rekindl 

remember. reignite. repeat.

Close relationships can easily grow distant.

Choose who to keep up with, get reminders to stay in touch, and save memories of good times.

Reignite your faded friendships.

Tasks

Representative Tasks

---

1. Get a notification and text a friend *(complex)*
2. Add a memory with a friend *(moderate)*
3. Add a connection with a new friend *(simple)*

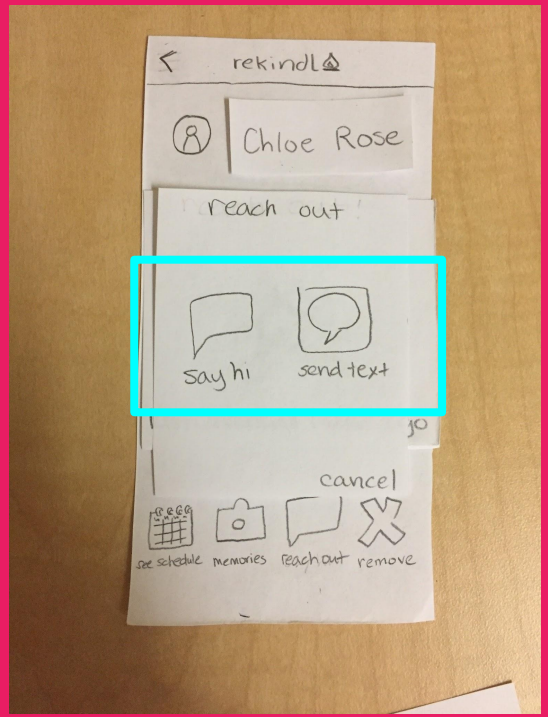

