and that gives you a **warm, great feeling.**”*

**Insight:**

Amber **prefers handwriting letters** to remain in contact.

# Needfinding

**Susan:** in a long-distance relationship

*“I really wanted my boyfriend there with me when I have to eat alone, sometimes I want to go to movies but I can’t find anyone to come with.”*

**Insight:**

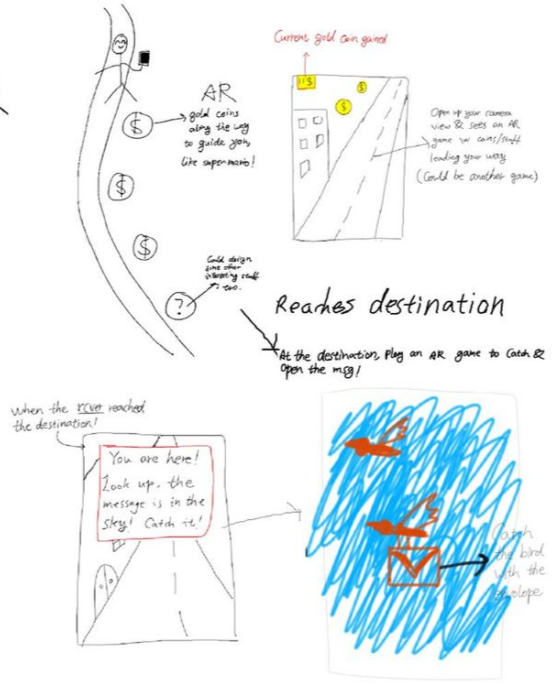

They struggle to maintain a long-distance relationship because of their **inability to do activities together.**

## Current UI

Current UI - Favorites

# Tasks with Current UI

1. Design and send a Quest
2. Receive Quest and navigate to destination
3. Browse completed Quests

# Task #1 - Send a Quest

Choose friend

Take picture

Place in location

Choose theme and send

# Task #2 - Receive a Quest

# Task #3 - Browse Completed Quests

# Three Tab Navigation

# Implementation

- Implemented using React Native, including AR
- Run on Expo Client
- Server runs on Node.js, hosted on Heroku

# Future Work

- Usability

- Login page
- Onboarding tutorials
- Support for adding friends

- Features

- Interactive AR games
- Better indoor AR games
- “Adversaries”

*Making digital communication  
meaningful and fun*

# Business Model

## Customer segments:

- People in long-distance relationships
- People with friends far away
- People who wants to have fun with AR games

## Retaining users:

- AR sets us apart
- Reminders to use Quest
- Daily Quests

## Revenue Stream:

- In-app purchases
- Corporate partners who would use Quests to sell and promote products

Thank You!
