Ideate

Prof. James A. Landay
Computer Science Department
Stanford University

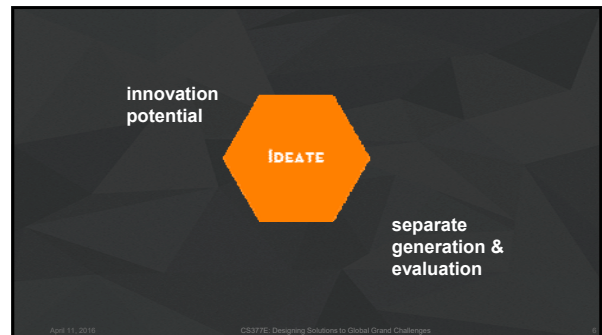

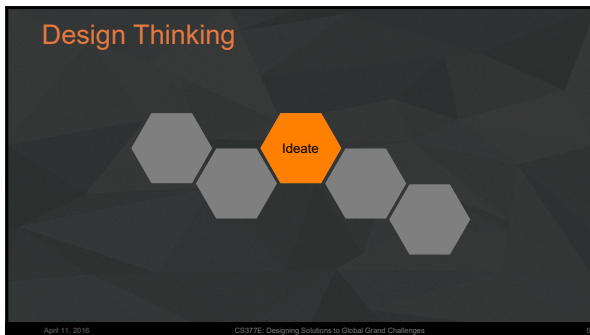

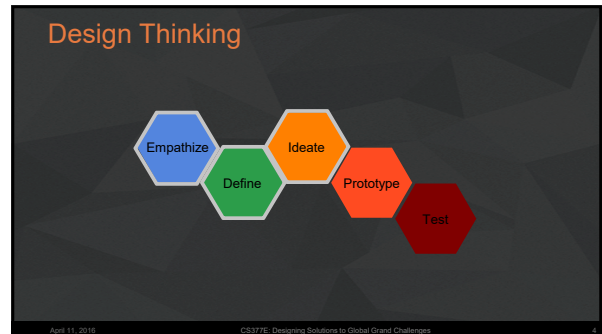

Winter 2016
April 11, 2016

Slides adapted from d.leadership Define + Ideate slides (<http://d.leadership.com/presentation/define-ideate-2015.html>)
Additional resources from bootcamp bootleg (<http://leland.stanford.edu/research/leadershipbootcamp011115/3-bootcamp-bootleg0110/24-34.html>)

Outline

- POV report outs
- Design thinking process
- Ideate
- How Might We...?
- HMW exercise
- Selecting good problems & solutions
- Brainstorming solutions

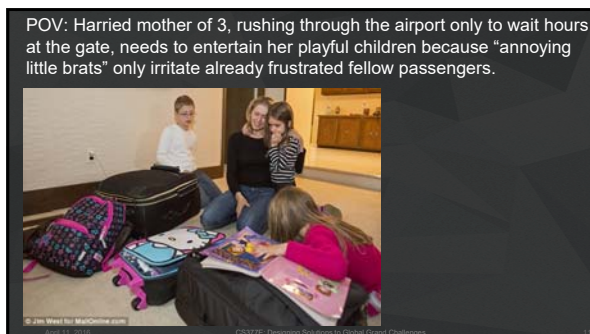

April 11, 2016 CS377E: Designing Solutions to Global Grand Challenges

“Might” lets you defer judgment
helps people to create options freely
opens up more possibilities

April 11, 2016 CS377E: Designing Solutions to Global Grand Challenges 9

POV: Harried mother of 3, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because “annoying little brats” only irritate already frustrated fellow passengers.

Break POV into pieces
HMW entertain kids? HMW slow a mom down?

Amp up the good/Remove the bad
HMW separate kids from fellow passengers?

Explore the opposite
HMW make the wait the most exciting part of the trip?

Question an assumption
HMW entirely remove the wait time at the airport?

<http://dschool.stanford.edu/wp-content/uploads/2012/05/HMW-METHODCARD.pdf>
April 11, 2016 CS377E: Designing Solutions to Global Grand Challenges 12

POV: Harried mother of 3, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because "annoying little brats" only irritate already frustrated fellow passengers.

Go after adjectives

HMW we make the rush refreshing instead of harrying?

ID unexpected resources

HMW leverage free time of fellow passengers to share the load?

Create an analogy from need or context

HMW make the airport like a spa?

Change a status quo

HMW make playful, loud kids less annoying?

<http://dschool.stanford.edu/wp-content/uploads/2012/05/HMW-METHODCARD.pdf>

Anatomy of a Strong HMW Question

- Who
- What
- When
- Where
- Why

• Best to have at least 3 W's in a good HMW question

DO IT NOW:

Generate some HMW statements!

POV: Harried mother of 3, rushing through the airport only to wait hours at the gate, needs to entertain her playful children because "annoying little brats" only irritate already frustrated fellow passengers.