Bonus Tasks

---

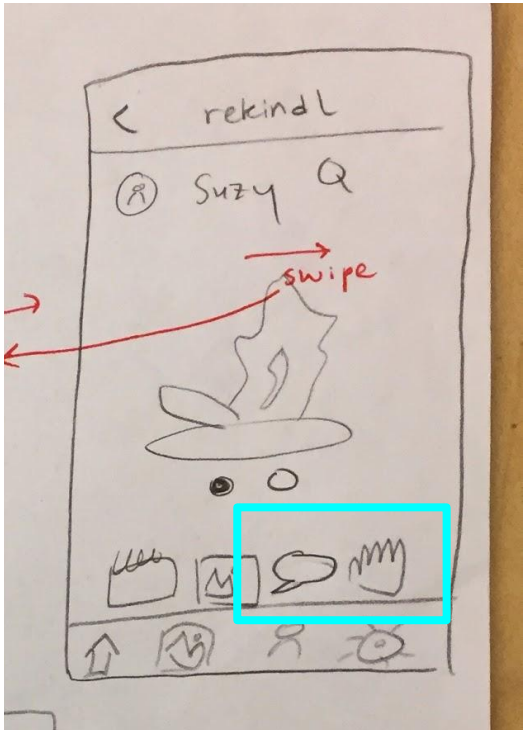

4. Check a friend’s schedule
5. Edit your own schedule
6. Check your notifications

Revised Interface Design

High Five

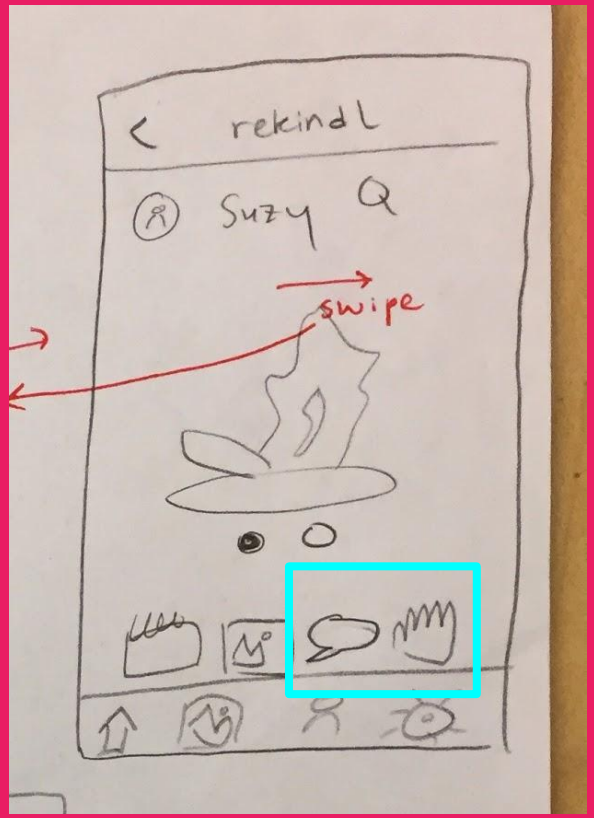

before

after

High Five

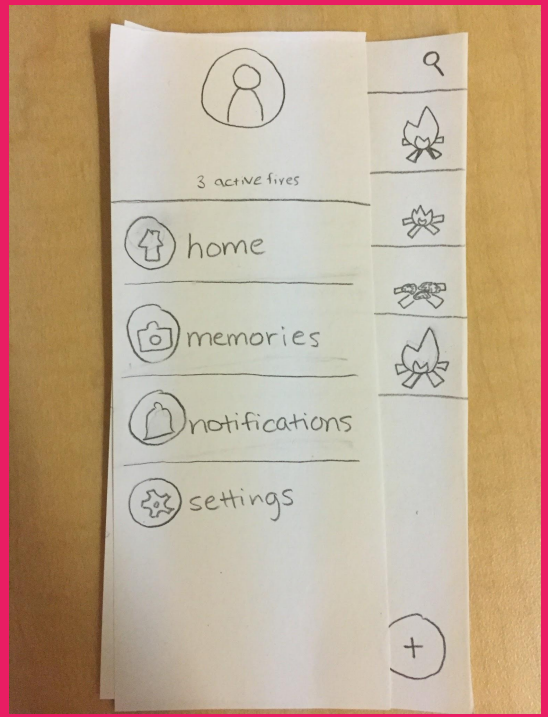

Reworded *Say Hi* to *High Five*

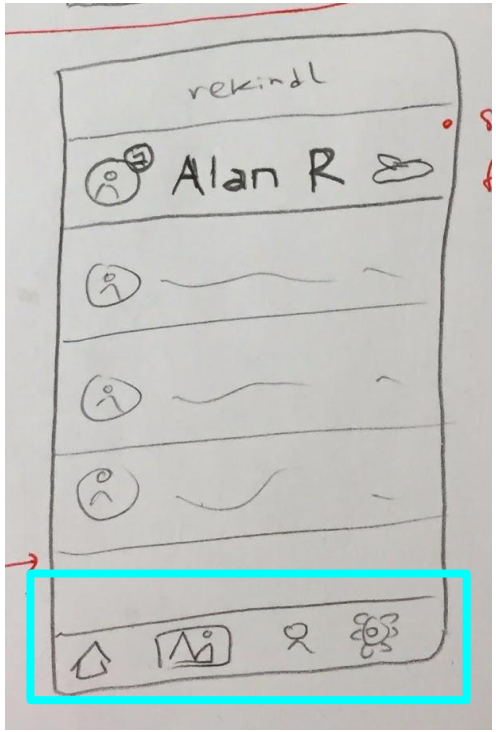

Separated *Send Text* and *High Five* options

