Problem

Students do not have enough information outside of their own network to make informed decisions about their career paths, and professionals do not have a sustainable platform to provide mentorship and career advice to those in need of it.

Solution

Provide a platform for users to read, ask, and share advice from professionals about their careers so that they can gain a new perspective on these careers.

Value Proposition

Everyone seeks a different path. We can help you along yours.

Discussion / Next Steps

- Fully implement backend using Firebase
 - Can push data to database but currently not pulling data
- Continue to make changes to padding for text
- Implement swipe gestures
- Provide more instructions/suggestions for forum topic format in placeholder text

- Reach: Allow answered question cards to be collapsable to allow the user to browse through answered questions more quickly
 - Click on card to open to a new screen containing answer
- Reach: Implement messaging