Break POV into pieces

Amp up the good/Remove the bad

Explore the opposite

Question an assumption

Go after adjectives

ID unexpected resources

POV: Harried Mother at Airport

- How might we capture children's attention?
- How might we turn the waiting area into a play zone?
- How might we make already frustrated passengers not frustrated?
- How might we speed up the line and/or get them to leave the line?
- How might we help kids go elsewhere?
- How might we give passengers and kids?
- How might we not have to rush through the airport?
- How might we help the people behind the line?
- How might we make the perception of time?
- How might we make checking less stressful?
- How might we separate children from passengers?
- How might we decrease the airport environment for all passengers?
- How might we turn gate into a game?
- How might we give more to terms of use?
- How might we make the most of judgement?
- How might we decrease children from the airport?
- How might we make a separate section for children?
- How might we make children a source of joy?
- How might we let children do something useful?
- How might we have kids with flight?
- How might we not make families wait at gate?
- How might we decrease the airport in transportation?
- How might we increase wait at gate?
- How might we help the kids have fun?
- How might we help the kids have fun?
- How might we turn play/leisure into enjoyment?
- How might we make the airport less frustrating for roadway?

Selecting a Good Problem

3 Favorites!

OR

Rational, Delightful, Long shot

<http://dschool.stanford.edu/wp-content/uploads/2011/03/BootcampBootleg2010v2SLIM.pdf>

	URGENT?	COMMON?	INTERESTING?
EMERGENCY EVALUATION	Y	?	Y
TRANSPORTATION PLANNING	Y	N	?
DAILY DECISION-MAKING	Y	Y	?
MANAGING COMMUNITY FUEL	N	Y	N

Prioritizing Problems

Selecting a Good Problem

- Frequency
 - want something that occurs often
- Density
 - lots of people experience it
- Pain
 - more than a small annoyance
- Interested
 - your team is motivated to work on this problem

* see Manu Kumar's blog post on this topic: <http://www.k9ventures.com/blog/2015/02/10/finding-problem-worth-solving/>

Research/Analysis

- How big a problem is it? (market) 
- Whose problem is it? (stakeholders) 
- What's already out there? (competition) 
- How are things done currently? (status quo) 
- How can they be improved? (innovation) 

Exercise

1. Generate at least 10 HMWs for one of your team's POVs (10 min)
2. Select the top 3 HMWs (3 min)

Brainstorm "How Might We"s → Solutions

BRAINSTORM RULES

- one conversation at a time
- go for quantity
- headline!
- build on the ideas of others
- encourage wild ideas
- be visual
- stay on topic
- defer judgment

Constraints Can Energize

"How would you design it with the technology of 100 years ago?"

"What if we had to spend at least a million dollars?"

"Only ideas that would get you fired"

"All ideas must use magic."

24

Dark Horse Idea

April 11, 2016

CS377E: Designing Solutions to Global Grand Challenges

27

Dark Horse Idea

1. **Dark:** explores a space that is risky, radical or orthogonal
2. Brainstormed after more traditional HMW/ideas
3. Possible to prototype & test (can't be infeasible)

April 11, 2016

CS377E: Designing Solutions to Global Grand Challenges

28

Downselecting Ideas

- Celebrate the success of the brainstorm, take a break, vote!
- Option 1: Heat map voting
 - Everyone starts with an unlimited number of votes (small dots)
 - Then everyone gets 3 final votes on their absolute favorites (large dots) and 1 bonus dark horse vote
- Option 2: Category voting
 - Each person gets a specific number of votes (i.e., 5)
 - Specific categories (Most feasible idea, Craziest idea, Best long shot, my favorite but improbable, short term solution, etc.)

April 11, 2016

CS377E: Designing Solutions to Global Grand Challenges

29

Heat Map Voting + Prototyping Exercise

- Take the dots that are on your tables
- 1. Everyone gets an unlimited number of votes with little dots.
- 2. After this cycle is complete, everyone gets 3 votes with large red dots and 1 bonus dark horse vote with the blue dot.
- Next, before discussing the ideas, everyone should individually draw a sketch or storyboard of what their favorite idea (or combo of ideas) is
- Then share with each other and use this artifact to facilitate the conversation

April 11, 2016

CS377E: Designing Solutions to Global Grand Challenges

30

Exercise

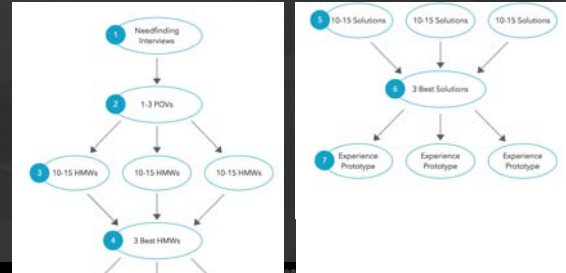

1. Brainstorm at least 30 solutions for one of your top 3 HMWs (10 min)
2. Select the top 3 solutions (3 min)

April 11, 2016

CS377E: Designing Solutions to Global Grand Challenges

31

Project Road Map

Next Time

- Lecture
 - Design Exploration & Experience Prototyping
- Project
 - Turn in 3 Final POVs (based on today's feedback)
 - 10-15 HMWs for each of at least 3 POVs (present top 3 HMWs for each POV on Wed)