Made icon for *High Five* less ambiguous

Tab Navigation

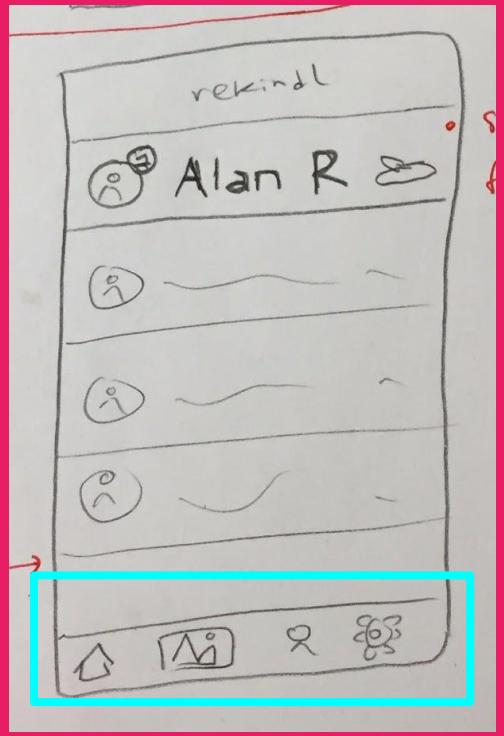

before

after

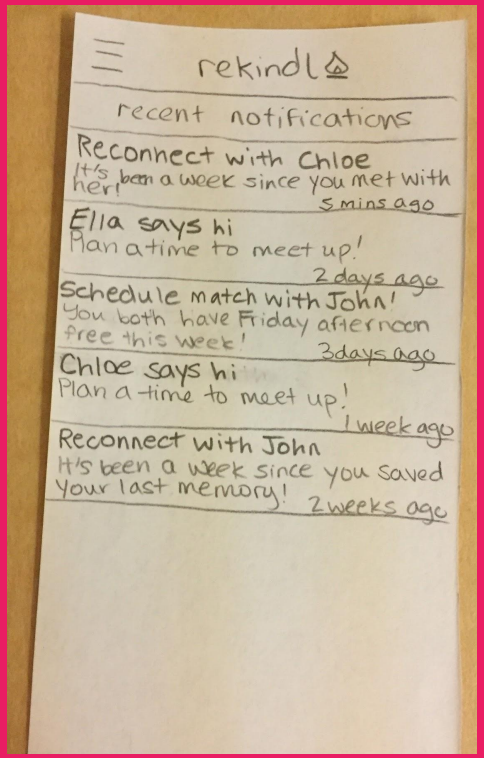

Tab Navigation

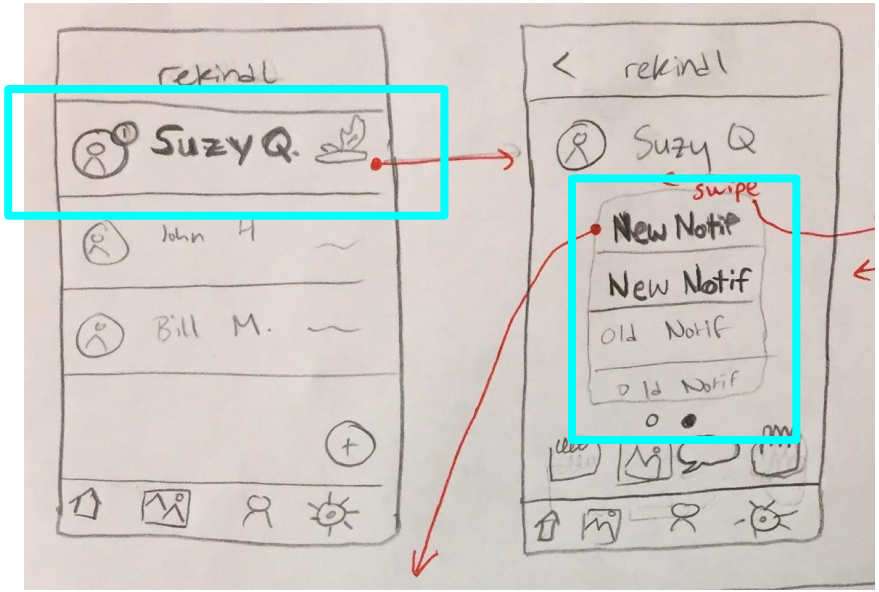

Removed menu button from the top bar

Added a constant tab bar with icons at the bottom

interact directly with Camera Roll simple to save immediately display additions

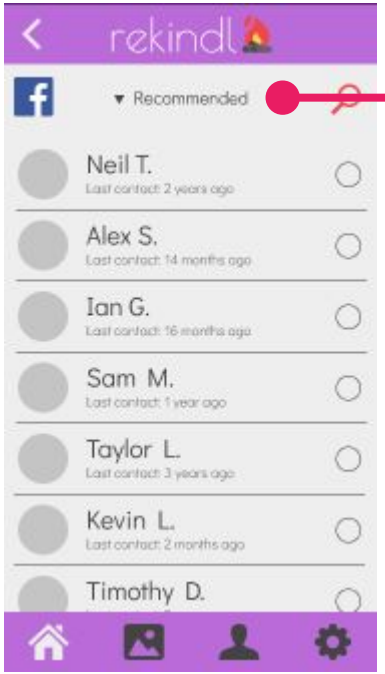

Task #3: Add a connection with a new friend

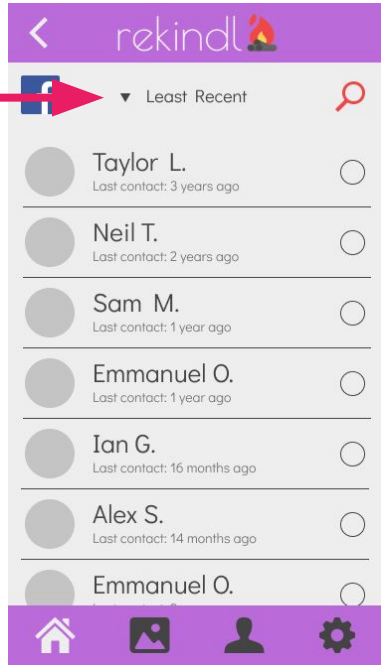

easily add new connections

port directly from existing lists

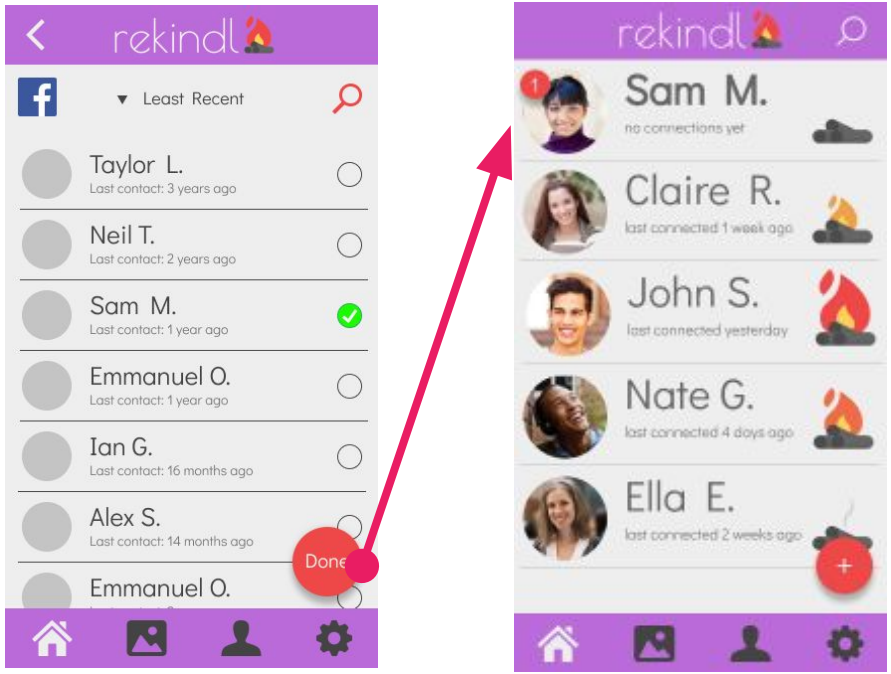

view all friends

sort who you want to see

Task #3 (cont.)

select your new connections

clear indication of new friends

Prototype Overview

Figma & InVision

Easy to collaborate

Lots of useful features

Pretty intuitive to learn

BUT...

Difficult to store state

Didn’t like Figma’s screen linking

Prototype Limitations

No settings (not central to rekindl)

Minimal scheduling features (bonus task)

Fire representation (time hard to capture)

Only FB and Contact connections (probably most common)

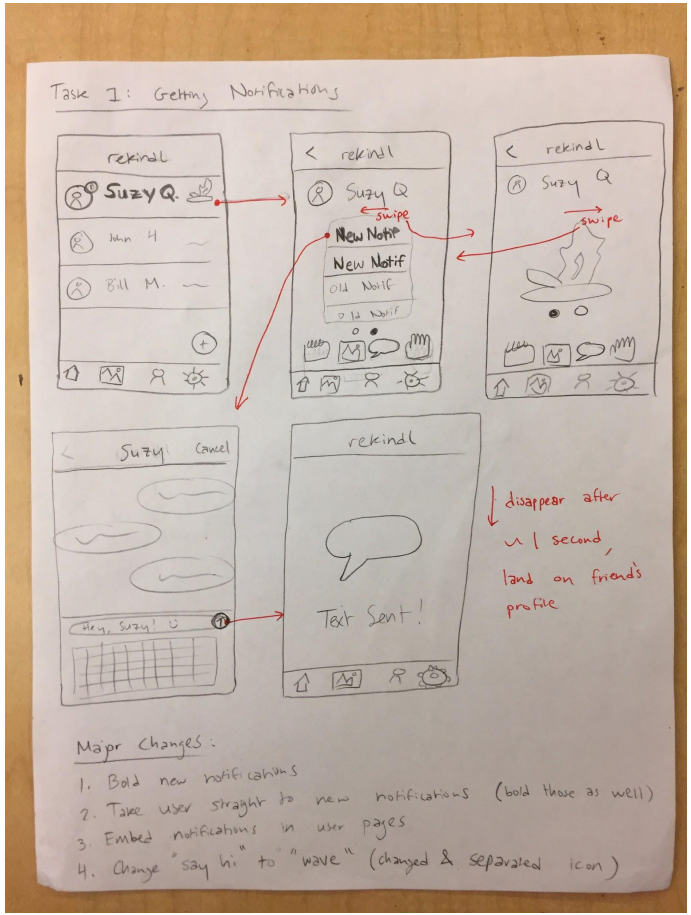

Hacks & Hard-Coding

Artificially populate connections and contacts

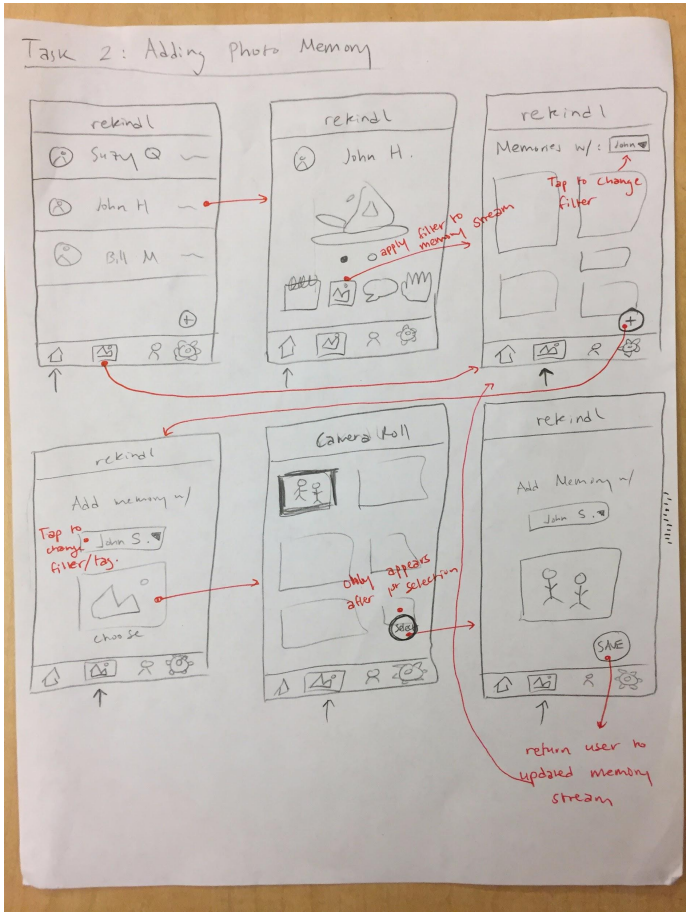

Require certain schedule edits

Certain features only active for certain connections
